*Time-Sensitive Remote Sensing* Christopher D. Lippitt,Douglas A. Stow,Lloyd L. Coulter,2015-06-02

This book documents the state of the art in the use of remote sensing to address time-sensitive information requirements. Specifically, it brings together a group of authors who are both researchers and practitioners, who work toward or are currently using remote sensing to address time-sensitive information requirements with the goal of advancing the effective use of remote sensing to supply time-sensitive information. The book addresses the theoretical implications of time-sensitivity on the remote sensing process, assessments or descriptions of methods for expediting the delivery and improving the quality of information derived from remote sensing, and describes and analyzes time-sensitive remote sensing applications, with an emphasis on lessons learned. This book is intended for remote sensing scientists, practitioners (e.g., emergency responders or administrators of emergency response agencies), and students, but will also be of use to those seeking to understand the potential of remote sensing to address a range of pressing issues, particularly natural and anthropogenic hazard response.

Munitions of the mind Philip M. Taylor,2013-07-19 New edition of a classic work on the history of propaganda. Topical new chapters on the 1991 Gulf War, September 11 and terrorism. An ideal textbook for all international courses covering media and communication studies. Considers the history of propaganda and how it has become increasingly pervasive due to access to ever-complex and versatile media. Written in an accessible style and format, this book has proven its appeal to the general reader as the public becomes more and more cynical of the manipulations of the political sphere.

**Security on IBM z/VSE** Helmut Hellner,Ingo Franzki,Antoinette Kaschner,Joerg Schmidbauer,Heiko Schnell,Klaus-Dieter Wacker,IBM Redbooks,2018-06-14 One of a firm's most valuable resources is its data: client lists, accounting data, employee information, and so on. This critical data must be securely managed and controlled, and simultaneously made available to those users authorized to see it. The IBM® z/VSE® system features extensive capabilities to simultaneously share the firm's data among multiple users and protect them. Threats to this data come from various sources. Insider threats and malicious hackers are not only difficult to detect and prevent, they might be using resources with the business being unaware. This IBM Redbooks® publication was written to assist z/VSE support and security personnel in providing the enterprise with a safe, secure and manageable environment. This book provides an overview of the security that is provided by z/VSE and the processes for the implementation and configuration of z/VSE security components, Basic Security Manager (BSM), IBM CICS® security, TCP/IP security, single sign-on using LDAP, and connector security.

**Computer Attack and Cyberterrorism** Clay Wilson,2009 Many international terrorist groups now actively use computers and the Internet to communicate, and several may develop or acquire the necessary technical skills to direct a co-ordinated attack against computers in the United States. A cyberattack intended to harm the U.S. economy would likely target computers that operate the civilian critical infrastructure and government agencies. However, there is disagreement among some observers about

whether a co-ordinated cyberattack against the U.S. critical infrastructure could be extremely harmful, or even whether computers operating the civilian critical infrastructure actually offer an effective target for furthering terrorists' goals. While there is no published evidence that terrorist organisations are currently planning a co-ordinated attack against computers, computer system vulnerabilities persist world-wide, and initiators of the random cyberattacks that plague computers on the Internet remain largely unknown. Reports from security organisations show that random attacks are now increasingly implemented through use of automated tools, called bots, that direct large numbers of compromised computers to launch attacks through the Internet as swarms. The growing trend toward the use of more automated attack tools has also overwhelmed some of the current methodologies used for tracking Internet cyberattacks. This book provides background information for three types of attacks against computers (cyberattack, physical attack, and electromagnetic attack), and discusses related vulnerabilities for each type of attack. The book also describes the possible effects of a co-ordinated cyberattack, or computer network attack (CNA), against U.S. infrastructure computers, along with possible technical capabilities of international terrorists. Issues for Congress may include how could trends in cyberattacks be measured more effectively; what is appropriate guidance for DOD use of cyberweapons; should cybersecurity be combined with, or remain separate from, the physical security organization within DHS; how can commercial vendors be encouraged to improve the security of their products; and what are options to encourage U.S. citizens to follow better cybersecurity practices? Appendices to this book describe computer viruses, spyware, and bot networks, and how malicious programs are used to enable cybercrime and cyberespionage. Also, similarities are drawn between planning tactics currently used by computer hackers and those used by terrorists groups for conventional attacks.

*A Naturalist's Guide to the Great Plains* Paul A. Johnsgard, 2018 This book documents nearly 500 US and Canadian locations where wildlife refuges, nature preserves, and similar properties protect natural sites that lie within the North American Great Plains, from Canada's Prairie Provinces to the Texas-Mexico border. Information on site location, size, biological diversity, and the presence of especially rare or interesting flora and fauna are mentioned, as well as driving directions, mailing addresses, and phone numbers or internet addresses, as available. US federal sites include 11 national grasslands, 13 national parks, 16 national monuments, and more than 70 national wildlife refuges. State properties include nearly 100 state parks and wildlife management areas. Also included are about 60 national and provincial parks, national wildlife areas, and migratory bird sanctuaries in Canada's Prairie Provinces. Many public-access properties owned by counties, towns, and private organizations are also described.

*Human-Computer Interaction. Applications and Services* Masaaki Kurosu, 2014-06-09 The 3-volume set LNCS 8510, 8511 and 8512 constitutes the refereed proceedings of the 16th International Conference on Human-Computer Interaction, HCII 2014, held in Heraklion, Crete, Greece in June 2014. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences was carefully reviewed and selected from 4766 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas.

**Enhanced Networking on IBM z/VSE** Joerg Schmidbauer, Jeffrey Barnard, Ingo Franzki, Karsten Graul, Don Stoeber, Rene Trumpp, IBM Redbooks, 2014-12-31 The importance of modern computer networks is steadily growing as increasing amounts of data are exchanged over company intranets and the Internet. Understanding current networking technologies and communication protocols that are available

for the IBM® mainframe and System z® operating systems is essential for setting up your network infrastructure with IBM z/VSE®. This IBM Redbooks® publication helps you install, tailor, and configure new networking options for z/VSE that are available with TCP/IP for VSE/ESA, IPv6/VSE, and Fast Path to Linux on System z (Linux Fast Path). We put a strong focus on network security and describe how the new OpenSSL-based SSL runtime component can be used to enhance the security of your business. This IBM Redbooks publication extends the information that is provided in Security on IBM z/VSE, SG24-7691.

**Advances in Geroscience** Felipe Sierra, Ronald Kohanski, 2015-11-10 This book provides the first comprehensive overview of a new scientific discipline termed Geroscience. Geroscience examines the molecular and cellular mechanisms that might explain why aging is the main risk factor for most chronic diseases affecting the elderly population. Over the past few decades, researchers have made impressive progress in understanding the genetics, biology and physiology of aging. This book presents vital research that can help readers to better understand how aging is a critical malleable risk factor in most chronic diseases, which, in turn, could lead to interventions that can help increase a healthy lifespan, or 'healthspan.' The book begins with an analysis of the Geroscience hypothesis, as well as the epidemiological underpinnings that define aging as a candidate main risk factor for most chronic diseases. Next, each chapter focuses on one particular disease, or group of diseases, with an emphasis on how basic molecular and cellular biology might explain why aging is a major risk factor for it. Coverage in the book includes: cancer, cardiovascular disease, dementias, stroke, Parkinson's and Alzheimer's diseases, osteoporosis, arthritis, diabetes asthma, emphysema, kidney disease, vision impairment, and AIDS/HIV. It finishes with a chapter on pain in the elderly and an overview of future steps needed to bring the newly acquired knowledge into the clinic and the public at large.

Haunted Indiana 4 Mark Marimen, 2005-09 Haunted Indiana 4 delves once more into the eerie side of Indiana history with new and old tales from across the state: \* The spirit of America's most prolific female serial killer who is said to haunt her former home in La Porte; \* The ghost of a grave robber said to walk the paths of a cemetery in New Albany; \* A ghost town near Nashville that truly lives up to the term Ghost Town; \* The gentle story of a grandfather's spirit who made a phone call from beyond the grave to aid his granddaughter when she needed it most; \* Tales of enigmatic spirits of former prisoners who are serving a more than life sentence at the Old Jail Museum in Valparaiso; \* A series of ghostly tales told within the ranks of the police from across the state; and many more. . . Also included in Haunted Indiana 4 is an audio CD narrated by Mark Marimen with four stories - including one never before published.

International Energy Annual, 1995 W. Calvin Kilgore, 1997-12 Will keep the public and other interested parties fully informed of primary energy supplies on a global basis. Presents an overview of key international energy trends for production, consumption, imports, and exports of primary energy commodities in over 220 countries, dependencies, and areas of special sovereignty. Also included are population and gross domestic product data, as well as prices for crude oil and petroleum products in selected countries. Renewable energy reports in this annual includes hydroelectric power, geothermal, solar and wind electric power and alcohol for fuel. Extensive charts and tables.

The Rozabal Line Shawn Haigins, 2007-09-21 The tomb of Rozabal in Kashmir has contained the body of a great saint called Yuz Asaf since 112 A.D. But who was Yuz Asaf and what secret does the ancient tomb contain? Father Vincent Morgan is unwittingly sucked into the Rozabal tornado when flashes of his own previous lifetimes reveal some uncomfortable truths about the life and death of Jesus Christ. Vincent is soon caught in the crossfire between the Osama-bin-Laden inspired warriors of Islam, led by Ghalib-bin-Isar, and the fundamentalists of the Crux Decussata Permuta. The secret held securely within Rozabal for two millennia threatens to upset the world's balance of power. Zipping around the world caught up in a whirlwind of events, people, religion and time, from Jesus to Muhammad; from the Crusades to 9/11; from the Vatican to the White House; from Skull & Bones to the Illuminati; from Buddhist meditation to past-life regression; from the Virgin birth to nuclear destruction; and from Mary Magdalene to Osama-bin-Laden; The Rozabal Line has it all.
