The Use of Force for State Power Michael Warner, John Childress, 2020-06-22 This book studies force, the coercive application of power against resistance, building from Thomas Hobbes' observation that all self-contained political orders have some ultimate authority that uses force to both dispense justice and to defend the polity against its enemies. This cross-disciplinary analysis finds that rulers concentrate force through cooperation, conveyance, and comprehension, applying common principles across history. Those ways aim to keep foes from concerting their actions, or by eliminating the trust that should bind them. In short, they make enemies afraid to cooperate, and now they are doing so in cyberspace as well.

Freedoms Delayed Timur Kuran, 2023-07-20 According to diverse indices of political performance, the Middle East is the world's least free region. Some believe that it is Islam that hinders liberalization. Others retort that Islam cannot be a factor because the region is no longer governed under Islamic law. This book by Timur Kuran, author of the influential Long Divergence, explores the lasting political effects of the Middle East's lengthy exposure to Islamic law. It identifies several channels through which Islamic institutions, both defunct and still active, have limited the expansion of basic freedoms under political regimes of all stripes: secular dictatorships, electoral democracies, monarchies legitimated through Islam, and theocracies. Kuran suggests that Islam's rich history carries within it the seeds of liberalization on many fronts; and that the Middle East has already established certain prerequisites for a liberal order. But there is no quick fix for the region's prevailing record of human freedoms.

Cultural Politics of Gender and Sexuality in Contemporary Asia Tiantian Zheng, 2016-02-29 In globalizing Asia, sexual mores and gender roles are in constant flux. How have economic shifts and social changes altered and reconfigured the cultural meanings of gender and sexuality in the region? How have the changing political economy and social milieu influenced and shaped the inner workings and micro-politics of family structure, gender relationships, intimate romance, transactional sex, and sexual behaviors? This volume offers up-to-date, grounded, critical analysis of the complex intersections of gender, sexuality, and political economy across a diverse array of Asian societies: China, Japan, Cambodia, Vietnam, India, Pakistan, Hong Kong, Thailand, and Taiwan. Based on intense ethnographic fieldwork, the chapters disentangle the ways in which gendered and sexual experiences are impinged upon by state policies, economic realities, cultural ideologies, and social hierarchies. Whether highlighting intimate relationships between elite businessmen and their mistresses in China; nightclub performances by Thai men in Bangkok; single women's views of romance, motherhood, and marriage in Hong Kong, Shanghai, and Tokyo; or male same-sex relationships in Pakistan—each chapter centers around the stories of the gendered subjects themselves and how they are shaped by outside forces. Taken together they provide a provocative entrée into the cultural politics of gender and sexuality in Asia. By foregrounding cross-cultural ethnographic research, this volume sheds light on how configurations of gender and sexuality are constituted, negotiated, contested, transformed, and at times, perpetuated and reproduced in private, intimate experiences. It will be of particular interest to students and scholars in anthropology, sociology, political science, and women's and LGBTQ studies.

Chinese Business in the Making of a Malay State, 1882-1941 Wu Xiao An, 2003-12-08 This book examines how Chinese family and business networks, focused around activities such as revenue farming, including opium, the rice trade, and pawnbroking, and related legal and labour organization activities, were highly influential in the process of state formation in Malaya. It shows how Chinese family and business networks were flexible and dynamic, and were closely interlocked with economic and social structures, around which government, and states, developed. It considers the crucial role of wealth and power in the process of state formation, and challenges accepted views of Chinese ethnicity and migration.
