History of the Expedition Under the Command of Lewis and Clark Meriwether Lewis,Elliott Coues,1893

The Organization and Architecture of Innovation Thomas Allen,Gunter Henn,2007-07-11 Building on his pioneering work on the management of technology and innovation in his first book, Managing the Flow of Technology, Thomas J. Allen of MIT has joined with award-winning German architect Gunter Henn of HENN Architekten to produce a book that explores the combined use of two management tools to make the innovation process most effective: organizational structure and physical space. They present research demonstrating how organizational structure and physical space each affect communication among people—in this case, engineers, scientists, and others in technical organizations—and they illustrate how organizations can transform both to increase the transfer of technical knowledge and maximize the “communication for inspiration” that is central to the innovation process. Allen and Henn illustrate their points with discussions of well-known buildings around the world, including Audi’s corporate headquarters, Steelcase’s corporate design center, and the Corning Glass Becker building, as well as several of Gunter Henn’s own projects, including the Skoda automotive factory in the Czech Republic and the Faculty for Mechanical Engineering at the Technical University of Munich. Allen and Henn then

demonstrate the principles developed in their work by discussing in detail one example in which organizational structure and physical space were combined successfully to promote innovation with impressive results: HENN Architekten's Project House for the BMW Group Research and Innovation Centre in Munich, cited by Business Week (April 24, 2006) in naming BMW one of the world's most innovative companies. Professor Thomas Allen is the originator of the Allen curve. In the late 1970s, Tom Allen undertook a project to determine how the distance between engineers' offices coincided with the level of regular technical communication between them. The results of that research, now known as the Allen Curve, revealed a distinct correlation between distance and frequency of communication (i.e. the more distance there is between people – 50 meters or more to be exact – the less they will communicate). This principle has been incorporated into forward-thinking commercial design ever since, in, for example, The Decker Engineering Building in New York, the Steelcase Corporate Development Center in Michigan, and BMW's Research Center in Germany.

Party Systems in Post-Soviet Countries A. Meleshevich, 2007-01-22 This book conducts a comparative analysis of political institutions and develops rigorous methods suitable for cross-national longitudinal analysis. An

examination of political party systems in Estonia, Latvia, Lithuania, Russia, and Ukraine shows striking differences of degrees and dynamics of political institutionalization in the five nations.

Privatizing the Public University Christopher C. Morphey, Peter D. Eckel, 2009-07-01 With public colleges and universities facing substantial budget cuts and increased calls for accountability, more institutions now rely on private revenue streams for support. As market-driven policies and behaviors become more commonplace, some cautious critics sound the alarm, while others watching the bottom line cheer. But which perspective gets it right? Does the privatization of public higher education threaten its very mission or support it? In this collection of essays, economists, policy makers, political scientists, sociologists, and organizational researchers discuss the impact of privatization from their respective disciplinary perspectives and assess its implications for the future of higher education. Privatization may bring additional funds and services that are free from government regulations and oversight, but does it also allow private interests to have undue influence over public higher education? Should public universities have to compete in the economic marketplace as vigorously as they do in the marketplace of ideas? What are the implications when institutions of higher learning function like businesses? With privatization now a reality for most public colleges and universities, an objective

examination of the issue from these diverse academic perspectives will be welcomed by those struggling with its challenges.

Age of Betrayal Jack Beatty, 2008-04-08 Age of Betrayal is a brilliant reconsideration of America's first Gilded Age, when war-born dreams of freedom and democracy died of their impossibility. Focusing on the alliance between government and railroads forged by bribes and campaign contributions, Jack Beatty details the corruption of American political culture that, in the

words of Rutherford B. Hayes, transformed “a government of the people, by the people, and for the people” into “a government by the corporations, of the corporations, and for the corporations.” A passionate, gripping, scandalous and sorrowing history of the triumph of wealth over commonwealth.
