Test Design Susan E. Embretson, 2013-10-22 Test Design: Developments in Psychology and Psychometrics is a collection of papers that deals with the diverse developments

contributing to the psychometrics of test design. Part I is a review of test design including practices being used in test development. Part II deals with design variables from a psychological theory that includes implications of verbal comprehension theories in the role of intelligence and the effects of these implications on goals, design, scoring, and validation of tests. Part III discusses the latent trait models for test design that have numerous advantages in problems involving item banking, test equating, and computerized adaptive testing. One paper explains the use of the linear exponential model for psychometric models in speed test construction. The book discusses the traditional psychometric; the Hunt, Frost, and Lunnerbog theory; and the single-latency distribution model. Part IV examines test designs from the perspective of test developments in the future integrating technology, cognitive science, and psychometric theories. Psychologists, psychometricians, educators, and researchers in the field of human development studies will value this book.
