*Radiosensitizers and Radiochemotherapy in the Treatment of Cancer* Shirley Lehnert, 2014-12-08  
Radiosensitizers and Radiochemotherapy in the Treatment of Cancer catalogs and describes the mechanism of action for entities characterized as radiosensitizers. Developments in the biological and physical sciences have introduced new radiosensitizers and defined novel targets for radiosensitization. As a result, a book about radiosensitization must now address a huge range of topics, covering everything from molecular oxygen and high Z elements to monoclonal antibodies and complex phytochemicals. At the molecular level, the understanding of the molecular consequences of DNA damage and the DNA damage response have informed the development of targeted radiosensitizers and shed light on the mode of action of radiochemotherapy protocols of known clinical efficacy. In this book the mechanisms of action at the molecular and cellular level are described for documented radiosensitizers including, where applicable, a brief history of their clinical use and most recent clinical results. In addition, the clinical context is addressed including the importance of factors such as dose and dose rate, normal tissue toxicity, and drug delivery. Intuitively organized

by topic and application, the book includes extensive illustrations, end-of-chapter summaries, and a wealth of references.

Comunicación de crisis, redes sociales y reputación corporativa. Costa, Carlos Victor, 2019-10-09 La comunicación corporativa, como función gerencial en las organizaciones, tiene como uno de sus objetivos principales facilitar las relaciones y los intercambios simbólicos con los grupos de interés de una empresa, y por ende establecer y mantener reputaciones favorables. Cada vez más, esta función es estratégica dentro de las organizaciones, en la medida que contribuye a convertir una organización en un actor cuya reputación legitima a la organización misma entre sus grupos de interés. Sin embargo, el uso de Internet por los movimientos sociales y por los individuos con agendas antagónicas en las redes sociales puede ofrecer resistencia a los discursos corporativos y a la organización como un todo, con la posibilidad de aparición de riesgos y crisis de reputación. Observamos, en años recientes, la aparición del concepto de “paracrisis” (las crisis con origen o amplificadas por las redes sociales) en el marco de la evolución de una sociedad vigilante, pero en este caso participativa y empoderada por las redes sociales, que desconfía de la retórica corporativa y pone en entredicho la coherencia entre el comportamiento organizacional y su discurso. A través de sus acciones en Internet, esta nueva forma de actuar de la sociedad en red puede aumentar la vulnerabilidad de las empresas como actores sociales en la medida que contribuye a poner de relieve las contradicciones de sus discursos corporativos y crear representaciones deslegitimadoras a través de encuadres contrarios al de los intereses organizacionales. Esta investigación aborda un caso de estudio paradigmático ocurrido con una

gran institución financiera española (Bankia) y una gran campaña de publicidad emitida en plena crisis financiera mundial. A través del análisis de contenido de los comentarios de los usuarios de Twitter, la investigación obtiene evidencias empíricas bastante claras que verifican cómo el discurso corporativo puede ser deconstruido en el ámbito de los medios sociales cuando la empresa no toma en consideración el capital cognitivo compartido de los receptores de sus mensajes y el contexto social en que ella actúa. Por el análisis de caso y del contexto de los cambios históricos de los últimos 10 años, llegamos a la conclusión general de que el punto de partida de la creación de la agenda pública dejó de ser una atribución exclusiva de los medios de comunicación de masas, de modo que los efectos pueden ser fecundadores en dos sentidos, con origen en los medios de comunicación de masas hacia los medios sociales de Internet y viceversa, y, por otra parte, que está claro que el paradigma de la comunicación de las marcas clásico, basado en la fuerza unidireccional de los medios de comunicación de masas y en el control centralizado del mensaje, ha dejado de ser el paradigma canónico

**Actuales debates sobre las regiones, la integración regional y la globalización** Ana Marleny Bustamante, Dawisson Belém Lopes, Yulieth E. Martínez Villalba, Giovanni Molano Cruz, Pedro Caldentey del Pozo, Marcelo de Almeida Medeiros, Luiza Vilela Amelotti, Martine Colette Mvengou Cruzmerino, Manon Medeiros, Nayanna Sabiá de Moura, Paul Ganster, Nahuel Oddone, Stella Juste, Francisco Javier Sánchez Chacón, 2022-05-10 Este libro de divulgación científica tiene por objetivo revisar, pensar y actualizar los debates más recientes sobre las regiones en el marco del proceso globalizador. La obra aporta contenido académico con reflexiones sobre las regiones y lo regional en el contexto de la globalización en el

2021 y observa las marchas y contramarchas de dicho proceso, cada vez más convulso con el advenimiento de la pandemia global del sars-Cov-2. Este libro se divide en tres partes: la primera trata sobre las regiones globales, la segunda sobre la región en la integración regional y en la perspectiva global y, por último, la tercera se enfoca en las regiones transfronterizas. En su conjunto, se ofrece un abanico tanto de estudios empíricos como de interpretaciones teóricas que, si bien no representan una visión unitaria del fenómeno y de la interacción renovada entre globalización, integración regional, regionalismo, región y regionalidad, sí permiten observar los temas desde ángulos que contribuyen a iluminar su complejidad y los escenarios futuros como proceso económico y político en constante revisión. Se incorporan elementos que ayudan a comprender de forma apropiada la profundidad de los cambios y apuntan a motivar la generación de más reflexiones y estudios sobre la región y el aspecto regional, en los escenarios micro y macro. El estado actual del pensamiento regional está cambiando constantemente y su análisis es proclive a influir en su desarrollo y evolución. Por ello, en esta obra, los autores atienden a parte de esa necesidad con la propiedad de su respectiva disciplina científica y su área de interés investigativo, explicando y reflexionando sobre los cambios, las razones de ser y las características de la región en medio de la globalización.

*Motivos de abandono de la práctica del deporte juvenil* José Antonio Cecchini Estrada, Onofre Ricardo Contreras Jordán, Antonio Méndez Giménez, 2005 Conocer los principales motivos que tienen los jóvenes para abandonar la práctica, parcial o definitiva, del deporte es un centro de especial interés tanto para educadores físicos y entrenadores deportivos como para psicólogos

deportivos y gestores del deporte. De hecho, desvelar los entresijos de la motivación permitirá a los profesionales de la educación física estructurar sus prácticas y adaptar el contexto o clima de aprendizaje para ser más eficaces en su empeño. En función de los resultados del trabajo se proponen una serie de recomendaciones al objeto de paliar la tasa de abandono de la práctica deportiva y, de este modo, ayudar a la formación de patrones de vida saludable.

**Estilos de liderazgo y su eficacia en la administración pública mexicana** José Luis Ayoub Pérez, 2011-01-17 JOSÉ LUIS AYOUB PÉREZ presenta en este libro la metodología y resultados de la primera investigación empírica realizada en la Administración Pública Federal Centralizada de México, diseñada para determinar, utilizando el modelo de liderazgo de alcance pleno (MLQ), cuáles son los estilos de liderazgo que emplean los servidores públicos, cómo se relacionan con indicadores de desempeño, así como el grado de crisis que perciben y cómo se relaciona con la cantidad de carisma que están dispuestos a atribuir a sus líderes. También ofrece una radiografía detallada, en términos demográficos, de la administración pública mexicana.

*Probability, Statistics, and Data* Darrin Speegle, Bryan Clair, 2021-11-26 This book is a fresh approach to a calculus based, first course in probability and statistics, using R throughout to give a central role to data and simulation. The book introduces probability with Monte Carlo simulation as an essential tool. Simulation makes challenging probability questions quickly accessible and easily understandable. Mathematical approaches are included, using calculus when appropriate, but are always connected to experimental computations. Using R and simulation gives a nuanced understanding of statistical inference. The impact of departure from

assumptions in statistical tests is emphasized, quantified using simulations, and demonstrated with real data. The book compares parametric and non-parametric methods through simulation, allowing for a thorough investigation of testing error and power. The text builds R skills from the outset, allowing modern methods of resampling and cross validation to be introduced along with traditional statistical techniques. Fifty-two data sets are included in the complementary R package `fosdata`. Most of these data sets are from recently published papers, so that you are working with current, real data, which is often large and messy. Two central chapters use powerful tidyverse tools (`dplyr`, `ggplot2`, `tidyr`, `stringr`) to wrangle data and produce meaningful visualizations. Preliminary versions of the book have been used for five semesters at Saint Louis University, and the majority of the more than 400 exercises have been classroom tested.

**Stepney** Samantha L. Bird, 2010-10-12 This book is the first single volume history of Stepney in modern times. It sets out to provide a vivid and yet scholarly portrait of an iconic London borough situated in the heart of the East End. Stepney is an area with very many well known associations and images, from the horrifying murders of "Jack the Ripper" to the soaking up of the heavy bomb damage during the Blitz, from the classical confrontation between Mosley's fascists and the socialist left at the "Battle of Cable Street," to the dramatic "Siege of Sidney Street" when Liberal Home Secretary Winston Churchill rooted out an anarchist cell. Beyond these dramatic episodes, Stepney witnessed the perennial struggle for subsistence among the many poor, the rise and fall of the great local docks, the immigration of large numbers of Jewish refugees from Eastern Europe and elsewhere, the growth of the Labour Party and the surprising local ascendancy of the Communists, the

desperate drive to improve public housing, the evacuation of a large proportion of its children at the start of World War II, and much more besides. This is a truly ground-breaking, very readable book that fills a surprising gap in our knowledge and greatly enhances our understanding of London, urban, working-class, inter-ethnic, industrial and British 20th century history.

**Handbook of Oxidative Stress in Cancer: Therapeutic Aspects** Sajal Chakraborti, 2022-09-28  
This reference book, which is the second volume of Targeting Oxidative Stress in Cancer, explores oxidative stress as the potential therapeutic target for cancer therapy. The initial chapters discuss the molecular mechanisms of oxidative stress and its effects on different signaling pathways. Subsequently, the sections examine the impact of redox signaling on tumor cell proliferation and consider the therapeutic potential of dietary phytochemicals and nutraceuticals in reactive oxygen species (ROS)-induced cancer. In turn, it examines the evidence supporting the use of Vitamin C in cancer management, before presenting various synthetic

and natural compounds that have therapeutic implications for oxidative stress-induced cancer. It also explores the correlation between non-coding RNA and oxidative stress. Furthermore, the book summarizes the role of stem cells in ROS-induced cancer therapy and reviews the therapeutic applications of nanoparticles to alter redox haemostasis in cancer cells. Lastly, it explores heat-shock proteins, ubiquitin ligases, and probiotics as potential therapeutic agents in ROS-mediated cancer. This book is a useful resource for basic and translational scientists as well as clinicians interested in the field of oxidative stress and cancer therapy.
