Silent Sky Lauren Gunderson, 2015-01-01 THE STORY: When Henrietta Leavitt begins work at the Harvard Observatory in the early 1900s, she isn't allowed to touch a telescope or express an original idea. Instead, she joins a group of women "computers," charting the stars for a renowned astronomer who calculates projects in "girl hours" and has no time for the women's probing theories. As Henrietta, in her free time, attempts to measure the light and distance of stars, she must also take measure of her life on Earth, trying to balance her dedication to science with family obligations and the possibility of love. The true story of 19th-century astronomer Henrietta Leavitt explores a woman's place in society during a time of immense scientific discoveries, when women's ideas were dismissed until men claimed credit for them. Social progress, like scientific progress, can be hard to see when one is trapped among earthly complications; Henrietta Leavitt and her female peers believe in both, and their dedication changed the way we understand both the heavens and Earth.

The Sky's Larger Frame Randall Compton, 2019-07-01 This three-part volume sounds out a cycle that delights in creation, despairs over evil, and longs for restoration. Tracing life's dualities, these poems press together faith and uncertainty, love and loss, dream and waking, depression and exuberance. Locating humanity between the immense and the slight, *The Sky's Larger Frame* explores the world as a construction site in which God both reveals and conceals the scaffolds of his presence.

The Sky's the Limit Angie Belcher, New Zealand. Learning Media, 1999 Having no legs didn't stop Tony Christiansen from climbing trees, racing go-karts or being a surf club life saver. His answer? It's not what happens to you that counts, it's what you do about it. Suggested level: primary.

Stir-Frying to the Sky's Edge Grace Young, 2010-05-04 Winner of the 2011 James Beard Foundation Award for International Cooking, this is the authoritative guide to stir-frying: the cooking technique that makes less seem like more, extends small amounts of food to feed many, and makes ingredients their most tender and delicious. The stir-fry is all things: refined, improvisational, adaptable, and inventive. The technique and tradition of stir-frying, which is at once simple yet subtly complex, is as vital today as it has been for hundreds of years—and is the key to quick and tasty meals. In *Stir-Frying to the Sky's Edge*, award-winning author Grace Young shares more than 100 classic stir-fry recipes that sizzle with heat and pop with flavor, from the great Cantonese stir-fry masters to the culinary customs of Sichuan, Hunan, Shanghai, Beijing, Fujian, Hong Kong, Macau, Taiwan, Singapore, and Malaysia, as well as other countries around the world. With more than eighty stunning full-color photographs, Young's definitive work illustrates the innumerable, easy-to-learn possibilities the technique offers—dry stir-fries, moist stir-fries, clear stir-fries, velvet stir-fries—and weaves the insights of Chinese cooking philosophy into the preparation of beloved dishes as Kung Pao Chicken, Stir-Fried Beef and Broccoli, Chicken Lo Mein with Ginger Mushrooms, and Dry-Fried Sichuan Beans.

Wonders in the Sky Jacques Vallee, Chris Aubeck, 2010-10-28 One of the most ambitious works

of paranormal investigation of our time, here is an unprecedented compendium of pre-twentieth-century UFO accounts, written with rigor and color by two of today's leading investigators of unexplained phenomena. In the past century, individuals, newspapers, and military agencies have recorded thousands of UFO incidents, giving rise to much speculation about flying saucers, visitors from other planets, and alien abductions. Yet the extraterrestrial phenomenon did not begin in the present era. Far from it. The authors of *Wonders in the Sky* reveal a thread of vividly rendered-and sometimes strikingly similar- reports of mysterious aerial phenomena from antiquity through the modern age. These accounts often share definite physical features- such as the heat felt and described by witnesses-that have not changed much over the centuries. Indeed, such similarities between ancient and modern sightings are the rule rather than the exception. In *Wonders in the Sky*, respected researchers Jacques Vallee and Chris Aubeck examine more than 500 selected reports of sightings from biblical-age antiquity through the year 1879-the point at which the Industrial Revolution deeply changed the nature of human society, and the skies began to open to airplanes, dirigibles, rockets, and other opportunities for misinterpretation represented by military prototypes. Using vivid and engaging case studies, and more than seventy-five illustrations, they reveal that unidentified flying objects have had a major impact not only on popular culture but on our history, on our religion, and on the models of the world humanity has formed from deepest antiquity. Sure to become a classic among UFO enthusiasts and other followers of unexplained phenomena, *Wonders in the Sky* is the most ambitious, broad-reaching, and intelligent analysis ever written on premodern aerial mysteries.

The Sky Weeps with Us Jane Winshield, 2016-05-10 Sonto Kalzoy is the opposite of fearless. Plastered with the title Son of the Rebels, everyone despises him and his older sister. But slowly, he

begins to notice that he is not the only person on the gloomy island of Tonkono that is mistreated for selfish reasons. And when his best friend is imprisoned because of a genius with eyes of fire, he realizes that this is his time to face his fears and make a difference. As one of the few people who still believe that light can fill the gray sky once again, Sonto embarks on a journey to save his people, and perhaps himself, too. But will he make it in time to meet the Sun?

The Girl Who Fell from the Sky Heidi W. Durrow, 2010-02-16 This debut novel tells the story of Rachel, the daughter of a Danish mother and a black G.I. who becomes the sole survivor of a family tragedy. With her strict African American grandmother as her new guardian, Rachel moves to a mostly black community, where her light brown skin, blue eyes, and beauty bring mixed attention her way. Growing up in the 1980s, she learns to swallow her overwhelming grief and confronts her identity as a biracial young woman in a world that wants to see her as either black or white. In the tradition of Jamaica Kincaid's *Annie John* and Toni Morrison's *The Bluest Eye*, here is a portrait of a young girl and society's ideas of race, class, and beauty. It is the winner of the Bellwether Prize for best fiction manuscript addressing issues of social justice.

The Ever-Changing Sky James B. Kaler, 2002-03-14 The *Ever-Changing Sky* provides a comprehensive and non-mathematical guide to spherical astronomy. The reader is guided through terrestrial and celestial co-ordinate systems, time measurement and celestial navigation, to the prediction of the rising and setting of the stars, Sun and Moon. It focuses on the geometrical aspects of the night sky without using complex trigonometry. The book progresses to a general study of the Earth and sky, including the stars and constellations (with useful star maps provided), the motions and appearance of the Moon, tides and eclipses, the orbits of the planets and the smaller bodies of the Solar System (asteroids, meteors, meteorites and comets). Finally, there is a brief overview of

atmospheric phenomena (including rainbows and haloes). This text will be invaluable to students taking courses in naked-eye astronomy, amateur and professional astronomers, as well as more general readers wanting to know how the night sky changes.

A Home in the Sky Olivia Snowe, 2013-07 Jack trades his bike for a handful of beans that grow into a huge vine, stretching into the sky.

The Map of the Sky Félix J. Palma, 2012-09-04 The fate of the earth hangs in the balance as H.G. Wells' *The War of the Worlds* is transformed from the work of one writer's imagination into a terrifying reality for all mankind. 1898. New York socialite Emma Harlow agrees to marry well-to-do Montgomery Gilmore, but only if he first accepts her audacious challenge: to reproduce the Martian invasion featured in H. G. Wells's popular novel *The War of the Worlds*. Meanwhile in London, Wells himself is unexpectedly made privy to certain objects, apparently of extraterrestrial origin, that were discovered decades earlier on an ill-fated expedition to the Antarctic. On that same expedition was an American crew member named Edgar Allan Poe, whose inexplicable experiences in the frozen wasteland would ultimately inspire him to create one of his most enduring works of literature. When eerie, alien-looking cylinders begin appearing in London, Wells is certain it is all part of some elaborate hoax. But soon, to his great horror, he realizes that a true invasion of Earth has indeed begun. As brave bands of citizens converge on a crumbling London to defend it against utter ruin, Emma and her suitor must confront the enigma that is their love, a bright spark of hope even against the darkening light of apocalypse. Palma dazzled readers with his instant New York Times bestseller *The Map of Time*. In *The Map of the Sky*, he embarks on an even more thrilling speculative journey, one that links the earth and the heavens, the familiar and the bizarre, the impossible and the inevitable.
