Intelligent Systems and Applications W.C.-C. Chu,H.-C.

Chao,S.J.-H. Yang,2015-04-14 This book presents the proceedings of the International Computer Symposium 2014 (ICS 2014), held at Tunghai University, Taichung, Taiwan in December. ICS is a biennial symposium founded in 1973 and offers a platform for researchers, educators and professionals to exchange their discoveries and practices, to share research experiences and to discuss potential new trends in the ICT industry. Topics covered in the ICS 2014 workshops include: algorithms and computation theory; artificial intelligence and fuzzy systems; computer architecture, embedded systems, SoC and VLSI/EDA; cryptography and information security; databases, data mining, big data and information retrieval; mobile computing, wireless communications and vehicular technologies; software engineering and programming languages; healthcare and bioinformatics, among others. There was also a workshop on information technology innovation, industrial application and the Internet of Things. ICS is one of Taiwan's most prestigious international IT symposiums, and this book will be of interest to all those involved in the world of information technology.

Self-organization and Autonomic Informatics (I) Hans

Czap,2005 Self-organization and adaptation are concepts stemming from the nature and have been adopted in systems theory. This book provides in-depth thoughts about several methodologies and technologies for the area. It represents the future generation of IT systems, comprised of communication infrastructures and computing applications.

Linux Network Administrator's Guide Olaf Kirch,Terry

Dawson,2000 This introduction to networking on Linux now covers firewalls, including the use of ipchains and Netfilter, masquerading, and accounting. Other new topics in this second edition include Novell (NCP/IPX) support and INN (news administration).

Phillip Hughes Malcolm Knox,Peter Lalor,2015-11-11 Drawing

on almost 100 interviews and featuring scores of images from the Hughes family's personal collection, this is a stirring biography about the life of Phillip Hughes: son, brother, friend, farmer, cricketer, inspiration. Phillip Hughes gave his life to cricket. And cricket gave Phillip Hughes his life. When Hughes scored twin centuries in his second Test - the youngest man in cricket's 135-year history to achieve the feat - the world hailed the arrival of a brilliant new star. Here was a batting prodigy from a tiny country

town with a twinkle in his eye and a wizardry with the willow to fill the dreams of a generation. But those dreams were lost in November 2014 when Hughes was felled, playing the game he loved. Told through the voices of those who knew him best, Phillip Hughes: The Official Biography is the incredible story of the boy from Macksville who became Australian Test cricketer 408. It charts the folkloric rise of the banana grower's son with the axe-handle batting technique, reliving his adventures on and off the field and celebrating his many triumphs and travails. And it pays tribute to the fighting spirit and gift for friendship that made this unique young man a hero to millions.

Parapsychology Caroline Watt,2016-04-14 From premonitions to apparitions, spoon-bending to mind-reading, the paranormal has

bemused and mystified humans for millennia. In this Beginner's Guide, renowned author and scientist Dr Caroline Watt explores the evidence behind such phenomena. In the last one hundred years, parapsychologists have tried to determine whether it is possible to examine paranormal activity using scientific methods. Packed full of interesting characters, surprising incidents and novel experiments, this book takes the reader on a journey through this fascinating research. Parapsychology: A Beginner's Guide traces the history and evolution of parapsychology as a science, and provides a thorough and critical analysis of the research and evidence in the field today.

Jackson Pollack Claude Cernuschi, 2021-11-28 Designed to help students and interested general readers to interpret the abstract expressionist paintings of Jackson Pollock, this survey of Pollock's life and art provides insight into the origins and meanings of individual works and analyzes the influences upon Pollock. Also included are discussions of the many issues raised by Pollock's work above and beyond his intentions, and how they intersected with the work of his contemporaries as well as other intellectual currents of the time.

Ta Ra Fergie Pete Molyneux,2013-06-03 In December 1989, United fanatic Pete Molyneux raised a banner calling for Alex Ferguson's head, sparking the most famous protest in Old Trafford's 103 years. For manager and supporter alike it was their darkest hour. Pete never gave up on his team and, thank God, Fergie stayed. Ta Ra Fergie tells Pete's story of his time following United at home and abroad since 1963, attending over 2,000 matches. This is the story of United from a fan's perspective. It covers Busby's European triumph, the despair of relegation and the tortuous false dawns of the 1980s to that elusive title win and Alex Ferguson's twenty-six-year-reign. Watching United has brought countless thrills, but for Pete it has also had a darker side that led to heartache and tragedy.

Lifeline Shireen Jeejeebhoy,2007-10 Thirty-four-year-old Judy Taylor relished her simple, happy life. She had a loving husband, three young daughters, and a beautiful home. But after intestinal blood clots annihilated her digestive system, Judy was left with the certainty of starving to death in a cold Toronto hospital. The year was 1970, and most doctors still considered long-term intravenous feeding to be science fiction. As a last resort, Judy's surgeons turned to a radical young immigrant doctor who had performed

groundbreaking research on artificial feeding methods for humans. Together, Judy and Dr. Khursheed Jeejeebhoy agreed that Judy's only hope was to become a human test subject. For the next twenty years, Judy and Dr. Jeej worked to develop and hone the medical procedures for Total Parenteral Nutrition (TPN), which became the basis for modern intravenous feeding. With courage and determination, Judy raised her family and led a fulfilling life despite being the subject of experimental medicine. Lifeline tells her inspiring true story and intimately reveals the miraculous link between science and the resilience of the human spirit.

The New Informants Christopher Bollas, David Sundelson, 1995

The practice of observing therapeutic confidentiality is so riddled with exceptions that it has all but disappeared. This book lucidly describes the disappearance of privacy, showing how the clinical effect of this loss has been destructive and how mental health professionals may respond constructively. --The New England

Journal of Medicine The authors, a therapist and a lawyer, document the erosion of psychotherapist-patient confidentiality caused by the reporting laws, by the requirements of managed care, and by other features of the contemporary culture of disclosure. They analyze the failure of organized psychology, psychiatry, and social work to sound the alarm about such invasions, a failure especially perplexing in light of judicial sympathy for the psychotherapist-patient privilege. To the authors, psychotherapy without confidentiality is impossible. They propose important remedies for this clinical and ethical disaster.
