**Health Informatics: Building a Healthcare Future Through Trusted Information** IOS Press, 2012-07-11 A more trusted environment for the management and use of health information would undoubtedly help to consolidate and accelerate the use of health informatics solutions as change mechanisms to drive the establishment and adoption of new models of care, as well as new technology-oriented healthcare processes. This book presents 35 papers from the Australian National Health Informatics Conference (HIC 2012), held in Sydney, Australia, in July and August 2012. The theme of the conference is 'Health Informatics - Building a Healthcare Future Through Trusted Information', and emphasises the importance of assuring the integrity and security of health data and communications. The papers range from deeply theoretical to intensely practical, and address many elements of contemporary health informatics research endeavours, as well as peripheral, but related topics. Australian research, developments and implementations are at the forefront of e-health, and are the focus of much international attention. The Federal Government has invested in the building of a National Broadband Network, lead implementation sites, telehealth delivery and personally controlled electronic health records (PCEHR), launched 30 days before the conference. This book will

be of interest to clinicians, researchers, industry innovators and all those who share the desire to deliver better healthcare to all.

**Communicating in Hospital Emergency Departments** Diana Slade, Marie Manidis, Jeannette McGregor, Hermine Scheeres, Eloise Chandler, Jane Stein-Parbury, Roger Dunston, Maria Herke, Christian M.I.M. Matthiessen, 2015-04-28 This book was conceived in response to the increasing recognition of the central role of communication in effective healthcare delivery, particularly in high-stress contexts. Over a three-year period, the research team investigated communication between patients and clinicians in five representative emergency departments (EDs). The book describes the communicative complexity and intensity of work in the ED and identifies the features of successful patient-clinician interactions. Drawing on authentic examples of communication within the ED, the book provides comprehensive communication strategies for healthcare professionals that can be readily integrated into everyday practice. 'Professor Diana Slade and her colleagues have written an innovative and practical book on communication and relationships in emergency departments and their effects on the patient experience. Rarely does one find a book that so seamlessly translates research findings into practical action strategies. The book is an invaluable resource for the training of physicians, nurses, hospital administrators and others in healthcare.' - Elizabeth A. Rider, MSW, MD, FAAP, Department of Pediatrics, Harvard Medical School 'My participation in the UTS Emergency Communication project provided extraordinary insights into the complexities and subtleties of

communication encounters during a patient's emergency department journey. This project has made a lasting impact on my daily work, and I hope will improve emergency patient care into the future.' - Dr Nick Taylor, Emergency Medicine Specialist, The Canberra Hospital 'The captured clinical conversations between doctors, nurses and patients are fascinating... The discussion and conclusions provide a rare insight into an integral and critical component of Emergency Medicine practice. The team, led by Professor Slade, was truly unobtrusive, professional and personable.' - Dr Marian Lee, Emergency Physician, Director of Emergency Medicine Training

*So, You Want to Be a Medical Doctor, Eh.* Whiskers 24,2016-05-05 This article is written because of my experience during the last eighteen years since 1998 for the benefit of newcomers into the field of medical practice. Maybe you will have an entirely different experience, but knowledge of the potential pitfalls should be an advantage. I will make my rendition as factual as possible based on my experience and provide my point of view for balance or comment. My aim is to assist others in their choice before becoming completely, and irreversibly, involved as the road to success is long and hard. That is not to say that it is not rewarding on the principle of what is put in is closely related to what comes out. During my lifetime, I have had a wealth of pleasant experiences in dealing with my patients and staff, as well as the staff of hospitals at which I have worked. It is only during the last eighteen years that the intrusion of the medical boards and government authorities into my practice have had destructive and devastating effects such that I have not been permitted to practice for a lot of that time.

*A Fine Line* George C. Dertadian, 2018-09-15 Are painkillers mundane medications safe for use to ease human suffering? Or are they drugs of abuse that cause addiction and death? Do they ameliorate pain, or do they cause it? This book explores growing interest among medical practitioners media outlets about the 'misuse' or 'abuse' of pharmaceutical pain medications. It contextualizes these emerging discourses of pharmaceutical 'abuse' within the social and political histories from which they have emerged by exploring the role of pleasure and pain in shaping individualized modes of medication consumption in a neoliberal age of anxiety. The book is divided into two parts: the first addresses the discursive construction of painkiller (ab)use as articulated in research and policy accounts; the second part provides an empirical investigation that draws on the lived experience of those who engage in non-medical consumption. This book argues that, contrary to the stereotype of the 'seductive' drug that coaxes its user into a life of dysfunction, there appears to be an intimate relationship between the motivations of pleasure seeking, health practice and productive citizenship among people who use painkillers for non-medical reasons.
