Challenges and Issues in Knowledge Management Anthony F. Buono,Flemming Poulfelt,2005-09-01 Challenges and Issues in Knowledge Management – the fifth volume in the Research on Management Consulting series – presents sixteen chapters that explore these various perspectives, focusing on knowledge management within the context of the management consulting industry, the dynamics associated with knowledge sharing and dissemination, methodological approaches to studying knowledge in organizations, and reflections on knowledge management and management consulting. As the chapters underscore, it is important to ensure that KM initiatives are aligned with the needs of the organization and its members, that the KM system is “owned” by organizational members with particular emphasis on executive sponsorship and team member acceptance, and that it be understood as an ongoing process rather than simply another management objective or faddish consulting tool. The focus, therefore, should be on how knowledge processes can be facilitated, leveraged and utilized in organizational value creation.

Reconstructing Biblical Dead Sea Scrolls Edward Herbert,2018-11-26 The first part of the book develops a battery of scientifically based tools to aid the reconstruction of biblical Dead Sea Scrolls, which, when applied together, substantially improve the quality of reconstruction attainable. The focus then moves to the important non-masoretic but fragmentary biblical scroll, 4QSama, for which sixty-two new fragment identifications and an analysis of the character of the scroll are presented. Based upon this, a detailed reconstruction of the 4QSama fragments of 2 Samuel is undertaken, revealing 55% more deviations from the Masoretic text than had previously been identified. The effectiveness of the new method is thus demonstrated. Data concerning the support of key Hebrew and Greek witnesses provides a valuable foundation for the study of the history and development of the biblical text.

Textual and Literary Criticism of the Books of Kings Julio Treballe Barrera,2020-06-08 This volume contains a collection of Julio Treballe’s papers on textual and compositional history of 1-2 Kings, via Septuagint, Old Latin. His research is a key contribution to the landscape of textual plurality in the history of the Bible.

Variational Analysis with Applications in Optimisation and Control Savin Treanță,2019-08-01 This book focuses on the calculus of variations and related applications which combine tools and methods from partial differential equations with geometrical techniques. More precisely, it is devoted to nonlinear problems coming from different areas, with particular reference to those introducing new techniques capable of solving a wide range of problems. It provides the latest developments in multidimensional optimization and optimal control. With various examples and applications to complement and substantiate mathematical developments, the text is a valuable guide for researchers, engineers and students in the field of mathematics, and those working in operations research, optimal control science, artificial intelligence, management science and economics.
