Upgrade Blake Crouch, 2022-07-12 NEW YORK TIMES BESTSELLER • “If Michael Crichton had written a superhero novel, it would look a lot like Upgrade.”—The New York Times Book Review “You don’t so much sympathize with the main character as live inside his skin.”—DIANA GABALDON, #1 New York Times bestselling author of the Outlander series “Mysterious, fascinating, and deeply moving—exploring the very nature of what it means to be human.”—ALEX MICHAELIDES, #1 New York Times bestselling author of The Silent Patient and The Maiden ONE OF THE BEST BOOKS OF THE YEAR: Time, She Reads The mind-blowing new thriller from the New York Times bestselling author of Dark Matter and Recursion—currently in development as a motion picture at Steven Spielberg’s Amblin Partners “You are the next step in human evolution.” At first, Logan Ramsay isn’t sure if anything’s different. He just feels a little . . . sharper. Better able to concentrate. Better at multitasking. Reading a bit faster, memorizing better, needing less sleep. But before long, he can’t deny it: Something’s happening to his brain. To his body. He’s starting to see the world, and those around him—even those he loves most—in whole new ways. The truth is, Logan’s genome has been hacked. And there’s a reason he’s been targeted for this upgrade. A reason that goes back decades to the darkest part of his past, and a horrific family legacy. Worse still, what’s happening to him is just the first step in a much larger plan, one that will inflict the same changes on humanity at large—at a terrifying cost. Because of his new abilities, Logan’s the one person in the world capable of stopping what’s been set in motion. But to have a chance at winning this war, he’ll have to become something other than himself. Maybe even something other than human. And even as he’s fighting, he can’t help wondering: what if humanity’s only hope for a future really does lie in engineering our own evolution? Intimate in scale yet epic in scope, Upgrade is an intricately plotted, lightning-fast tale that charts one man’s thrilling transformation, even as it asks us to ponder the limits of our humanity—and our boundless potential.

Local Dynamics of Industrial Upgrading Yi Liu, 2020-04-27 This book examines industrial upgrading in China’s Pearl River Delta (PRD), with a specific focus on how strategic coupling impacts industrial upgrading from the perspective of relational economic geography. It shows that firms in the PRD have been struggling after serving as low-tier suppliers and subcontractors for transnational corporations for two decades, since the 1980s opening reform in China. Indigenous innovation and direct state support have fostered the success of a few firms, but not the majority. In response, many local firms are now taking advantage of the opportunities to be found in global production networks, which link the PRD with the global economy. This book elaborates on how these opportunities are

embedded and identified in global production networks with regard to different types of strategic coupling. It not only renews the theory of strategic coupling in economic geography, but also demonstrates potential strategies that latecomer firms can pursue, and which can have major implications for many developing countries and regions.

Urban Innovation and Upgrading in China Shanty Towns Pengfei Ni,Banji Oyeyinka,Fei Chen,2014-08-21 By using field survey and World Bank investment project evaluation method, this book investigates the experience of slum rebuilding in Liaoning province, China. It figures out that the experience of Liaoning province is relatively successful and can be of great significance for developing countries and regions. The issue of slums is a huge challenge in the process of global urbanization. The population living in slums is 0.8 billion worldwide and the number is still growing. International organizations (e.g., the World Bank) and relevant countries have been working on the rebuilding of slums but only a few succeeded. In recent years, since some scholars believe that government should play dominant role in slums rebuilding, Liaoning province has developed a systematical model in slums rebuilding from 2005. This model emphasizes the guidance of government, market functions and society involvement. With the application of the new model, Liaoning province has improved 2.11 million people’s living conditions from 2005 to 2010. By introducing the conditions, history, rebuilding process and rebuilding methods of Liaoning slums, this book provides new information and data for slum rebuilding decision makers and researchers.
