**Eurasian Economies** E. Aydoğan Hiç Gencer, Selahattin Sarı, 2020-08-20 This volume explores the economies of countries in Asia, as well as the former Soviet socialist bloc countries of Central Asia and the Balkans. It analyses the region from the perspective of globalization and regional economic integration, economic growth and sustainable development, international trade and finance, money market and banking systems, labor market and external migration, energy and agricultural sectors. This book will appeal to anyone who is interested in economies of this region, their transition process towards a market economy regime, and their integration in the global world, including academicians from any field of social sciences, as well as decision makers, politicians, businessmen and journalists.

**Good Finance** Akgiray, Vedat, 2019-06-05 Just as we need good food for good health, so too do we need 'good finance' for social and economic wellness. In this book, Vedat Akgiray presents a timely critique of extreme financialisation, of the economics profession's flawed modelling approach and the continuing blind faith in the efficient market hypothesis. Outlining the causes of financial crises and their socioeconomic effects, Good Finance puts the issues into perspective. It offers a clear platform upon which our current concept of finance can be revised for the good of society.

**Tourism in Central Asia** Kemal Kantarci, Muzaffer Uysal, Vincent P. Magnini, 2014-09-05 This book will be a major resource for all academic researchers and practitioners interested in issues dealing with the development of tourism, its potential and challenges, and policy and regulatory issues in the Central Asian countries of Kazakhstan, Uzbekistan, Turkmenistan, Kyrgyzstan, and Tajikistan. These countries are gaining more attention as emerging destinations. There is limited research that focuses on these countries with respect to their potential and characteristics as tourism destinations. This book aims to be an invaluable source for both practitioners and academicians who are in international marketing and tourism. The central Asia region (also termed the Silk Road region) as an emerging destination is ripe for future tourism development. The region is rich with historical, cultural, and natural beauty that could provide significant utility to many potential visitors. This book brings together key writings on this topic in a single resource.

**The British Seaside** John K. Walton, 2000-11-18 This detailed academic cultural study looks at the rise and fall of the seaside holiday in Britain. John K. Walton offers a broad interpretation of the holidays and resorts, looking at who went, where they went, what they did, and how they were entertained.

**A History of Modern Tourism** Eric Zuelow, 2015-10-26 Tourism is one of the largest industries in the world, yet leisure travel is more than just economically important. It plays a vital role in defining who we are by helping to place us in space and time. In so doing, it has aesthetic, medical, political, cultural, and social implications. However, it hasn't always been so. Tourism as we know it is a surprisingly modern thing, both a product of modernity and a force helping to shape it. A History of Modern Tourism is the first book to track the origins and evolution of this pursuit from earliest times to the present. From a new understanding of aesthetics to scientific change, from the invention of steam power to the creation of aircraft, from an elite form of education to family car trips to see national 'shrines,' this book offers a sweeping and engaging overview of a fascinating story not yet widely known.

**Tourism and National Identities** Elspeth Frew, Leanne White, 2011-03-15 By understanding tourist destinations through the lens of national identity, the tourist may develop a deeper appreciation of the destination. Further, tourism marketers and planners may be better equipped to promote and manage the destination, particularly with regard to expectations of the potential visitor. Tourism and National Identities is the first volume to fully explore the relationship between tourism and national identities and the multiple ways in which cultural tourism, events and celebrations contribute to national identity. It examines core topics critical to understanding this relationship including: tourism branding, stereotyping and national identity; tourism-related representation and experience of national identity; tourism visitation/site/event management and the relationship to cultural tourism. The book looks at a range of international tourist sites and events, combines multidisciplinary perspectives and international cases to provide a thorough academic analysis. The interconnecting area of cultural tourism and national identity has been largely overlooked in the academic literature to date. This book gives considerable analysis to the complex relationship between the two domains and indeed, the multifaceted strategies used to define that relationship. Written by an international team of leading academics, Tourism and National Identities will be of interest to students, researchers and academics in tourism and related disciplines such as events, cultural studies and geography.

**Current Debates in History & Politics** Abidin Çevik, Oya Gözel Durmaz, Günay Gönüllü, 2018 As the outcome of the sixth international congress, the papers in this volume cover a wide range of topics related to the main theme of the conference, titled "Current Debates in Social Sciences", and basically focus on politics and history. In this context, the articles in the book draw attention to the different aspects of history and politics such as the transition period from the Ottoman Empire to the Turkish Republic, theoretical discussions in politics, history and arts, and the issues regarding neo-liberalism, migration, citizenship and communication. Even though most of the papers deal with the issues regarding Turkey, there are also studies on ancient Anatolia, the Medieval Muslim Dynasties, the Mughal period, the Ottomans and Tsarist Russia. We believe that these studies would contribute to the development of debates in social sciences and encourage interdisciplinary approaches.

**Exposed** Bryan Adams,2012 In the late 1990s Bryan Adams became curious about making photographic self-portraits for his album covers, and so chose to pick up the camera himself. That serendipitous decision was the beginning of a successful photographic career, parallel to Adams' impressive achievements as a singer, songwriter and producer. *Exposed* is a retrospective of Adams' photography and features portraits of friends and colleagues in the entertainment, fashion and art industries, including Morrissey, Ben Kingsley, Amy Winehouse, Michael Jackson, Louise Bourgeois, Lindsay Lohan and Judi Dench. This book, Adams' first comprehensive monograph, exposes not only unknown facets of his subjects but also the depth of Adams' photographic faculty.

***Ottoman Dress and Design in the West*** Charlotte Jirousek,Sara Catterall,2019-01-25 “This amply illustrated, attractive book is valuable for dress history scholars . . . [an] ideal textbook for courses on clothing and cultural history.” —The Journal of Dress History *Ottoman Dress and Design in the West* is a richly illustrated exploration of the relationship between West and Near East through the visual culture of dress. Charlotte Jirousek examines the history of dress and fashion in the broader context of western relationships with the Mediterranean world from the dawn of Islam through the end of the twentieth century. The significance of dress is made apparent by the author's careful attention to its political, economic, and cultural context. The reader comes to understand that dress reflects not simply the self and one's relation to community but also that community's relation to a wider world through trade, colonization, religion, and technology. The chapters provide broad historical background on Ottoman influence and European exoticization of that influence, while the captions and illustrations provide detailed studies of illuminations, paintings, and sculptures to show how these influences were absorbed into everyday living. Through the medium of dress, Jirousek details a continually shifting Ottoman frontier that is closely tied to European and American history. In doing so, she explores and celebrates an essential source of influence that for too long has been relegated to the periphery.

***Turkestan and the Rise of Eurasian Empires*** Ali Anooshahr,2018 This book studies how fifteenth and sixteenth century chroniclers grappled with the Turkestani or Turco-Mongol origin stories of their patrons in the newly forming states of the Ottomans, Safavids, Shibanids, Moghuls, and Mughals--

**The Routledge Handbook of Translation and Politics** Jonathan Evans,Fruela Fernandez,2018-04-19 The Routledge Handbook of Translation and Politics presents the first comprehensive, state of the art overview of the multiple ways in which 'politics' and 'translation' interact. Divided into four sections with thirty-three chapters written by a roster of international scholars, this handbook covers the translation of political ideas, the effects of political structures on translation and interpreting, the politics of translation and an array of case studies that range from the Classical Mediterranean to contemporary China. Considering established topics such as censorship, gender, translation under fascism, translators and interpreters at war, as well as emerging topics such as translation and development, the politics of localization, translation and interpreting in democratic movements, and the politics of translating popular music, the handbook offers a global and interdisciplinary introduction to the intersections between translation and interpreting studies and politics. With a substantial introduction and extensive bibliographies, this handbook is an indispensable resource for students and researchers of translation theory, politics and related areas.

***Quality Assurance in Teacher Education in Europe*** ,2006

**Pragmemes and Theories of Language Use** Keith Allan,Alessandro Capone,Istvan Kecskes,2017-01-10 This volume offers recent developments in pragmatics and adjacent territories of investigation, including important new concepts such as the pragmatic act and the pragmememe, and combines developments in neighboring disciplines in an integrative holistic pragmatic approach. The young science of pragmatics has, from its inception, differentiated itself from neighboring fields in the humanities, especially the disciplines dealing with language and those focusing on the social and anthropological aspects of human behavior, by focusing on the language user in his or her societal environment. This collection of papers continues that emphasis on language use, and pragmatic acts in their context. The editors and contributors share a perspective that essentially considers language as a system for communication and wants to look at language from a societal perspective, and accept the view that acts of interpretation are essentially embedded in culture. In an interdisciplinary approach, some authors explore connections with social theory, in particular sociology or socio-linguistics, some offer a political stance (critical discourse analysis), others explore connections with philosophy and philosophy of language, and several papers address problems in theoretical pragmatics.

**Letters from the East** Malcolm Barber,Keith Bate,2013 This volume presents translations of a selection of the letters sent by crusaders and pilgrims from Asia Minor, Syria and Palestine. There are accounts of all the great events from the triumph of the capture of Jerusalem in 1099 to the disasters of Hattin in 1187 and the loss of Acre in 1291. They convey the immediacy of circumstances which were frequently dramatic and often life-threatening, and show us the feelings of those who lived in and visited the crusader states. Some of the letters translated here are famous, others hardly known, but all offer unique insight into the minds of those who took part in the crusading movement.

***Stephen the Great and Balkan Nationalism*** Jonathan Eagles,2013-10-25 The defeat of the Ottoman Empire in the Balkans in 1475 at the Battle of Vaslui heralded the beginnings of a historic legacy. The victor became known as Stephen the Great or Athleta Christi, Champion of Christ. Perceived as the founder of a Balkan identity, Stephen the Great maintained Moldova's independence during periods of fierce Ottoman attack between 1457 and

1504. His Christian religious stance meant that, in the eyes of Europe, he had not only defeated a significant territorial threat but had elevated Christianity to a superior level as victors over its Muslim opponents. Here, Jonathan Eagles seeks to unveil the mechanisms behind this legacy, reviewing the state formations that allowed this national hero to emerge, and explaining the methods that preserve his memory in the region today. By combining the latest historical studies of the anti-Ottoman resistance with new archaeological findings, Stephen the Great and Balkan Nationalism engages with a fresh approach to the history of the Balkans, and reinvigorates the study of the Ottoman Empire's impact in Europe. This is an important book for those with an interest in medieval history, Balkan history and the Ottomans.

*Chromium in Nutrition and Disease* Günay Saner,1980 Abstract: Data currently available on the advances in research on the functions of chromium in humans and animals are presented as a reference for anyone interested or involved in the fields of nutrition research or applied nutrition. The various aspects of chromium nutriture addressed include requirements, utilization, and manifestations of deficiency. The biochemical and physiological roles of chromium are described, as well as its metabolism and its presence in normal subjects. The abnormal aspects of chromium nutrition discussed are its metabolism in malnutrition, diabetes, coronary heart disease, and deficiency states; these abnormalities are characterized by glucose intolerance, impaired growth, peripheral neuropathy, negative nitrogen balance, etc. Othertopics covered include aging, pregnancy, hereditary factors, nutrient sources, and toxicity of chromium.

*Police Administration* Orlando Winfield Wilson,Roy Clinton McLaren,1972

*Judicial Ethics* Keith Swisher,2016 Judicial ethics is a surprisingly underexplored area and this volume marks an important point in this relatively new but commendably growing field of studies. The areas covered range from the metaethics of decision and how this impacts the judiciary to the ethical evaluation of the substance and procedure of a decision and codes of judicial conduct. Addressing each of these meanings and more, this collection brings together for the first time many, if not most, of the 'canons' (or soon-to-be 'canons') of modern judicial ethics scholarship. The previously published articles have created new interdisciplinary, historical, cultural and doctrinal understandings of judicial character, conduct, regulation and development, and bringing them together in one volume provides readers with the opportunity to review the field more readily and comprehensively.

*Global Warming and the Political Ecology of Health* Hans A. Baer,Merrill Singer,2009 Hans Baer and Merrill Singer inventory and critically analyze the diversity of significant and sometimes devastating health implications of global warming using a range of theoretical tools from anthropology, medicine, and environmental sciences.

*Kadınların Belleği* Kadın Eserleri Kütüphanesi ve Bilgi Merkezi Vakfı (Istanbul, Turkey),1992
