The Use and Development of the Xinkan Languages Chris Rogers, 2016-06-28 Once spoken only in Santa Rosa Department, Guatemala, the Xinkan language family is unique within Mesoamerica, comprising four closely related languages that are unrelated to any of the other language groups used within the region. Descriptions of Xinkan date to 1770 but are typically only sketches or partial word lists. Not even the community of indigenous people who identify as Xinka today—the last speakers—have had access to a reliable descriptive source on their ancestral tongue. Preserving this endangered communication system in accurate, thorough detail, *The Use and Development of the Xinkan Languages* presents a historical framework, internal classifications, and both synchronic and diachronic descriptions, incorporating all elements of grammar based on extensive unpublished data collected in the 1970s by Lyle Campbell and Terrence Kaufman. This valuable contribution is enhanced by author Chris Rogers's emphasis on contextualizing the findings. Introducing the languages, Rogers presents important information regarding the social and cultural milieu of the speakers. He also traces a phonological reconstruction of Proto-Xinkan and reconstructs historical morphology and syntax. These revelations are of particular interest because the development of Xinka and the many aspects of Xinka morphosyntax have not been well understood. A sample text, *Na Mulha Uy*, is included as well. Solving numerous complex, centuries-old linguistic puzzles, *The Use and Development of the Xinkan Languages* unlocks new potential for the rediscovery of a rich cultural history.

Home in Transition Meike Watzlawik, 2023-10-01 This book presents an integrative perspective on home or Heimat showing that it is much more than the place we were born or where we live. This book brings fresh theoretical and empirical perspectives on what home is and can be

from different viewpoints. The chapters invite the reader to face challenging questions of what we learn about Heimat, when it is taken from us, threatened, left on purpose or when we set out on the journey to find one. The chapters are written by psychologists throughout, but are expanded in perspective by comments from the groups of people featured in the chapters, who are thus given their own voice. The book concludes with a suggestion on how to unite all the different perspectives within a general model rooted in cultural psychology. All in all, the reader of this volume gains an access to the most complex phenomenon of human existence—that of home. Impossible to define in terms of the scientific lore of psychology, intuitively understandable in everyday life, and basis for deep desires if the feeling of home is lost. This book will be a rewarding read for professionals and students from cultural psychology, cultural and psychological anthropology, sociology, and related disciplines, asking the question of what home is and how individuals can be supported in finding it.

Environmental Politics in Latin America Benedicte Bull, Mariel Cristina Aguilar-Stoen, 2014-11-13 Since colonial times the position of the social, political and economic elites in Latin America has been intimately connected to their control over natural resources. Consequently, struggles to protect the environment from over-exploitation and contamination have been related to marginalized groups' struggles against local, national and transnational elites. The recent rise of progressive, left-leaning governments - often supported by groups struggling for environmental justice - has challenged the established elites and raised expectations about new regimes for natural resource management. Based on case-studies in eight Latin American countries (Argentina, Brazil, Chile, Ecuador, Colombia, Bolivia, El Salvador and Guatemala), this book investigates the extent to which

there have been elite shifts, how new governments have related to old elites, and how that has impacted on environmental governance and the management of natural resources. It examines the rise of new cadres of technocrats and the old economic and political elites' struggle to remain influential. The book also discusses the challenges faced in trying to overcome structural inequalities to ensure a more sustainable and equitable governance of natural resources. This timely book will be of great interest to researchers and masters students in development studies, environmental management and governance, geography, political science and Latin American area studies.

Language Documentation and Revitalization in Latin American Contexts Gabriela Pérez Báez, Chris Rogers, Jorge Emilio Rosés Labrada, 2016-07-11 Up to now, the focus in the field of language documentation has been predominantly on North American and Australian languages. However, the greatest genetic diversity in languages is found in Latin America, home to over 100 distinct language families. This book gives the Latin American context the attention it requires by consolidating the work of field researchers experienced in the region into one volume for the first time.

The Reason of Schooling Thomas S. Popkewitz, 2014-09-04 Problematizing the reason of schooling as historical and political, in this book leading international and interdisciplinary scholars challenge the common sense of schooling and the relation of society, education, and curriculum studies. Examining the limits of contemporary notions of power and schooling, the argument is that the principles that order school subjects, the curriculum, and teaching reforms are historical practices that govern what is thought, acted on, and talked about. Highlighting the dynamics of social exclusion, the normalizing of people through curriculum, and questions of social inclusion, *The Reason of Schooling* underscores the urgency for rethinking curriculum research.

Breaking Ground Rose J. Spalding, 2023 Natural resource extraction, once promoted by international lenders and governing elites as a promising development strategy, is beginning to hit a

wall. After decades of landscape gutting and community resistance, mine developers and their allies are facing new challenges. The outcomes of the anti-mining pushback have varied, as increasing payments, episodic repression, and international pressures have deflected some opposition. But operational space has been narrowing in the extractive sector, as evidenced by the growing adoption of mining bans, moratoria, suspensions, and standoffs. This book tells the story of how that happened. In *Breaking Ground*, Rose J. Spalding examines mining conflict in new extraction zones and reactivated territories--places where mining as destiny is a contested idea. Spalding's innovative approach to the mining story traces the construction of mine-friendly rules in up-and-coming mining zones, as late-comers gear up to compete with mining giants. Spalding also excavates the tale of mining containment in countries that have turned away from the extraction model. By challenging deterministic assumptions about the commodities consensus in Latin America, *Breaking Ground* expands the analysis of resource governance to include divergent trajectories, tracing movement not just toward but also away from extractivism. Spalding explores how people living in targeted communities frame their concerns about the impacts of mining and organize to protect local voice and the environment. Then she unpacks the emerging array of policy responses, including those that encompass national level mining rejection. *Breaking Ground* takes up a timeless set of questions about the interconnection between politics and the environment, now re-examined with a fresh set of eyes.

The Making of Indigeneity, Curriculum History, and the Limits of Diversity Ligia (Licho) López López, 2017-10-06 Conceptually rich and grounded in cutting-edge research, this book addresses the often-overlooked roles and implications of diversity and indigeneity in curriculum. Taking a multidisciplinary approach to the development of teacher education in Guatemala, López provides a

historical and transnational understanding of how indigenous has been negotiated as a subject/object of scientific inquiry in education. Moving beyond the generally accepted common sense markers of diversity such as race, gender, and ethnicity, López focuses on the often-ignored histories behind the development of these markers, and the crucial implications these histories have in education – in Guatemala and beyond – today.

Historical Linguistics, fourth edition Lyle Campbell, 2021-03-30 The new edition of a comprehensive, accessible, and hands-on text in historical linguistics, revised and expanded, with new material and a new layout. This accessible, hands-on textbook not only introduces students to the important topics in historical linguistics but also shows them how to apply the methods described and how to think about the issues. Abundant examples from a broad range of languages and exercises allow students to focus on how to do historical linguistics. The book is distinctive for its integration of the standard topics with others now considered important to the field, including syntactic change, grammaticalization, sociolinguistic contributions to linguistic change, distant genetic relationships, areal linguistics, and linguistic prehistory.

Horticultural Reviews, Volume 43 Jules Janick, 2015-10-12 Horticultural Reviews presents state-of-the-art reviews on topics in horticultural science and technology covering both basic and applied research. Topics covered include the horticulture of fruits, vegetables, nut crops, and ornamentals. These review articles, written by world authorities, bridge the gap between the specialized researcher and the broader community of horticultural scientists and teachers.

Indigenous Peoples, Civil Society, and the Neo-liberal State in Latin America Edward F. Fischer, 2009 In recent years the concept and study of “civil society” has received a lot of attention from political scientists, economists, and sociologists, but less so from anthropologists. A ground-

breaking ethnographic approach to civil society as it is formed in indigenous communities in Latin America, this volume explores the multiple potentialities of civil society's growth and critically assesses the potential for sustained change. Much recent literature has focused on the remarkable gains made by civil society and the chapters in this volume reinforce this trend while also showing the complexity of civil society - that civil society can itself sometimes be uncivil. In doing so, these insightful contributions speak not only to Latin American area studies but also to the changing shape of global systems of political economy in general.

Pitfall Christopher Pollon, 2024-01-30 A compelling investigation into the global race to exploit our world's dwindling natural resources. In order to transition to clean energy in the coming decades, billions of tons of copper, nickel, silver, and other metals will be required to build electric vehicles and green infrastructure, and power smart technology. We need more metals than ever before, yet the qualities and quantities are diminishing, making the extraction process more polluting to land, air, and water. And most of these metals will be mined from the global south, where social conflict will only grow, led by Indigenous peoples demanding a greater say in how their wealth is used. In Pitfall, investigative journalist Christopher Pollon charts how transnational companies have controlled copper, precious metals, and lithium mining in Latin America, made inroads into war-torn countries in Africa, and extracted nickel, industrial and rare earth metals across Australia, Asia and the Pacific. Industry attention is now moving to deeper and darker places, including the depths of the ocean, sacrifice zones, and near-Earth asteroids. The stakes couldn't be higher: How can we mine the metals we need without replicating the environmental and human rights abuses of the past?

Einführung in die Ethnologie Mesoamerikas Eveline Dürr, Henry Kammler, 2018 Erstmals im

deutschsprachigen Raum gibt es mit diesem Handbuch ein Überblickswerk zu den rezenten indigenen Kulturen Mesoamerikas. Heutige Maya, Mixteken, Zapoteken und viele weitere autochthone Gemeinschaften sind einerseits Nachfahren der gleichnamigen vorkolonialen Kulturen, andererseits haben sie sich über die Jahrhunderte dynamisch weiterentwickelt und prägen die modernen Nationalstaaten der Region von Mexiko bis Nicaragua auf vielfältige Weise mit. In 32 Einzelkapiteln stellt das Handbuch die indigenen Kulturen Mesoamerikas aus zeitgeschichtlicher und ethnologischer Perspektive dar. Es greift aktuelle Entwicklungen auf und bietet ausgehend vom gegenwärtigen Stand empirischer Kulturforschung fachliche Orientierung für ein weiterführendes, vertiefendes Studium der Region. Das Handbuch gliedert sich in fünf Hauptteile. Der erste bietet eine kompakte Einführung unter Berücksichtigung altamerikanistischer und sprachwissenschaftlicher Aspekte. Es folgen zwei historische Teile, einer zur Geschichte ethnologischer Forschung in Mesoamerika und einer zur neuzeitlichen Geschichte der Region. Im vierten Teil werden anhand ethnographischer Einzelfälle zentrale Themenbereiche der Ethnologie Mesoamerikas vorgestellt. Der fünfte Teil ist überregionalen kulturellen Prozessen gewidmet, wie Revitalisierungs- und Autonomiebewegungen oder der wachsenden indigenen Medienproduktion.

Testimonio Catherine Nolin, Grahame Russell, 2021-10-25 What is land? A resource to be exploited? A commodity to be traded? A home to cherish? In Guatemala, a country still reeling from thirty-six years of US-backed state repression and genocides, dominant Canadian mining interests cash in on the transformation of land into "property," while those responsible act with near-total impunity. Editors Catherine Nolin and Grahame Russell draw on over thirty years of community-based research and direct community support work in Guatemala to expose the ruthless state machinery that benefits the Canadian mining industry—a staggeringly profitable juggernaut of

exploitation, sanctioned and supported every step of the way by the Canadian government. This edited collection calls on Canadians to hold our government and companies fully to account for their role in enabling and profiting from violence in Guatemala. The text stands apart in featuring a series of unflinching testimonios (testimonies) authored by Indigenous community leaders in Guatemala, as well as wide-ranging contributions from investigative journalists, scholars, Lawyers, activists, and documentarians on the ground. As resources are ripped from the earth and communities and environments ripped apart, the act of standing in solidarity and bearing witness—rather than extracting knowledge—becomes more radical than ever.

Nuevas perspectivas para la construcción del estado multinacional Demetrio Cojtí Cuxil, Elsa Son Chonay, Demetrio Rodríguez Guaján, 2007 A team of 3 leading scholars of Guatemalan indigenous studies collaborated to produce this detailed analysis of the government's failure to implement provisions for indigenous people in the 1996 peace accord, which includes a set of specific proposals.

Ulysses Guatemala Carlos Soldevila, 2000 Gerald M. Phillips draws on his twenty-five-year, five-thousand-client experience with the Pennsylvania State University Reticence Program to present a new theory of modification of “inept” communication behavior. That experience has convinced Phillips that communication is arbitrary and rulebound rather than a process of inspiration. He demonstrates that communication problems can be described as errors that can be detected and classified in order to fit a remediation pattern. Regardless of the source of error, the remedy is to train the individual to avoid or eliminate errors—thus, orderly procedure will result in competent performance. Inept communicators must be made aware of the obligations and constraints imposed by deep structures that require us to achieve a degree of formal order in our language, without

which our discourse becomes incomprehensible.

The Symbolic Dimension Jarema Drozdowicz, 2014 Key issues in the contemporary debates on culture seem to be accompanied by the problem of meaning and the dynamics of it. Today, the global dimension of culture is a significant factor of the problem, especially when we speak of cultural identity or intercultural communication. This book presents critical points of cultural change that we may observe in many areas of local and global ecumene. The emerging of new currents, processes, and phenomena, as well the transformation of older ones, is evidence of the fact that culture cannot be regarded as a static whole, enclosed in a tangible framework of objectified artifacts. Thus, culture is taken here as a specific narrative on the human condition, with all its imponderables. (Series: Anthropology / Ethnologie - Vol. 58) [Subject: Anthropology, Cultural Studies, Religious Studies, Education, Politics]

Legislating for Equality Talia Naamat, Nina Osin, Dina Porat, 2013-05-02 In this second volume we turn our attention to the Americas: North America, Latin America, and the Caribbean. During the past decade many American countries amended their constitutions and enacted laws protecting the rights of indigenous people.
