Freedom House (U.S.)

Countries at the Crossroads Freedom House (U.S.),2006 Countries at the Crossroads is an annual survey of government performance in 30 key countries worldwide that are at a critical crossroads in determining their political future. Crossroads provides a unique comparative tool for assessing government performance in the areas of civil liberties, rule of law, anticorruption and transparency, and accountability and public voice. Through narratives, numerical scores, and specific policy recommendations, the survey is an indispensable tool for policymakers, scholars, and the international community.

Greene's Protective Groups in Organic Synthesis Peter G. M. Wuts,Theodora W. Greene,2012-12-20 The Fourth Edition of Greene's Protective Groups in Organic Synthesis continues to be an indispensable reference for controlling the reactivity of the most common functional groups during a synthetic sequence. This new edition incorporates the significant developments in the field since publication of the third edition in 1998, including... New protective groups such as the fluorous family and the uniquely removable 2-

methoxybenzenesulfonyl group for the protection of amines New techniques for the formation and cleavage of existing protective groups, with examples to illustrate each new technique Expanded coverage of the unexpected side reactions that occur with protective groups New chart covering the selective deprotection of silyl ethers 3,100 new references from the professional literature The content is organized around the functional group to be protected, and ranges from the simplest to the most complex and highly specialized protective groups.

Extreme Mean Paula Todd, 2014-05-21 From one of Canada's foremost investigative writers, a groundbreaking exposé on the motives and machinations behind cyberabuse - tormenting, trolling, harassment, cyberbullying, stalking, and sexual extortion - and the toll it is taking on children, youth, and adults around the world. It seems as if each week our news broadcasts, newspaper headlines, Twitter feeds, and Facebook timelines are dominated by stories of cyberbullying and other digital abuse. This isn't the playground teasing and name-calling of generations before the Internet. This new abuse's unique characteristics - anonymity, permanence, and viral audience - can relentlessly exacerbate the humiliation, pain, and danger of its victims. Ugly rumours that once snaked through school hallways and around the office water cooler are now delivered at lightning speed to the world, while sexual extortion and revenge-porn sites target those who've shared intimate images or had them stolen by hackers. Cyberstalkers who target adults destroy reputations and careers. And the splendid connectivity of social media, such as Facebook and Twitter, also makes us vulnerable to interpersonal terrorism, while apps that promise privacy and rapid deletion are ridden with loopholes. With vivid reportage, Paula Todd goes deep into the world of extreme mean, uncovering the people who use the Internet to undermine lives rather than improve them. Through exclusive personal stories of online abuse from around the world, including the suicide of Amanda Todd and the untold costs of Rebecca Black's experience as the most hated girl on the Internet, as well as interviews with troll-tormentors, accidental abusers, victimized kids, and adults, Extreme Mean explores the often surprising roots of online abuse, challenges current academic thinking, and offers new ways of understanding the nasty and the nefarious who erode humanity and threaten Internet freedom. Provocative, astute and compelling, Extreme Mean is a shocking yet inspiring illustration of behaviour that affects all of us. It's a call-to-arms for change, and a search for ways to turn a moral panic into a moral possibility.

Women and Leadership in Higher Education During Global Crises

Schnackenberg, Heidi L., Simard, Denise A., 2021-05-21 Women leaders and the COVID-19 pandemic are currently trending in the news. Major news outlets are all offering their positive opinions on how world-wide women leaders have addressed the crisis and reassured their people. While this sort of press coverage is certainly uplifting, little to no research has been conducted to investigate the effectiveness of women's leadership decisions and strategies in these difficult times. In concert with these global struggles resulting from the pandemic are the challenges faced by higher education. Many colleges and universities have all but shuttered their doors and are conducting instruction, student support, and day-to-day business almost completely online. Women academic leaders bear a great load during global crises, with the combination of maintaining work responsibilities and caring for families and personal households. It is shown that women leaders may feel overwhelmed but remain heroes in unprecedented times of crisis. Women and Leadership in Higher Education During Global Crises informs readers and expands their understanding about specific challenges, issues, strategies, and solutions that are associated with women leaders in higher education, the implications during the current pandemic and other natural disasters, and how these strategies can be used for future agility and success. The chapters will cover narratives, strategies, and initiatives that women leaders are using to

lead their institutions, departments, sectors, and organizations. It ties together the unimaginable challenges, joys, struggles, and successes encountered by women in leadership in higher education and is ideal for higher education administrators, teachers, leaders, faculty, provosts, deans, program leaders, researchers, academicians, and students interested in both the challenges and successes women leaders in higher education face during global crises.

To Die Well Stephen Doran, 2023-10-25 Dr. Stephen Doran draws from his vast experience as a neurosurgeon, a bioethicist, and a permanent deacon to present the Catholic perspective on the art of dying well. The spiritual and moral issues related to death and the process of dying can be challenging and complicated. *To Die Well* provides a detailed yet readily understandable guide to these topics. Each chapter begins with a story from Dr. Doran's personal or professional life that not only provides context for the topic at hand but also gently draws the reader toward the personal realities of dying. The first part focuses on the moral issues that surround death and dying, including end-of-life medical decisions. The second part is devoted to the Catholic spiritual understanding of dying and the rites that accompany the death of a Catholic. *To Die Well* will help readers contemplate, pray about, and prepare for the end of their earthly lives.

Civil Society and Women Activists in the Middle East Wanda Krause, 2012-05-27 In the Middle East, and in Egypt in particular, there has always been a tendency to accord complete supremacy to the authority and might of the state, and to see 'society' as a separate, powerless entity. However, after the uprising of 2011, this assumption was turned on its head. And it is the wide range of political activity beyond the remit of the official state where Wanda Krause locates a dynamic potential for political change from the bottom up. She looks in particular at the influential role of women's private voluntary organisations in Egypt in shaping concepts of civil society and democracy. Exploring both secular and 'Islamist' organisations, she offers a steadfast critique of the view that Islamic women activists are insignificant, 'backward' or 'uncivil'. Krause's examination of women activists in Egypt today is vital for those interested in Middle East and Gender Studies, as well as those researching the wider issues of civil society and democratisation.

Modern Conflict and the Senses Nicholas J. Saunders, Paul Cornish, 2017-03-16 *Modern Conflict and the Senses* investigates the sensual worlds created by modern war, focusing on the sensorial responses embodied in and provoked by the materiality of conflict and its aftermath. The volume positions the industrialized nature of twentieth-century war as a unique cultural phenomenon, in possession of a material and psychological intensity that embodies the extremes of human behaviour, from total economic mobilization to the unbearable sadness of individual loss. Adopting a coherent and integrated hybrid approach to the complexities of modern conflict, the book considers

issues of memory, identity, and emotion through wartime experiences of tangible sensations and bodily requirements. This comprehensive and interdisciplinary collection draws upon archaeology, anthropology, military and cultural history, art history, cultural geography, and museum and heritage studies in order to revitalize our understandings of the role of the senses in conflict.

Intermediation of Insurance and Financial Services in European VAT Claus Bohn Jespersen,2011-01-01 The current European VAT legislation encompassing insurance and financial services, including intermediation thereof, dates back to the adoption of the Sixth VAT Directive in 1977. The definitions do not, however, encompass the current complexity of insurance and financial transactions. This has resulted in considerable confusion for fiscal authorities and for businesses when deciding upon the application of the VAT exemption. As the correct VAT treatment has a significant economic impact on businesses, a great number of cases have been referred to the Court of Justice of the European Union. This is also the reason why the European Commission presented its proposal for the future treatment of insurance and financial services, including intermediation thereof, in November 2007. The political process has not yet been finalised and if the Commission's proposal is agreed upon, the question of understanding the definitions still exists. This book deals with the exemption for intermediation of insurance and financial services within European VAT. This implies analysing the methods of interpretation applied by the Court of Justice of the European Union when interpreting the provisions regarding insurance and financial services. Furthermore, the current definitions for intermediation of insurance and financial services as provided for in the VAT Directive are analysed and conclusions are made in order to define a single concept of intermediation. These analyses are followed by various practical scenarios from case law of the Member States concerning intermediation of insurance and financial services. Finally, comments based on the analyses carried out are given on the European Commission's proposal for amending the VAT Directive and the accompanying Regulation regarding intermediation of insurance and financial services.

Domain Science and Engineering Dines Bjørner,2021-11-08 In this book the author explains domain engineering and the underlying science, and he then shows how we can derive requirements prescriptions for computing systems from domain descriptions. A further motivation is to present domain descriptions, requirements prescriptions, and software design specifications as mathematical quantities. The author's maxim is that before software can be designed we must understand its requirements, and before requirements can be prescribed we must analyse and describe the domain for which the software is intended. He does this by focusing on what it takes to analyse and describe domains. By a domain we understand a rationally describable discrete dynamics segment of human activity, of natural and man-made artefacts, examples include road, rail and air transport, container terminal ports, manufacturing, trade, healthcare, and urban planning. The book addresses issues of seemingly large systems, not small algorithms, and it emphasizes descriptions as formal, mathematical quantities. This is the first thorough monograph treatment of the new software engineering phase of software development, one that precedes requirements engineering. It emphasizes a methodological approach by treating, in depth, analysis and description principles, techniques and tools. It does this by basing its domain modeling on fundamental philosophical principles, a view that is new for a computer science monograph. The book will be of value to computer scientists engaged with formal specifications of software. The author reveals this as a field of interesting problems, most chapters include pointers to further study and exercises drawn from practical engineering and science challenges. The text is supported by a primer to the formal specification language RSL and

extensive indexes.

Milletts Ashwani Kumar, Vidisha Tomer, Mukul Kumar, Prince Chawla, 2024-01-29
Milletts are diverse small-seeded crops which are resilient to climatic stress, pests, and diseases. These can be grown in rainfed conditions with minimal agricultural inputs. These are considered nutritionally superior to other major cereals like rice, wheat, and maize as they contain a significant amount of protein, dietary fibre, and minerals. Today, milletts are recognized and considered as integral components of a sustainable food system. Milletts have low glycaemic index and are beneficial for diabetics. Millet protein is devoid of gluten, making them a better option than wheat for patients with gluten sensitivity. *Milletts: Cultivation, Processing, and Utilization* covers information on taxonomy, morphology, germplasm accessions, cultivation practices, harvesting methods, threshing, cleaning, storage, milling, structural and engineering properties, nutritional and anti-nutritional values, health benefits, food applications, by-products, non-food applications, quality standards, and prospects in millet processing. This book's sixteen in-depth chapters give readers complete information on all facets of millet cultivation, processing, and use. It is a unique compilation of information on milletts from farm to fork and beyond. This book will be useful for students, researchers, farmers, and entrepreneurs in understanding milletts and their applications. It has been compiled by experts in the field and can serve as a guidance document for the stakeholders.

Building High Integrity Applications with SPARK John W. McCormick, Peter C. Chapin, 2015-08-31
Software is pervasive in our lives. We are accustomed to dealing with the failures of much of that software – restarting an application is a very familiar solution. Such solutions are unacceptable when the software controls our cars, airplanes and medical devices or manages our private information. These applications must run without error. SPARK provides a means, based on mathematical proof, to guarantee that a program has no errors. SPARK is a formally defined programming language and a set of verification tools specifically designed to support the development of software used in high integrity applications. Using SPARK, developers can formally verify properties of their code such as information flow, freedom from runtime errors, functional correctness, security properties and safety properties. Written by two SPARK experts, this is the first introduction to the just-released 2014 version. It will help students and developers alike master the basic concepts for building systems with SPARK.
