The Transnational Middle East Leïla Vignal, 2016-10-04 The Middle East has been undergoing new crises since the powerful socio-political uprisings known as the Arab Spring took place in several countries in 2011. Some countries are experiencing a long-term collapse of their political and social structures out of internal conflicts and external interventions. The Transnational Middle East posits that, in the Middle East, the development of regional dynamics, of processes and circulations of all kinds, can be documented. In this regard, the approaches it develops – 'bottom-up' regionalisation, 'globalisation from below' – allow for a better understanding of the ways in which the Middle East is part of global transformations. The book analyses how, through their practices, Middle East societies elaborate a regional space which is not institutionalised. Based on fieldwork in the Middle East, the book provides venues for further theoretical elaboration on globalisation and contemporary societies, as well as on processes of regionalisation. It draws on the emergence of genuine regional spaces of culture, art, economic activity, human circulation – which supplement and do not contradict other infra-national, national, or global social processes. As in other areas of the world, these transformations are to a large extent the mode of the Middle East's insertion into globalisation. In this respect, they go against standard narratives of the supposed 'exceptionalism' of the region. This book will be a great contribution to comparative politics, Middle

Eastern studies, globalisation and international relations.

Street Art in the Middle East Sabrina de Turk, 2019-06-27 Since the 2011 Arab Spring street art has been a vehicle for political discourse in the Middle East, and has generated much discussion in both the popular media and academia. Yet, this conversation has generalised street art and identified it as a singular form with identical styles and objectives throughout the region. Street art's purpose is, however, defined by the socio-cultural circumstances of its production. Middle Eastern artists thus adopt distinctive methods in creating their individual work and responding to their individual environments. Here, in this new book, Sabrina De Turk employs rigorous visual analysis to explore the diversity of Middle Eastern street art and uses case studies of countries as varied as Egypt, Tunisia, Lebanon, Palestine, Bahrain and Oman to illustrate how geographic specifics impact upon its function and aesthetic. Her book will be of significant interest to scholars specialising in art from the

Middle East and North Africa and those who bring an interdisciplinary perspective to Middle East studies.

Rethinking Suburbs Khaled Alawadi,2024-04-11 Rethinking suburbs provides answers to how can we design and plan neighborhoods in which non-motorized mobility is a viable and efficient alternative; and how the street systems and alleys of neighborhoods can be designed and retrofitted to make their urban fabrics more efficient and integrated. Streets play significant roles in meeting multiple sustainability objectives. This research addresses Abu Dhabi's and Dubai's street connectivity at the neighborhood (local) and city (global) scales. It focuses on two parameters of street network analysis: efficiency and centrality. Efficiency is evaluated in terms of directness, noting that network designs that provide short and direct access between origins and destinations are more efficient. Centrality is evaluated using graph theory metrics that enable the identification of high- and low-accessibility locations within networks. The conventional suburban model of low-density, automobile-centric development with fragmented streets cannot foster high levels of accessibility within neighborhoods. This study offers an alternative, evidence-based suburban design model for future cities.

Translating the City Hossam Aldy, Yves Pedrazzini, Stéphanie Vincent-Geslin, Yafiza Zorro, 2016-12-05 The city is a highly fragmented, heterogeneous subject; those who study, analyze and question it make a use of a variety of disciplines and methods and have different areas of expertise. How is a dialogue built between heterogeneous urban contexts and urban researchers, architects, developers, anthropologists, sociologists and political scientists? What capacity do concepts and methods have to travel from one context to another? How can they be transferred? The strength of *Urban Translations* lies in its disciplinary and geographical comparison and dialogue on a global scale. It openly targets an international audience, bringing together leading researchers from a variety of disciplines (urban planning, sociology, architecture and anthropology) and presenting case studies from highly contrasting urban settings, including Rio de Janeiro, Mumbai, Cape Town, Dubai, Montreal, Geneva, Lisbon, Ljubljana and Berlin.

Exit Plan Mike Sixsmith, 2013-01-19 Bill Sloan, a former British Army intelligence officer and Shahid Al Sheehi, the son of a Pakistani British immigrant are caught up in a breathtakingly ambitious plan for a small Middle Eastern Emirate to seize regional power by acquiring weapons of mass destruction. The destinies of Sloan and Al Sheehi are irrevocably entwined. This novel draws the reader into a realm of political intrigue, characterized by thwarted terrorist plots, international duplicity, and a host of anxious preoccupations including the threat of WMDs. Incredibly timely, as these issues still continue to feature in contemporary headlines, this work acts to set our current perceptions of such issues in context. Well-developed characters populate the pages, living very different lives but influenced by similar factors; a writer in command of his subject matter details their parallel agendas and overlapping imperatives with ease. Informed by his own personal experiences, this novel has a real feel of authenticity, offering an unrivalled insight into the Middle Eastern tensions, which have simmered over the past thirty years, and seeking to illuminate the paradoxes and oppositions of lives ensnared in such realities.

With the help of case studies and surveys this book explores the economic and political forces driving Dubai's urban growth, its changing urbanity and its place within the global city network. Dubai Pranay Gupte, 2011 In just two decades, Dubai has reinvented itself from a small, poor and quiet fishing village to a dazzling city with a vibrant urban life. How did this happen? Home to more than 200 nationalities particularly those from the Indian subcontinent the emirate's choice to welcome expatriates has paid off. Cultivating an open and welcoming culture, Dubai manages to attract people from all over the world, heartily embracing any entrepreneurial contribution they wish to make. The emirate is now also known for its cosmopolitan melting-pot culture, and its enabling environment to conduct business, and this, along with the tax-free system and hassle-free infrastructure, makes it a much sought-after site for multinational enterprises who want a base in Asia. Unlike the Gulf emirates that can count on petroleum wealth, Dubai has wound its way to prosperity by planning carefully and executing those plans methodically. Its airline and luxury construction have made it a

popular destination for luxury tourism. Projects like the Burj al-Arab, the Palm Jumeriah and the Burj Khalifa, along with events like the world's richest horserace the Dubai World Cup and the Dubai Shopping Festival, have sustained tourist interest and focused the world's attention on the emirate.
