**SQL Server Backup and Restore** Shawn McGehee,2012 A database administrator's duties include ensuring that a database can be restored and recovered in the event of error or disaster. This book discusses how to perform backup and restore operations using SQL Server Management Studio (SSMS), basic T-SQL scripts and Red Gate's SQL Backup tool. Capturing backups using SSMS or simple scripts is fine for one-off backup operations, but any backups that form part of the recovery strategy for any given database must be automated with some built-in checks that, for example, alert the responsible database administrator immediately if a problem arises. The tool of choice in this book for backup automation is Red Gate SQL Backup. Building an automated solution will take a lot of work, but this book offers some advice on possible options, such as PowerShell scripting, T-SQL scripts and SQL Server Agent jobs. --

**Implementing Database Security and Auditing** Ron Ben Natan,2005-05-20 This book is about database

security and auditing. You will learn many methods and techniques that will be helpful in securing, monitoring and auditing database environments. It covers diverse topics that include all aspects of database security and auditing - including network security for databases, authentication and authorization issues, links and replication, database Trojans, etc. You will also learn of vulnerabilities and attacks that exist within various database environments or that have been used to attack databases (and that have since been fixed). These will often be explained to an “internals level. There are many sections which outline the “anatomy of an attack – before delving into the details of how to combat such an attack. Equally important, you will learn about the database auditing landscape – both from a business and regulatory requirements perspective as well as from a technical implementation perspective. \* Useful to the database administrator and/or security administrator - regardless of the precise database vendor (or vendors) that you are using within your organization. \* Has a large number of examples - examples that pertain to Oracle, SQL Server, DB2, Sybase and even MySQL.. \* Many of the techniques you will see in this book will never be described in a manual or a book that is devoted to a certain database product. \* Addressing complex issues must take into account more than just the database and focusing on capabilities that are provided only by the database vendor is not always enough. This book offers a broader view of the database environment - which is not dependent on the database platform - a view that is important to ensure good database security.

Landscape Interfaces Hannes Palang,G. Fry,2013-06-29 This book has been initiated by the workshop on Cultural heritage in changing landscapes, held during the IALE (International Association for Landscape Ecology) European Conference that started in Stockholm, Sweden, in June 2001 and continued across the

Baltic to Tartu, Estonia, in July. The papers presented at the workshop have been supported by invited contributions that address a wider range of the cultural heritage management issues and research interfaces required to study cultural landscapes. The book focuses on landscape interfaces. Both the ones we find out there in the landscape and the ones we face while doing research. We hope that this book helps if not to make use of these interfaces, then at least to map them and bridge some of the gaps between them. The editors wish to thank those people helping us to assemble this collection. First of all our gratitude goes to the authors who contributed to the book. We would like to thank Marc Antrop, Mats Widgren, Roland Gustavsson, Marion Potschin, Barbel Tress, Tiina Peil, Helen Soovali and Anu Printsmaan for their quick and helpful advice, opinions and comments during the different stages of editing. Helen Soovali and Anu Printsmaan together with Piret Pungas - thank you for technical help.

**Voices Cast Out to Talk Us In** Ed Roberson,1995-05 There is no one else like Ed Roberson—certainly there is no other poet like him. His is an oblique, eccentric, totally fascinating talent. Because of these qualities, it may seem that he is difficult to follow—as Ornette Coleman or Gabriel García Márquez or Romare Beardon seems difficult to track at times. But his strength of vision is always evident; the quickness and inclusiveness of his voice can sweep a reader along into new and refreshing areas. Roberson's

poetic moves are not tricks or affected traits. They are artistic and deeply considered techniques. Reading the two basic cycles of this elliptical and intriguing work could be likened to reading Ezra Pound or a more deliberate and lyrically touched Charles Olson, but with an unanchored allusiveness of things largely American taking the place of the Chinese and the Mayan. Roberson creates that rare combination of sophistication and simplicity which defines truly significant poetry. In this new work he makes the variety of our culture dance from his very special viewpoint.

Discrepant Engagement Nathaniel Mackey, 1993-09-24 Discrepant Engagement addresses work by black writers from the United States and the Caribbean and the so-called Black Mountain poets.

**Germany's Transient Pasts** Rudy J. Koshar, 2000-11-09 Over the course of the twentieth century, Germans have venerated and maintained a variety of historical buildings--from medieval fortresses and cathedrals to urban districts and nineteenth-century working-class housing. But the practice of historic preservation has sometimes proven controversial, as different groups of Germans have sought to use historical architecture to represent competing versions of their nation's history. Transient Pasts is the first book to examine the role that the historic preservation movement has played in German cultural history and memory from the end of the nineteenth century to the early 1970s. Focusing on key public debates over historic preservation, Rudy Koshar charts a trajectory of cultural politics in which historical architecture both facilitated and limited Germans' efforts to identify as a nation. He demonstrates that historical buildings and monuments have served as enduring symbols of national history in a country scarred by the traumas of two world wars, Nazism, the Holocaust, and political division. His findings challenge both the widely accepted argument that Germans have constantly repressed their past and the contention that Germany's intense public engagement with history since reunification is unprecedented.

**Debths** Susan Howe, 2017-06-27 The newest collection by one of America's most exciting poets A collection in five parts, Susan Howe's electrifying new book opens with a preface by the poet that lays out some of Debths' inspirations: the art of Paul Thek, the Isabella Stewart Gardner collection, and early American writings; and in it she also addresses memory's threads and galaxies, "the rule of remoteness,"

and “the luminous story surrounding all things noumenal.” Following the preface are four sections of poetry: “Titian Air Vent,” “Tom Tit Tot” (her newest collage poems), “Periscope,” and “Debths.” As always with Howe, Debths brings “a not-being-in-the-no.”

It embraces topics ranging from Walt Whitman’s interest in phrenology to the marginalization of African American experimental writing; from Kamau Brathwaite’s “calibanistic” language practices to Federico García Lorca’s flamenco aesthetic of duende and its continuing repercussions; from H. D.’s desert measure and coastal way of knowing to the altered spatial disposition of Miles Davis’s trumpet sound; from Robert Duncan’s serial poetics to diasporic syncretism; from the lyric poem’s present-day predicaments to gnosticism. Offering illuminating commentary on these and other artists including Amiri Baraka, Mississippi Fred McDowell, Wilson Harris, Jack Spicer, John Coltrane, Jay Wright, and Bob Kaufman, Paracritical Hinge also sheds light on Mackey’s own work as a poet, fiction writer, and editor.
