Information and Communications for Development 2018 World Bank,2018-11-08 The Information and Communications for Development series looks in depth at how information and communications technologies are affecting economic growth in developing countries. This new report, the fourth in the series, examines the topic of data-driven development, or how better information makes for better policies. The objective is to assist developing-country firms and

governments in unlocking the value of the data they hold for better service delivery and decision making and to empower individuals to take more control of their personal data. We are undoubtedly experiencing a data revolution in which our ability to generate, process, and utilize information has been magnified many times over by the machines that we increasingly rely upon. This report is about how the data revolution is changing the behavior of governments, individuals, and firms and how these changes affect the nature of development: economic, social, and cultural. How can governments extract value from data to improve service delivery in the same way that private companies have learned to do for profit? Is it feasible for individuals to take ownership of their own data and to use it to improve their livelihoods and quality of life? Can developing-country firms compete with the internet majors on their own turf and be even more innovative in their use of data to serve local customers better? Though the report is aimed primarily at government policy makers, it also has great relevance for individuals concerned about how their personal data is used and how the data revolution might affect their future job prospects. For private sector firms, particularly those in developing countries, the report suggests how they might expand their markets and improve their competitive edge. For development professionals, the report provides guidance on how they might use data more creatively to tackle long-standing global challenges, such as eliminating extreme poverty, promoting shared prosperity, or mitigating the effects of climate change. The report's chapters explore different themes associated with the supply of data, the technology underlying it, and the demand for it. An overview chapter focuses on government use of data and presentation of definitions. Part I of the report then looks at the "supply side" of the data sector, with chapters on data connectivity and capacity (where data comes from, how it is stored, and where it goes) and data technology (specifically big data analytics and artificial intelligence) and how this is contributing to development. Part II looks at the sector's "demand side," with a chapter on people's use of data and another that examines how firms use digital platforms in the data economy and how that contributes to competitiveness. Part III brings together the policy implications for developing-country stakeholders, with a chapter considering government policies for data, including data protection and privacy. A closing Data Notes appendix looks at statistical indicators associated with the use of data and presents the 2018 update of the Digital Adoption Index (DAI), a composite indicator introduced in the 2016 World Development Report: Digital Dividends.

Advances in Digital Forensics XIV Gilbert Peterson, Sujeet Shenoi, 2018-08-29 ADVANCES IN DIGITAL FORENSICS XIV

Edited by: Gilbert Peterson and Sujeet Shenoi Digital forensics deals with the acquisition, preservation, examination, analysis and presentation of electronic evidence. Computer networks, cloud computing, smartphones, embedded devices and the Internet of Things have expanded the role of digital forensics beyond traditional computer crime investigations. Practically every crime now involves some aspect of digital evidence; digital forensics provides the techniques and tools to articulate this evidence in legal proceedings. Digital forensics also has myriad intelligence applications; furthermore, it has a vital role in information assurance - investigations of security breaches yield valuable information that can be used to design more secure and resilient systems. Advances in Digital Forensics XIV describes original research results and innovative applications in the discipline of digital forensics. In addition, it highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations. The areas of coverage include: Themes and Issues; Forensic Techniques; Network Forensics; Cloud Forensics; and Mobile and Embedded Device Forensics. This book is the fourteenth volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.9 on Digital Forensics, an international community of scientists, engineers and practitioners dedicated to advancing the state of the art of research and practice in digital forensics. The book contains a selection of nineteen edited papers from the Fourteenth Annual IFIP WG 11.9 International Conference on Digital Forensics, held in New Delhi, India in the winter of 2018. Advances in Digital Forensics XIV is an important resource for researchers, faculty members and graduate students, as well as for practitioners and individuals engaged in research and development efforts for the law enforcement and intelligence communities. Gilbert Peterson, Chair, IFIP WG 11.9 on Digital Forensics, is a Professor of Computer Engineering at the Air Force Institute of Technology, Wright-Patterson Air Force Base, Ohio, USA. Sujeet Shenoi is the F.P. Walter Professor of Computer Science and a Professor of Chemical Engineering at the University of Tulsa, Tulsa, Oklahoma, USA.

The Films of Edgar G. Ulmer Bernd Herzogenrath, 2009-05-20 Considered the 'King of Poverty Row,' Edgar G. Ulmer (1904-1972) was an auteur of B productions. A filmmaker with an individual voice, Ulmer made independent movies before that category even existed. From his early productions like *The Black Cat* (1934) and Yiddish cinema of the late 1930s to his final films of the late 1950s and early 1960s, Ulmer created enduring works within the confines of economic constraints. Almost forgotten, Ulmer was rediscovered first in the 1950s by the French critics of the *Cahiers du Cinema* and then in the early 1970s by young American directors, notably Peter Bogdanovich. But who was Edgar G. Ulmer? The essays in this anthology attempt to shed some light on the director and the films he created_films that are great possibly because of, rather than despite, the many restrictions Ulmer endured to make them. In *The Films of Edgar G. Ulmer*, Bernd Herzogenrath has assembled a collection of essays that pay tribute to Ulmer's work and focus not only on his well-known films, including *Detour*, but also on rare gems such as *From Nine to Nine* and *Strange Illusion*. In addition to in-depth analyses of Ulmer's work, this volume also features an interview with Ulmer's wife and an interview Ulmer gave in 1965, in which he comments on actors Bela Lugosi and

Boris Karloff, as well as fellow directors Tod Browning and James Whale.

Post-Pop Cinema Jesse Fox Mayshark, 2007-05-30 Starting in the early 1990s, artists such as Quentin Tarantino, David Foster Wallace, and Kurt Cobain contributed to a swelling cultural tide of pop postmodernism that swept through music, film, literature, and fashion. In cinema in particular, some of the arts most fundamental aspects—stories, characters, and genres, for instance—assumed such a trite and trivialized appearance that only rarely could they take their places on the screen without provoking an inward smirk or a wink from the audience. Out of this highly self-conscious and world-weary environment, however, a new group of filmmakers began to develop as the decade wore on, with a new set of styles and sensibilities to match. In Post-Pop Cinema author Jesse Fox Mayshark takes us on a film-by-film tour of the works of these filmmakers—including Wes and P. T. Anderson, Sofia Coppola, Richard Linklater, Alexander Payne, and David O. Russell—and seeks to reveal how a common pool of styles, collaborators, and personal connections helps them to confront the unifying problem of meaning in American film. Wes Anderson's *Bottle Rocket* (1996) and Paul Thomas Anderson's *Boogie Nights* (1997) were ultimately about their characters' lives—even though their characters often dealt with highly contrived environments and situations. And soon after Wes Anderson scored his first success, others like David O. Russell (*Flirting With Disaster*, *Three Kings*), the screenwriter Charlie Kaufman (who collaborated with Spike Jonze on such projects as *Being John Malkovich* and *Adaptation*), Alexander Payne (*Election*, *Sideways*), Richard Kelly (*Donnie Darko*), and Sofia Coppola (*Lost in Translation*) began to tread their own paths over this same ground. Although these men and women represent

a wide range of styles and subject matter, all their films revolve in different ways around the difficulty of establishing and maintaining connections. This theme of connection also runs deeper than the films made: the directors share actors (Mark Wahlberg, Bill Murray, Ben Stiller, Jason Schwartzman), collaborators (the musician Jon Brion) and sometimes even personal connections (Spike Jonze starred in Russell's *Three Kings*, and was married to Coppola). Together these filmmakers form a loose and distinctly American school of filmmaking, one informed by postmodernism but not in thrall to it, and one that every year becomes more important to the world of cinema both within and beyond the United States.
