Neo Delhi and the Politics of Postcolonial Urbanism Rohan

Kalyan, 2017-04-07 This book is augmented by an interactive website called NEODELHI.NET. During research trips to Delhi and Gurgaon between 2008 and 2015 the author produced a multi-media urban archive that includes full color photos, an essay film, ethnographic videos, field notes and more pertaining to the arguments and ideas presented in this book. The reader is encouraged to actively engage the website along-side this text. This book challenges the prevailing metro-centric view of globalization. Cities are a crucial part of the infrastructure of globalization, yet in the so-called developing world, cities have largely been excluded as structurally irrelevant to the functioning of the global urban economy. Kalyan presents a trans-disciplinary exploration of the manifold possibilities and challenges that confront a 'globalizing' megacity like New Delhi. Combining theoretical scholarship, ethnographic exploration, archival research and textual and visual analysis, the book foregrounds complex urban dynamics in and around the region and raises critical questions about changing urban life for postcolonial cities across the Global South. Kalyan employs methodological approaches from

political economy, urban studies and visual culture to render a vivid portrait of changing urban life in India's largest conurbation, The book will be of interest to students and scholars of urban studies, postcolonial studies, and inter-disciplinary studies.

Transformative Pathways to Sustainability Adrian

Ely,2021-09-02 Transformations to sustainability are increasingly the focus of research and policy discussions around the Sustainable Development Goals. However, the different roles played by transdisciplinary research in contributing to social transformations across diverse settings have been neglected in the literature. Transformative Pathways to Sustainability responds to this gap by presenting a set of coherent, theoretically informed and methodologically innovative experiments from around the world that offer important insights for this growing field. The book draws on content and cases from across the 'Pathways' Transformative Knowledge Network, an international group of six regional hubs working on sustainability challenges in their own local or national contexts. Each of these hubs reports on their experiences of 'transformation laboratory' processes in the following areas: sustainable agricultural and food systems for healthy livelihoods, with a focus on sustainable agri-food systems in the UK and open-

source seeds in Argentina; low carbon energy and industrial transformations, focussing on mobile-enabled solar home systems in Kenya and social aspects of the green transformation in China; and water and waste for sustainable cities, looking at Xochimilco wetland in Mexico and Gurgaon in India. The book combines new empirical data from these processes with a novel analysis that represents both theoretical and methodological contributions. It is especially international in its scope, drawing inputs from North and South, mirroring the universality of the Sustainable Development Goals. The book is of vital interest to academics, action researchers and funders, policy makers and civil-society organisations working on transformations to sustainability. The Open Access version of this book, available at www.taylorfrancis.com/books/oa-edit/10.4324/9780429331930/transformative-pathways-sustainability-pathways-network, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license

The Multiplex in India Adrian Athique, Douglas Hill, 2009-12-17
During the decade of its existence in India, the multiplex cinema has been very much a sign of the times – both a symptom and a symbol of new social values. Indicative of a consistent push to

create a 'globalised' consuming middle class and a new urban environment, multiplex theatres have thus become key sites in the long-running struggle over cultural legitimacy and the right to public space in Indian cities. This book provides the reader with a comprehensive account of the new leisure infrastructure arising at the intersection between contemporary trends in cultural practice and the spatial politics that are reshaping the cities of India. Exploring the significance, and convergence, of economic liberalisation, urban redevelopment and the media explosion in India, the book demonstrates an innovative approach towards the cultural and political economy of leisure in a complex and rapidly-changing society. Key arguments are supported by up-to-date and substantive field research in several major metros and second tier cities across India. Accordingly, this book employs analytical frameworks from Media and Cultural Studies, and from Urban Geography and Development Studies in a wide-ranging examination of the multiplex phenomenon.

The Black Snow Mvp, 2014-02-13 Consequent to the India's current state of affairs with respect to Corruption and Misgovernance, even the 'Snow' has turned Black—the obvious have also lost its credibility. Based in the vibrant, cosmopolitan

Millennium city, Gurgaon, the saga is a flashback fiction constructed in the year 2063—fifty years after India was colonized again. In one of the prison cell of India, few kids have been detained from their school and tortured by the colonizers. An old man is also in the same cell as them. They interact amongst each other, and the old man who they call 'grandpa' narrates a story from a book—dnational ntwrk—authored by Dev on how two young gals and four young guys have tried to alert the Country's Leadership way back in 2012 on the dire states of country's affairs due to corrupt malpractices and predicted a possible acquisition of the nation by a foreign country. Apparently, the old man, Arjun Kapoor, is the son of the couple—Dev & Juhi—owner of a paying guest house in Gurgaon inhabited by all the six young fellas during 2011-12.

Religion and the Morality of the Market Daromir

Rudnyckyj,Filippo Osella,2017-03-30 Since the collapse of the Berlin Wall, there has been a widespread affirmation of economic ideologies that conceive the market as an autonomous sphere of human practice, holding that market principles should be applied to human action at large. In the wake of the 2008 financial crisis, the ascendance of market reason has been countered by calls for reforms of financial markets and for the consideration of moral values in economic practice. This book intervenes in these debates by showing how neoliberal market practices engender new forms of religiosity, and how religiosity shapes economic actions. It reveals

how religious movements and organizations have reacted to the increasing prominence of market reason in unpredictable, and sometimes counterintuitive, ways. Using a range of examples from different countries and religious traditions, the book illustrates the myriad ways in which religious and market moralities are closely imbricated in diverse global contexts.

Sustainable Development and Planning VII Ö. Özçevik, C.A. Brebbia, S.M. Öner, 2015-05-19 This book contains the proceedings of the seventh in a series of biennial conferences on the topic of sustainable regional development that began in 2003. Organised by the Wessex Institute, the conference series provides a common forum for all scientists specialising in the range of subjects included within sustainable development and planning. In order to ensure that planning and development can meet our present needs without compromising future generations, planners, environmentalists, architects, engineers, policy makers, and economists must work together. The use of modern technologies in planning gives us new potential to monitor and prevent environmental degradation. In recent years, in many countries an increase in spatial problems has led to planning crises. Planning problems are often associated with uneven development,

deterioration of the quality of urban life, and destruction of the environment. The increasing urbanisation of the world, coupled with the global issues of environmental pollution, resource shortage, and economic restructuring, demand that we ensure a decent quality of life for our cities. Other environments, such as rural areas, forests, coastal regions, and mountains, face their own problems that urgently require solutions in order to avoid irreversible damage. Effective strategies for management should consider planning and regional development, two closely related disciplines, and emphasise the demand to handle these matters in an integrated way. The papers in the book cover such topics as: Regional Planning; City Planning; Sustainability and the Built Environment; Cultural Heritage; Environmental Management; Environmental Policies and Planning; Sustainable Tourism; Resources Management; Social and Political Issues; Rural Developments; Sustainable Solutions in Emerging Countries; Transportation; Energy Resources; Environmental Economics; Sustainable Assessment; Sustainable Development Indicators; Sustainability Modelling; Governance; Resilience; Community Planning; Planning for Equality; Quality of Life.

Delhi's Changing Built Environment Piyush Tiwari, Jyoti

Rao, 2017-12-22 The rapid expansion, urban form and development of the built environment in the world's second most populous city, Delhi, has been the consequence of social, political, economic, planning and architectural traditions that have shaped the city over thousands of years. Whilst seamless at times, these traditions have often resulted in the fragmented development of the city's built environment. This book charts the political, economic and social forces that drove development in India generally and in Delhi in particular, and investigates the drivers and constituents of Delhi's urban landscape. The book provides a lens through which to examine the development path of a mega-city, which can be used as a guide in the development of emerging urban centres. Furthermore, the strengths and weaknesses of Delhi's built environment are critically analysed, with consideration to the role of the market, finance and policy over time. This book not only provides valuable insight into the physical evolution of Delhi and its surrounds, but it also asks broader questions about how people, power and politics interact with urban environments. It is essential

reading for planners, architects, urbanists and social historians.

Delhi Metropolitan Ranjana Sengupta, 2008-01-01 My understanding of this ferocious, restless, relentless metropolis is that each of us who lives in this city carries a unique, if virtual, Delhi inside our heads.' Independence, four million refugees from Pakistan and the overwhelming presence of visible and invisible power that flows from New Delhi being the capital have transformed it from the unruffled imperial town it once was to the fearsome metropolis it is today. And yet, says Ranjana Sengupta, this largely unloved city deserves to be loved. Delhi is home to the most diverse population of any city in the country. The unceasing influx of migrants has unleashed new urban architectures of opulence and deprivation. Different groups have set up their own, different universes, and these manage to coexist, not unhappily. And somewhere between the futurist Gurgaon skyline and the proliferating slums, alongside the march of the Metro and the refurbishment of Khan Market, lie Delhi's unsung sagas—the memories, the passions and the unspoken expectation that the city will change lives. Sengupta illustrates how Delhi is essentially the creation of refugees of all kinds, from those fleeing plundered homes within and across the border to the adventurers who have

flocked to the city for the greater opportunities of employment or simply to be close to the hub of political power. The newer Delhi, she says, in its turn gained from the accumulated and diverse talent and capital it acquired from these people, although haphazard development poses a great danger to it. Delhi Metropolitan tracks the changes from the time 'going to CP' was almost the only leisure activity for the middle class, looks at the subtle reinventions of government colonies and the shining new suburbs, and inspects the footprints of 'Punjabification'. Have all these actually managed to colonize this extravagant, indefinable and unlikely city? In a work of immense detail, at once informed and entertaining, Ranjana Sengupta proffers an answer.

Moguls of Real Estate Manoj Namburu, 2007-10-01 Vivid and detailed, Moguls of Real Estate aims to preserve for posterity the business biographies of five of the most successful leaders of the real estate industry in India - KP Singh of DLF, Niranjan Hiranandani of Hiranandani Constructions, Sushil Ansal of Ansal API, Shapoor Pallonji Mistry of Shapoorji Pallonji & Co. Ltd. and Irfan Razack of Prestige Group. The book examines their lives closely and reveals how they overcame obstacles, forged their own management philosophies and revolutionized the business world. It

celebrates their larger than life ambition, inspired leadership and hard work. The book traces the growth - including the highs and lows - of the Indian real estate market and is as much for general readers as for those particularly interested in the Indian real estate industry.

India and the Age of Crisis Michael Gillan, Rob

Lambert, 2016-03-17 Much of the discussion of India in the public sphere has focused on economic policy settings and restructuring, annual growth rates, trade relations and the nation's status as an economic and political actor within the international system. This collection considers other dimensions of socio-economic transformation in India and its profound impact on society and nature. While economic and ecological fragility are now very apparently problems of a 'global' scale they are nevertheless grounded and experienced at the local scale where vulnerable and marginal people located in the urban periphery and in rural areas confront these 'crises' most acutely. The studies in this collection encompass many of the most important social and political concerns of India in this age of crisis, namely, the politics of water resources and land acquisition and use; the interaction between food security, markets, and institutions; the politics and strategies

of labour movements; narratives and practices of 'development' and contestation over forms of agrarian production in India; the link between urbanisation and local class, caste and political actors; and the potential for civil society to either be co-opted or to contest neoliberal logics and forms of governance. This book was published as a special issue of the Journal of South Asian Studies.

Network Practices Anthony Burke, Therese Tierney, 2012-03-20

The twin revolutions of the global economy and omnipresent Internet connectivity have had a profound impact on architectural design. Geographical gaps and, in many cases, architecture's tie to the built world itself have evaporated in the face of our new networked society. Form is now conceptualized by architects, engineers, and artists as reflexive, contingent, and distributed. The collected essays in *Network Practices* capture this unique moment in the evolution of design, where crossing disciplines, spatial interactions, and design practices are all poised to be reimaged. With contributions by architects, artists, computer programmers, and theorists and texts by Reinhold Martin, Dagmar Richter, Michael Speaks, and others, *Network Practices* offers an interdisciplinary analysis of how art, science, and architecture are responding to rapidly changing mobile, wireless, and information
