**This Program is Brought to You By...** Joshua A. Braun, 2015-01-01 Journalism, television, cable, and online media are all evolving rapidly. At the nexus of these volatile industries is a growing group of individuals and firms whose job it is to develop and maintain online distribution channels for television news programming. Their work, and the tensions surrounding it, provides a fulcrum from which to pry analytically at some of the largest shifts within our media landscape. Based on fieldwork and interviews with different teams and organizations within MSNBC, this multi-disciplinary work is unique in its focus on distribution, which is rapidly becoming as central as production, to media work.

**A Glistening Planet** Gary L. Beer, 2018-01-29 Rumors of a planet that is covered in gold, diamonds and precious metals has been talked about for centuries. Many believe that the planet does exist somewhere in the galaxy and astronomers even refer to it as planet R4591, but most people call it the Glistening Planet. A group of engineers contracted to fit life-support systems to the domes on the

planet find that the Glistening Planet is no myth as it glitters and shines as the surface is indeed covered in a fortune of precious metals and gemstones. The engineers find out that there is more to the Glistening Planet than vast wealth and they soon find themselves fighting for their lives. More are on the way to raid the planets' riches as well as an army from a military regime and the engineers know they must get off the Glistening Planet as they know of its location and to remain means certain death.

*Fawcetta* Dalian Artanian, 2009-08-10 They say dreams are for those who feel the need to be a part of something bigger. They say fantasies exist in the minds of those who are free spirited. They

say illusion is what every man carries through his life until death opens his eyes. Everyone feels the need to get away from their own lives where predictability and monotony threaten to crush their spirits. They long to escape to a place where life keeps them on their toes and the risk of losing everything is always just around the corner. This story, which has been buried and forgotten in the waters and sands of time, has no boundaries, no safe havens. Fawcetta is a world of mystery, drama, deceit, romance, and is filled with action and adventure. The emperor of Fawcetta struggles to hold not only his empire together, but also his family. No one suspects they are being purposefully manipulated and deceived by one power-hungry man. Anger divides children from parents, loss and betrayal spurring vengeance and hatred. The fate of the once peaceful paradise is placed in the hands of a young Guardian named Kaina. She must find a way to find her soul-mate in order to open the one gate that will save their beloved planet from falling into total darkness. Otherwise, Fawcettas days are numbered.

**Tales from an Uncertain World** L. S. Gardiner,2018-03-15 So far, humanity hasn't done very well

in addressing the ongoing climate catastrophe. Veteran science educator L. S. Gardiner believes we can learn to do better by understanding how we've dealt with other types of environmental risks in the past and why we are dragging our feet in addressing this most urgent emergency. Weaving scientific facts and research together with humor and emotion, Gardiner explores human responses to erosion, earthquakes, fires, invasive species, marine degradation, volcanic eruptions, and floods in order to illuminate why we find it so challenging to deal with climate change. Insight emerges from unexpected places—a mermaid exhibit, a Magic 8 Ball, and midcentury cartoons about a future that never came to be. Instead of focusing on the economics and geopolitics of the debate over climate change, this book brings large-scale disaster to a human scale, emphasizing the role of the individual. We humans do have the capacity to deal with disasters. When we face threatening changes, we don't just stand there pretending it isn't so, we do something. But because we're human, our responses aren't always the right ones the first time—yet we can learn to do better. This book is essential reading for all who want to know how we can draw on our strengths to survive the climate catastrophe and forge a new

relationship with nature.

wake are spiritual loss, alienation, and devastation. These essays not only evaluate Technopolis, but also seek wisdom to cope with our new human-made environments. Positively stated, they offer suggestions on how to bring us back into balance. Some of our best wisdom in analyzing Technopolis can be found in the voices of the Christian humanists. Unlike Enlightenment humanism, which tends to be human-centered, Christian humanism is concerned with the role of humankind within God's created order. G. K. Chesterton, T. S. Eliot, J. R. R. Tolkien, and C. S. Lewis represent this tradition. They, and others like them, understood that technological progress with no clear telos obscures what Eliot called the permanent things. Surviving Technopolis means restoring the things closest to us--those old identity-forming institutions of home, church, and community.

**Power Quiz '17** Stilovsky,Schrödinger,2019-07-12 Many love a good quiz and fantasize about winning Millionaire. But even if it's only the local pub quiz evening, don't we often wish that we could do better? This book aims to improve your ability by presenting typical quiz information in a concise and easy-to-learn format.

**Just Work for All** Joshua Preiss, 2020-12-23 This is a book about the American Dream: how to understand this central principle of American public philosophy, the ways in which it is threatened by a number of winner-take-all economic trends, and how to make it a reality for workers and their families in the 21st century. Integrating political philosophy and the history of political thought with recent work in economics, political science, and sociology, this book calls for renewed political and policy commitment to “just work.” Such a commitment is essential to combat the negative moral externalities of an economy where the fruits of growth are increasingly claimed by a relatively small portion of the population: slower growth, rising inequality, declining absolute mobility, dying communities, the erosion of social solidarity, lack of faith in political leaders and institutions, exploding debt, ethnic and nationalist backlash, widespread hopelessness, and the rapid rise in what economists Angus Deaton and Anne Case call deaths of despair. Covid-19 threatens to pour gasoline on these winner-take-all fires, further concentrating economic and political power in the hands of those best suited to withstand (and even profit from) the pandemic-driven economic crisis. In this book, the author provides a model

for understanding the American Dream and making it a reality in a post-Covid-19 economy. A tour de force, this book is essential reading for scholars and researchers of political philosophy, political economy, political theory, and economics, as well as for the layperson trying to make sense of the post-pandemic world.

The Solid Age Henry Grenryk Ledesma, 2007-10-19 The American president and his allies are given a brutally stern order by the ultimate terrorist to bow to his whims - or Mary (the American president's daughter) will be sexually devastated and raped by him - live over worldwide television - courtesy of his palace . . . Grant Cameron - in the deep recesses of his discernment, delves into the divine intercession that once assisted him . . . because only GOD could save Mary now . . . but who would save us from the exploding and burning galactic walls of the whole universe, that in a week or two would now suddenly manifest the frightening reverse big bang! - the terrifying reverse universal explosion that would revert the whole universe back into its former solid state! - and all living creatures and things will be dead with it! . . .
