Dynamic Mode Decomposition J. Nathan Kutz, Steven L. Brunton, Bingni W. Brunton, Joshua L. Proctor, 2016-11-23 Data-driven dynamical systems is a burgeoning field?it connects how measurements of nonlinear dynamical systems and/or complex systems can be used with well-established methods in dynamical systems theory. This is a critically important new direction because the governing equations of many problems under consideration by practitioners in various scientific fields are not typically known. Thus, using data alone to help derive, in an optimal sense, the best dynamical system representation of a given application allows for important new insights. The recently developed dynamic mode decomposition (DMD) is an innovative tool for integrating data with dynamical systems theory. The DMD has deep connections with traditional dynamical systems theory and many recent innovations in compressed sensing and machine learning. *Dynamic Mode Decomposition: Data-Driven Modeling of Complex Systems*, the first book to address the DMD algorithm, presents a pedagogical and comprehensive approach to all aspects of DMD currently developed or under development; blends theoretical development, example codes, and applications to showcase the theory and its many innovations and uses; highlights the numerous innovations around the DMD algorithm and demonstrates its efficacy using example problems from engineering and the physical and biological sciences; and provides extensive MATLAB code, data

for intuitive examples of key methods, and graphical presentations.

Mixed-Mode Official Surveys Barry Schouten, Jan van den Brakel, Bart Buelens, Deirdre Giesen, Annemieke Luiten, Vivian Meertens, 2021-09-27 Mixed-mode surveys have become a standard at many statistical institutes. However, the introduction of multiple modes in one design goes with challenges to both methodology and logistics. Mode-specific representation and measurement differences become explicit and demand for solutions in data collection design, questionnaire design, and estimation. This is especially true when surveys are repeated and are input to long time series of official statistics. So how can statistical institutes deal with such changes? What are the origins of mode-specific error? And how can they be dealt with? In this book, the authors provide answers to these questions, and much more. Features Concise introduction to all the key elements of mixed-mode survey design and analysis Realistic official statistics examples from three general population surveys Suitable for survey managers and survey statisticians alike An overview of mode-specific representation and measurement errors and how to avoid, reduce and adjust them.

Single-Mode Fiber Optics Luc B. Jeunhomme, 2019-07-16 A basic, unified reference, rather than a description of the current experimental activity, presenting the scientific and engineering principles of single-mode optical fibers. It does, however, update discussions to reflect developments since the 1983 first edition, particularly those on international standards for fibres and measurement procedures, improvements in fibre attenuation control, fibre gyrometry, high-birefringence fibres, dispersion shifted and dispersion flattened fibres, connectors and splicing equipment, long distance terrestrial and undersea communication systems, and long distance

transmissions systems.

Spatio-Temporal Modeling and Device Optimization of Passively Mode-Locked Semiconductor Lasers Stefan Meinecke, 2022-03-26 This thesis investigates passively mode-locked semiconductor lasers by numerical methods. The understanding and optimization of such devices is crucial to the advancement of technologies such as optical data communication and dual comb spectroscopy. The focus of the thesis is therefore on the development of efficient numerical models, which are able both to perform larger parameter studies and to provide quantitative predictions. Along with that, visualization and evaluation techniques for the rich spatio-temporal laser dynamics are developed; these facilitate the physical interpretation of the observed features. The investigations in this thesis revolve around two specific semiconductor devices, namely a monolithically integrated three-section tapered quantum-dot laser and a V-shaped external cavity laser. In both cases, the simulations closely tie in with experimental results, which have been obtained in collaboration with the TU Darmstadt and the ETH Zurich. Based on the successful numerical reproduction of the experimental findings, the emission dynamics of both lasers can be understood in terms of the cavity geometry and the active medium dynamics. The latter, in particular, highlights the value of the developed simulation tools, since the fast charge-carrier dynamics are generally not experimentally accessible during mode-locking operation. Lastly, the numerical models are used to perform laser design explorations and thus to derive recommendations for further optimizations.

Sliding-Mode Control of PEM Fuel Cells Cristian Kunusch, Paul Puleston, Miguel Mayosky, 2012-01-15 Sliding-mode Control of PEM Fuel Cells demonstrates the application of higher-order sliding-mode control to PEMFC dynamics showing the advantages of sliding modes. The book introduces the theory of fuel cells and sliding-mode control. It contextualises PEMFCs both in terms of their development and within the hydrogen economy and today's energy production situation as a whole. It then discusses fuel-cell operation principles, the mathematical background of high-order sliding-mode control and to a feasibility study for the use of sliding modes in the control of an automotive fuel stack. Part II presents experimental results of sliding-mode-control application to laboratory fuel cells and deals with subsystem-based modelling, detailed design, and observability and controllability. Simulation results are contrasted with empirical data and performance, robustness and implementation issues are treated in depth. Possibilities for future research are also laid out.

Depeche Mode Serhiy Zhadan, 2018-01-01 In 1993, tragic turbulence takes over Ukraine in the post-communist spin-off. As if in somnambulism, Soviet war veterans and upstart businessmen listen to an American preacher of whose type there were plenty at the time in the post-Soviet territory. In Kharkiv, the young communist headquarters is now an advertising agency, and a youth radio station brings Western music, with Depeche Mode in the lead, into homes of ordinary people. In the middle of this craze three friends, an anti-Semitic Jew Dogg Pavlov, an unfortunate entrepreneur Vasia the Communist and the narrator Zhadan, nineteen years of age and unemployed, seek to find their old pal Sasha Carburetor to tell him that his step-father shot himself dead. Characters confront elements of their reality, and, tainted with traumatic

survival fever, embark on a sad, dramatic and a bit grotesque adventure.

The volume codifies all known theoretical references to mode, all modally ordered musical sources, and all modally cyclic compositions. For many music students and listeners, the language of the modes is a deep mystery, accustomed as we are to centuries of

modern harmony. Wiering demystifies the modal world, showing how composers and performers were able to use this structure to create compelling and beautiful works. Modes of Perceiving and Processing Information H. L. Pick, Jr., E. Saltzman, 2014-03-18 First published in 1978. Since World War II the field of

perception has developed in two major directions. The first evolved out of the traditional psychophysical approach and is manifest today in the new psychophysics. The second direction is in the increasing bond between the fields of perception and cognition. This volume grew out of the context of this second direction, a particular product of two workshops (held in the Spring of 1974 and 1975), organized by the Committee on Cognitive Research of the Social Science Research Council. The Committee on Cognition was organized in 1971 to encourage communication and interaction on specific problems in the area of cognition among the various social sciences.
