The Routledge Companion to Photography Theory Mark Durden, Jane Tormey, 2019-11-07 With newly commissioned essays by some of the leading writers on photography today, this companion tackles some of the most pressing questions about photography theory's direction, relevance, and purpose. This book shows how digital technologies and global dissemination have radically advanced the pluralism of photographic meaning and fundamentally transformed photography theory. Having assimilated the histories of semiotic analysis and post-structural theory, critiques of representation continue to move away from the notion of original and copy and towards materiality, process, and the interdisciplinary. The implications of what it means to 'see' an image is now understood to encompass, not only the optical, but the conceptual, ethical, and haptic experience of encountering an image. The 'fractal' is now used to theorize the new condition of photography as an algorithmic medium and leads us to reposition our relationship to photographs and lend nuances to what essentially underlies any photography theory – that is, the relationship of the image to the real world and how we conceive what that means. Diverse in its scope and themes, *The Routledge Companion to Photography Theory* is an indispensable collection of essays and interviews for students, researchers, and teachers. The volume also features extensive images, including beautiful colour plates of key photographs.

Getting Garbo Jerry Ludwig,2004-09-01 Set in the glamorous, cruel and often bizarre Hollywood era of the 1950s, Getting Garbo is a hilarious and suspenseful novel of the cinema's Golden Age, when autograph hounds were relentless as they sought the names of stars who became legends in their own lifetime. Nineteen-year-old Reva Hess is a charming autograph collector and the number one fan of Roy Darnell, star of the hit TV series Jack Havoc. Reva follows him everywhere, while keeping tabs on the private lives of film celebrities with her group of expert autograph collectors called The Secret Six. Soon, the slight confusion between Roy's own personality and the dashing dangerous Jack Havoc becomes an ominous obsession and the novel turns to murder. Along the way, Jerry Ludwig brings the old Hollywood to life, evoking the giant screen figures of Humphrey Bogart, Burt Lancaster, Grace Kelly, Frank Sinatra and dozens more, as well as the off-screen

ruthlessness of Jack Warner. This is a world where getting Garbo, the elusive Greta who never signs autographs, is synonymous with the yearning for the impossible, the longing for fame and romance and the blurring of fiction and reality.

Perception and Metaphor Qin Xiugui, Tie Yi, 2021-07-28 Cognitive linguists believe that metaphors are prevalent in human thought, while metaphorical structures are reflected at the linguistic level. Therefore, analysing extensive language data can aid in revealing the metaphorical mappings of

embodied experience with the senses of vision, hearing, smell, taste, touch, and temperature. This volume seeks to discover the similarities and differences between the metaphorical systems of the English and Chinese languages. Adopting a comparative view, the authors examine the semantic extensions of perception words in English and Chinese, in order to reveal the metaphorical scope of each sense and the metaphorical system behind it. They argue that the metaphorical systems of the senses not only help us understand and use conventionalised metaphorical expressions but also allow us to create novel expressions. The findings also unveil how abstract concepts are constructed via cognitive mechanisms, such as image schema and metaphor. This title is a useful reference for scholars and students who are interested in cognitive linguistics, comparative linguistics, and the philosophy of language.

Supergatory Patrick M. Robbins,2014-09-09 In a distant corner of the cosmos, on an advanced planet known as Newel, a hero is created using super science. This hero is named Gar-A and his destiny is driven by a freak occurrence with a black hole. He finds himself seemingly stranded on a distant planet called Earth, a strange place that exists in a parallel dimension away from his home world. Newelians look like humans, but this is where the similarities end. Made of an incredibly dense molecular structure, they are gifted with incredible strength and durability. Their superior mental capacities and half-millennium life span make them astonishingly

powerful. On Earth, Gar-A becomes known as Major Alpha, the premier costumed hero of his age. He follows his heart, and soon, he and his human wife, Kate, build a life and family together. Their son, Mik, lives a life most fanboys can only dream of in their four-color fantasies. Mik, considered a “power-normal”, dreams of glory as he strives to make the most of his small portion of Newelian abilities. A tragic first outing opens young Mik’s eyes to a series of revelations about his father’s legacy, as his dream of being a superhero becomes a twisted nightmare. If he is to realize his fate, Mik must find the courage to escape the dark shadow of his father. As he makes new allies and enemies, he finds himself forced to pursue his own path toward a greater destiny.
