The Solaris Effect Steven Dillon, 2010-01-01 What do contemporary American movies and directors have to say about the relationship between nature and art? How do science fiction films like Steven Spielberg's A.I. and Darren Aronofsky's π represent the apparent oppositions between nature and culture, wild and tame? Steven Dillon's intriguing new volume surveys American cinema from 1990 to 2002 with substantial descriptions of sixty films, emphasizing small-budget independent American film. Directors studied include Steven Soderbergh, Darren Aronofsky, Todd Haynes, Harmony Korine, and Gus Van Sant, as well as more canonical figures like Martin Scorsese, Robert Altman, David Lynch, and

Steven Spielberg. The book takes its title and inspiration from Andrei Tarkovsky's 1972 film *Solaris*, a science fiction ghost story that relentlessly explores the relationship between the powers of nature and art. The author argues that American film has the best chance of aesthetic success when it acknowledges that a film is actually a film. The best American movies tell an endless ghost story, as they perform the agonizing nearness and distance of the cinematic image. This groundbreaking commentary examines the rarely seen bridge between select American film directors and their typically more adventurous European counterparts. Filmmakers such as Lynch and Soderbergh are cross-cut together with Tarkovsky and the great French director, Jean-Luc Godard, in order to test the limits and possibilities of American film. Both enthusiastically cinephilic and fiercely critical, this book puts a decade of U.S. film in its global place, as part of an ongoing conversation on nature and art.

The Boko Haram Terror Miracle A. Adesina, Kehinde K. Kanmodi, Joav Merrick, 2019 Nigeria is the most populous nation in Africa, made up of multiple ethnic groups, cultures, and languages. She is a nation with world-acclaimed writers, scientists, and physicians who have created record breaking and award-winning contributions to their fields. Sadly, this great and mighty nation is plagued and attacked almost every week by militants from a deadly, brutal, barbarous, vicious, and dangerous sect called Boko Haram. Boko Haram is the most dangerous terrorist group in Nigeria, the actions of which have led to the injury and/or death of many people. This group evolved from a non-violent nuisance group to a brutal, cruel, and savage one. Boko Haram's activities have had and still have negative, destructive, and devastating effects on different aspects of Nigeria's economy. The impact of Boko Haram's terrorism on security, health, finance, tourism, and education in Nigeria and its people is the topic of focus in this book. Furthermore, the Boko Haram sect is a leading group that breaches the rights of children. It is common knowledge that the children are the future of any nation, and they need to be trained properly for a promising future. Ultimately, the individuals or groups breaching the rights of children need to be punished appropriately, for a better and glorious future for the children of Nigeria.

Respect, Plurality, and Prejudice Lene Auestad, 2018-05-15 This book helps us understand the current resurgence of social prejudice against ethnic minority groups, the logics of scapegoating and the resulting violence. Our time is characterised by a growth in

expressed hostility and violence towards people who are perceived as 'others'. Hatred towards and discrimination against minorities is on the rise. This book presents a new understanding of prejudice, racism, antisemitism, xenophobia, islamophobia, sexism and homophobia. It combines philosophy with psychoanalytic thinking, sociology and psycho-social studies, analysing the unconscious elements of social processes. The author makes a case for framing a questioning of prejudice, not in terms of normality versus pathology or deviance, but in what is socially unconscious. Hypocrisy and double standards are inherent in our social practices, reflecting the contradictions present in our thinking about these issues: that we both believe and do not believe in equality.

The Chemical Muse D. C.A. Hillman, Ph.D.,2014-09-30 The last wild frontier of classical studies. ---The Times (UK) The Chemical Muse uncovers decades of misdirection and obfuscation to reveal the history of widespread drug use in Ancient Rome and Greece. In the city-states that gave birth to Western civilization, drugs were an everyday element of a free society. Often they were not just available, but vitally necessary for use in medicine, religious ceremonies, and war campaigns. Their proponents and users existed in all classes, from the common soldier to the emperor himself. Citing examples in myths,

medicine, and literature, D. C. A. Hillman shows how drugs have influenced and inspired the artists, philosophers, and even politicians whose ideas have formed the basis for civilization as we know it. Many of these ancient texts may seem well-known, but Hillman shows how timid, prudish translations have left scholars and readers in the dark about the reality of drug use in the Classical world. Hillman's argument is not simply pro-drug. Instead, he appeals for an intellectual honesty that acknowledges the use of drugs in ancient societies despite today's conflicting social mores. In the modern world, where academia and university life are often politically charged, *The Chemical Muse* offers a unique and long overdue perspective on the contentious topic of drug use and the freedom of thought.
