Computational Science and Its Applications -- ICCSA 2013 Beniamino Murgante, Sanjay Misra, Maurizio Carlini, Carmelo Maria Torre, Hong-Quang Nguyen, David Taniar, Bernady O. Apduhan, Osvaldo Gervasi, 2013-06-22 The five-volume set LNCS 7971-7975 constitutes the refereed proceedings of the 13th International Conference on Computational Science and Its Applications, ICCSA 2013, held in Ho Chi Minh City, Vietnam in June 2013. The 248 revised papers presented in five tracks and 33 special sessions and workshops were carefully reviewed and selected. The 46 papers included in the five general tracks are organized in the following topical sections: computational methods, algorithms and scientific applications; high-performance computing and networks; geometric modeling, graphics and visualization; advanced and emerging applications; and information systems and technologies. The 202 papers presented in special sessions and workshops cover a wide range of topics in computational sciences ranging from computational science technologies to specific areas of computational sciences such as computer graphics and virtual reality.

Large Scale Systems F. G. Filip, I. Dumitrache, S. S. Iliescu, 2002 This volume contains the papers presented at the 9th IFAC Symposium on Large Scale Systems: Theory and Applications (LSS 2001), held in Bucharest, Romania, 18-20 July 2001. Its aim was to address the control aspects of those industrial, economic, social and environmental systems whose characteristics are high dimensionality, non-linearity and uncertainty, associated with a multitude of structural forms, with intense and time critical information exchange and efficient co-ordination. The symposium covered all major aspects of large scale, complex systems including methodological aspects, technological solutions and practical applications. methodological aspects and those devoted to practical applications. Several invited sessions were organised, including papers from leading world experts. The papers are ordered in accordance with the technical sessions. Session topics include methodology and application fields, traditional to this Symposium series. Topics covered include the following: modelling and model reduction; decentralized control and estimation; hierarchical control; intelligent and fuzzy control; nonlinear dynamics in complex systems; complex systems theory and analysis; water, gas, power systems; large scale CIMs and production planning and scheduling; communication and information systems; transportation systems; modelling and control of wastewater treatment plants and societal systems modelling, planning and management. technical programme, such as decision support systems and risk and governance in large-scale systems. More recent issues, such as risk management and human decision in large-scale systems, were well received by the symposium participants and provide an extra dimension to volume.

Contingency Table Analysis Maria Kateri, 2014-05-17 Contingency tables arise in diverse fields, including life sciences, education, social and political sciences, notably market research and opinion surveys. Their analysis plays an essential role in gaining insight into structures of the quantities under consideration and in supporting decision making. Combining both theory and applications, this book presents models and methods for the analysis of two- and multidimensional-contingency tables. An excellent reference for advanced undergraduates, graduate students, and practitioners in statistics as well as biosciences, social sciences, education, and economics, the work may also be used as a textbook for a course on categorical data analysis. Prerequisites include basic background on statistical inference and knowledge of statistical software packages.

Sworn Bond in Tudor England Thea Cervone, 2011-07-25 The swearing of oaths is a cultural phenomenon that pervades English history and was remarkably important during the sixteenth century. This multi-disciplinary work explores how writers of the Tudor era addressed the subject in response to the profound changes of the Reformation and the creative explosion of the Elizabethan period. Topics include how the art of rhetoric was deployed in polemic, the way in which oaths formed bonds between Church and State, and how oaths functioned in literature, as ceremony and as a language England used to describe itself during times of radical change.

Acute Stroke Nursing Jane Williams, Lin Perry, Caroline Watkins, 2013-05-07 Stroke is a medical emergency that requires immediate medical attention. With active and efficient nursing management in the initial hours after stroke onset and throughout subsequent care, effective recovery and rehabilitation is increased. Acute Stroke Nursing provides an evidence-based, practical text facilitating the provision of optimal stroke care during the primary prevention, acute and continuing care phases. This timely and comprehensive text is structured to follow the acute stroke pathway experienced by patients. It explores the causes, symptoms and effects of stroke, and provides guidance on issues such as nutrition, continence, positioning, mobility and carer support. The text also considers rehabilitation, discharge planning, palliative care and the role of the nurse within the multi-professional team. Acute Stroke Nursing is the definitive reference on acute stroke for all nurses and healthcare professionals wishing to extend their knowledge of stroke nursing. Evidence-based and practical in style, with case studies and practice examples throughout Edited and authored by recognised stroke nursing experts, clinicians and leaders in the field of nursing practice, research and education The first text to explore stroke management from UK and international perspectives, and with a nursing focus

Counselling in Primary Health Care Jane Keithley, Geoffrey Norman Marsh, 1995 A substantial proportion of the problems that bring patients to general practice are associated with stress, relationships, and psychological or psychosomatic responses to difficulty in their lives. This book will help all those in the primary health care team to examine their roles as counsellors to those patients themselves or as the gateway to other counselling services. The authors - who include those working in medicine, nursing, social work, psychology, sociology, social policy, and economics - discuss the different points of view regarding the position of counselling in primary

care and which team members are the most appropriate counsellors. As the burdens on the primary health care team increase, many more health-care workers will find themselves becoming involved in the many diverse aspects of providing counselling. This is a uniquely practical guide for everybody who wishes to improve their knowledge of this demanding but deeplyrewarding aspect of health care.
