Man on Fire Humphrey Hawksley,2021-06-01 A tense firefight on the Russian-American border heralds the start of a terrifying high-stakes mission for special forces agent Major Rake Ozenna in this gripping espionage thriller. Instructed to guide in a speed boat crossing from Russia in the Bering Strait, special forces Major Rake Ozenna watches in horror as the operation culminates in a fatal firefight - and the loss of vital intelligence of a deadly new weapon. A weapon of unimaginable power. A weapon that, if it were unleashed, would cripple civilization as we know it. But who sabotaged the mission? Who possesses the weapon - and what is their ultimate goal? Rake's search takes him to the remote outpost of Uelen on the Russian coast - and the discovery that he is up against a formidable enemy from his past. As world leaders gather in Bonn for the signing of the new European security treaty, Rake enters a desperate race against time to prevent a catastrophe beyond imagining. This fast-paced, impeccably researched, highly topical thriller is perfect for readers of CLIVE CUSSLER, LEE CHILD and ROBERT LUDLUM.

Man on Edge Humphrey Hawksley,2020-01-01 A tense and twisting espionage thriller involving state secrets, lethal assassins and the threat of a new Cold War. Trauma surgeon Carrie Walker is taken aback when her estranged uncle makes contact out of the blue. Senior Russian naval officer Artyom Semenov claims to be in possession of an explosive piece of information which he is offering to share with the West. But can he be trusted? Travelling to Moscow undercover to meet with Semenov, Carrie finds herself stranded when the carefully-planned operation goes catastrophically awry. In grave danger, there's only one person she can turn to for help: her former fiancé, Major Rake Ozenna of the Alaska National Guard. Aware how vital it is that he reaches Carrie before others do, Rake knows he's pitted against a powerful and lethal enemy. But is it a rogue agent - or the Russian state? As preparations gather pace for a high-profile NATO exercise off the Norwegian coast, Rake must act fast if he is to prevent a global catastrophe.

Perspectives on Research in Emotional Stress Detlev Ganten,Nicola A. Nikolov,K.V. Sudakov,2022-02-27 First Published in 1989. Based on the updated proceedings of the Soviet-American International Pavlovian Conference held in Moscow, this volume presents a new trend in the systems analysis of emotional stress as an outcome of behavioural conflict situations in which the subjects fail to achieve a useful end result. The mechanisms, complications, prevention and behavioural therapy of emotional stress are examined. While almost any of the body functional systems can be involved, psychosomatic and immune system disorders, coronary heart diseases and hypertension are shown to be the major complications of chronic exposure to emotional stress in both humans and animals. A special section of the book highlights various approaches towards the enhancement of stress resistance in man through emotional self-regulation, relaxation, social skills training and other biobehavioural interventions.

Man on Ice Humphrey Hawksley,2019-10-03 Special agent Captain Rake Ozenna watches as a fleet of Russian military helicopters head straight for his home. His tiny Alaskan island, with a population of just eighty. What he doesn't know yet, is why. Russia is playing a dangerous political game, reclaiming Rake's island as their own, even if it antagonises the US. Caught in the crosshairs of sabre-rattling big powers, Rake is determined to save his people and his island, even if it costs him his life.

The Russian Ecclesiastical Mission in Peking During the Eighteenth Century Widmer,2020-03-17 This book is the first analytical treatment in any language of the "most durable 'sino-foreign' institution in modern Chinese history." It traces the beginnings of a Russian-Orthodox presence in Peking several

decades back before the commonly held date of its origin. It also shows how the news of the plight of prisoners from the Russian fortress of Albazin (taken by the Ch'ing in 1685) was transmitted back to Russia, and how the indecisiveness of the official Russian response colored the entire subsequent history of the mission. The chapters on the Orthodox missionary life in Peking and on the institutions of the mission provide us with new insight into life in the Ch'ing capital. The tentative beginnings of Russian scholarly and scientific interest in Chinese matters, an outgrowth of the missionary presence in Peking, are also discussed. The book tackles an especially difficult case, for by ordinary standards the Russian ecclesiastical mission was a failure, not a success. The monks and students were an unruly lot, the mission itself never functioned as a full diplomatic institution, and the Chinese frequently treated the missionaries with neglect or disdain. Yet, as the author demonstrates, even this apparent failure had a purpose. The mission served to maintain a minimal contact between the two empires throughout a long period of conflicting ambitions and actions in the Inner Asian theater.

Stress and Tension Control 3 F.J. McGuigan,W.E. Sime,J.M. Wallace,2012-12-06 These are the proceedings of the Third International Interdisciplinary Conference on Stress and Tension Control, sponsored by the International Stress and Tension-Control Society held at the University of Edinburgh, Scotland from August 30-September 3, 1988. The Society celebrated the 15th year of its existence. It was founded in 1974 as the American Association for the Advancement of Tension-Control which held annual meetings in Chicago through 1979. Recognizing the multi-national interest in stress and tension control, the association changed its name and scope accordingly. The original American Association was founded and nurtured for many years by Dr. and Mrs. Edmund Jacobson and Professor F. J. McGuigan. The proceedings of the first international conference in London were also published by Plenum Publishing Company (Stress and Tension Control, McGuigan, Sime and Wallace, 1980), as were those of the second international conference which was held at the University of Sussex in Brighton, England (McGuigan, Sime and Wallace, 1984). These and the publication of the proceedings from 1974 reflect the interest in stress and tension control that has grown steadily throughout the past decades, as also does the publication of numerous other books related to Stress Management.

Black Ice Brad Thor,2021-07-20 INSTANT #1 NEW YORK TIMES BESTSELLER “[A]nother instant classic.” —The Real Book Spy “The undisputed master of blending geopolitics with spycraft...a thriller aficionado’s dream.” —The Providence Journal The new Cold War is about to go hot. #1 New York Times and #1 Wall Street Journal bestselling author Brad Thor is back with his most intense thriller yet. Scot Harvath is having his best summer ever. With a cottage on the fjord, a boat, and his beautiful girlfriend Sølvi, he’s got everything he could possibly want. But out of vacation days and long overdue back home, America’s top spy has a decision to make—return or submit his resignation. When his deadly past comes calling, though, he’ll be left with no choice at all. Leaving his favorite Oslo café, Harvath watches as a ghost climbs out of a taxi—a man he killed years ago, halfway around the world. How is he still alive? And what is he doing in Norway? In a race against time that will take him high above the Arctic Circle, Harvath is tested in ways he never could’ve imagined and pushed to a limit few human beings could ever endure. If he succeeds, he’ll walk away with everything. If he fails, the United States and its allies will be at the mercy of one of the world’s most dangerous actors.

Poromechanics III - Biot Centennial (1905-2005) Younane N. Abousleiman,Alexander H.-D.

Cheung,Franz-Josef Ulm,2005-05-01 These proceedings represent the latest advances in the mechanics of porous materials, known as poromechanics. The porous materials considered are solids containing voids that are impregnated with fluid. The focus is on the mechanical interactions of the inhomogeneous solid with the single- or multi-phase fluid under the loading of mechanical force, fluid pressure, thermal, chemical, and magnetic fields. The response time can be in static, diffusional, and dynamic ranges. The length scale can start from nano, to micro, macro, and up to field scales. Its application covers many branches of science and engineering, including geophysics, geomechanics, composite materials, biomechanics, acoustics, seismicity, civil, mechanical, environmental, and petroleum engineering. The approaches taken include analytical, computational, and experimental. To honor the pioneering contributions of Maurice A. Biot (1905-1985) to poromechanics, the Biot Conference on Poromechanics was convened for the first time in Louvain-la-Neuve, Belgium in 1998. The success of the first conference led to the 2nd Biot Conference held in Grenoble, France in 2002. To celebrate the centennial birthday of Biot (May 25, 2005), the 3rd Biot Conference on Poromechanics was held at the University of Oklahoma, Norman, Oklahoma, U.S.A., on May 24-27, 2005.
