Visual Soil Evaluation Bruce C. Ball,Lars J. Munkholm,2015-10-23 Visual Soil Evaluation (VSE) provides land users and environmental authorities with the tools to assess soil quality for crop performance. This book describes the assessment of the various structural conditions of soil, especially after quality degradation such as compaction, erosion or organic matter loss. Covering a broad range of land types from abandoned peats to prime arable land, this useful handbook assesses yield potential across a range of scales. It also appraises the use of VSE in determining the potential of different land types for carbon storage, greenhouse gas emissions and nutrient

leaching, and for diagnosing and rectifying erosion and compaction in soils.

The International Commission on Mathematical Instruction, 1908-2008: People, Events, and Challenges in Mathematics Education Fulvia

Furinghetti, Livia Giacardi, 2023-01-30 The book presents the history of ICMI through a prosopographical approach. In other words, it pays a lot of attention to the actors of the International movement. The portraits of the members of the ICMI Central Committees (1908-1936) and ICMI Executive

Committees (1952-2008), and other eminent figures in ICMI history, who have passed away in the first 100 years of its life, are the guiding thread of the volume. Each portrait includes:

- Biographical information
- An outline of the various contributions made by the individual in question to the study of problems pertaining to mathematics teaching/education
- Primary bibliography
- Secondary with particular attention to the publications concerning the teaching of mathematics
- Images: photos, book frontispieces, relevant manuscripts

The authors of the portraits (30 altogether) are researchers in the history of mathematics, mathematics, and mathematics education. The focus on the officer's role within ICMI and on his/her contributions to mathematics education, make the portraits different from usual biographies. In particular, since most officers were active mathematicians, the portraits shed light on aspects of their lesser-known activity. Connecting chapters place the action of these figures in the historical context and in the different phases of ICMI history.

Re-Inventing Labour Law Enforcement Louise Munkholm, 2020-04-30 This monograph investigates current issues in labour law enforcement from a socio-legal perspective. It analyses how local Italian enforcement actors promote the protection of workers in Prato – a city that in recent decades has seen a significant influx of Chinese migrants who run small workshops as part of the local clothing industry. Many of the Chinese firms in Prato fail to live up to core labour standards, such as maximum working hours, health and safety at work and payment of social security contributions. The book analyses the strategies and practices employed by three local enforcement actors (labour inspectors, labour unionists and a new type of labour law consultant) in their efforts to assist Chinese firms in improving their level of labour law compliance. Combining documentary, interview and observational data, the book applies theories of legal culture and legal development to address the interaction between law and society. It focuses on the operational aspects of law by asking three interrelated research questions: How do local enforcement actors promote the protection of workers in Chinese firms in Prato? Which tools are employed, and which rationalities drive the initiatives? The book thereby sheds light upon processes of legal cultural adaptation, informing ongoing international and national debates about what can actually be done to combat contemporary gaps in the protection of workers.
