Rethinking the Decline of China's Qing Dynasty Daniel McMahon,2014-08-21

The many instances of regional insurgency and unrest that erupted on China's borderlands at the turn of the nineteenth century are often regarded by scholars as evidence of government disability and the incipient decline of the imperial Qing dynasty. This book, based on extensive original research, argues that, on the contrary, the response of the imperial government went well beyond pacification and reconstruction, and demonstrates that the imperial political culture was dynamic, innovative and capable of confronting contemporary challenges. The author highlights in particular the Jiaqing Reforms of 1799, which enabled national reformist ideology, activist-oriented administrative education, the development of specialised frontier officials, comprehensive borderland rehabilitation, and the sharing of borderland administration best practice between different regions. Overall, the book shows that the Qing regime had sustained vigour, albeit in difficult and changing circumstances.

Baoan martial arts novels: Old Capital Intrigue Baoan Liu, Negotiating Rural Land Ownership in Southwest China Yi Wu, 2016-08-31 Negotiating Rural Land Ownership in Southwest China offers the first comprehensive analysis of how China's current system of land ownership has evolved over the past six decades. Based on extended fieldwork in Yunnan Province, the author explores how the three major rural actors—local governments, village communities, and rural households—have contested and negotiated land rights at the grassroots level, thereby transforming the structure of rural land ownership in the People's Republic of China. At least two million rural settlements (or “natural villages”) are estimated to exist in China today. Formed spontaneously out of settlement choices over extended periods of time, these rural settlements are fundamentally different from the present-day administrative villages imposed by the government from above. Yi Wu's historical ethnography sheds light on such “natural villages” and their role in shaping the current land ownership system. Drawing on local land disputes, archival documents, and rich local histories, the author unveils their enduring social identities in both the Maoist and reform eras. She pioneers the concept of “bounded collectivism” to describe what resulted from struggles between the Chinese state trying to establish collective land ownership, and rural settlements seeking exclusive control over land resources within their traditional borders. A particular contribution of this book is that it provides a nuanced understanding of how and why China's rural land ownership is changing in post-Mao China. Yi Wu uses village-level data to show how local governments, rural communities, and rural households

compete for use, income, and transfer rights in both agricultural production and the land market. She demonstrates that the current rural land ownership system in China is not a static system imposed by the state from above, but a constantly changing hybrid.

Power and Justice Xudong Zhao, 2019-04-10 This book discusses the relationship, interaction and conflict between everyday life and various institutions in a specific village in North China, with a focus on the formal and informal legal systems. It vividly describes the village's "legal construction problems" as well as the customs and laws, and such it can be seen as a historical and innovative comment on China's problems. The book is based on the author's field investigations assessing vast amounts of material concerning local organizations, formal and informal authorities, economic exchange, religious rituals, as well as interviews with villagers and numerous court files. It presents an in-depth exploration of "pluralism of authority" in China's rural society, and examines how various authorities were formed. It also summarizes how various local disputes are resolved and discusses the villagers' understanding of the concept of "justice." Lastly, it suggests ways in which national law and local customs could communicate and collaborate.
