Rising Above the Gathering Storm Institute of Medicine, National Academy of Engineering, National Academy of Sciences, Committee on Science, Engineering, and Public Policy, Committee on Prospering in the Global Economy of the 21st Century: An Agenda for American Science and Technology, 2007-03-08 In a world where advanced knowledge is widespread and low-cost labor is readily available, U.S. advantages in the marketplace and in science and technology have begun to erode. A comprehensive and coordinated federal effort is urgently needed to bolster U.S. competitiveness and pre-eminence in these areas. This congressionally requested report by a pre-eminent committee makes four recommendations along with 20 implementation actions that federal policy-makers should take to create high-quality jobs and focus new science and technology efforts on meeting the nation's needs, especially in the area of clean, affordable energy: 1) Increase America's talent pool by vastly improving K-12 mathematics and science education; 2) Sustain and strengthen the nation's commitment to long-term basic research; 3) Develop, recruit, and retain top students, scientists, and engineers from both the U.S. and abroad; and 4) Ensure that the United States is the premier place in the world for innovation. Some actions will involve changing existing laws, while others will require financial support that would come from reallocating existing budgets or increasing them. *Rising Above the Gathering Storm* will be of great interest to federal and state government agencies, educators and schools, public decision makers, research sponsors, regulatory analysts, and scholars.

The world universities' response to COVID-19: remote online language teaching Nebojša Radić, Anastasia Atabekova, Maria Freddi, Josef Schmied, 2021-05-24 This collection of case studies is special for several reasons. Firstly, because of the geographical and institutional diversity of the authors, bringing together experiences of teaching under COVID-19 restrictions in the university language classroom from 18 countries and five continents. Secondly, the publication is interesting because of the variety of case studies that testify to different strategies and emphases in dealing with pandemic-related challenges. Finally, the case studies collected strikingly demonstrate the creative responses of language teachers in a variety of contexts to meet the challenges of the pandemic crisis (Dr Sabina Schaffner).

Science for Environmental Protection National Research Council, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on Science for EPA's Future, 2012-12-21 In anticipation of future environmental science and engineering challenges and technologic advances, EPA asked the National Research Council (NRC) to assess the overall capabilities of the agency to develop, obtain, and use the best available scientific and technologic information and tools to meet persistent, emerging, and future mission challenges and opportunities. Although the committee cannot predict with certainty what new environmental problems EPA will face in the next 10 years or more, it worked to identify some of the common drivers and common characteristics of problems that are likely to occur. Tensions inherent to the structure of EPA's work contribute to the current and persistent challenges faced by the agency, and meeting those challenges will require development of leading-edge scientific methods, tools, and technologies, and a more deliberate approach to systems thinking and interdisciplinary science. *Science for Environmental Protection: The Road Ahead* outlines a framework for building science for environmental protection in the 21st century and identified key areas where enhanced leadership and capacity can strengthen the agency's abilities to address current and emerging environmental challenges as well as take advantage of new tools and technologies to address them. The foundation of EPA science is strong, but the agency needs to continue to address numerous present and future challenges if it is to maintain its science leadership and meet its expanding mandates.

Crime in the Art and Antiquities World Stefano Manacorda, Duncan Chappell, 2011-02-26 The theft, trafficking, and falsification of cultural property and cultural heritage objects are crimes of a particularly complex nature, which often have international ramifications and significant economic consequences. Organized criminal groups of various types and origins are involved in these illegal acts. The book *Crime in the Art and Antiquities World* has contributions both from researchers specializing in the illegal trafficking of art, and representatives of international institutions involved with prevention and detection of cultural property-related crimes, such as Interpol and UNESCO. This work is a unique and useful reference for scholars and private and public bodies alike. This innovative volume also includes an Appendix of the existing legal texts, i.e. international treaties, conventions, and resolutions, which have not previously been available in a single volume. As anyone who has undertaken research or study relating to the protection of cultural heritage discovers one of the frustrations encountered is the absence of ready access to the multi- various international instruments which exist in the field. Since the end of the Second World War these instruments have proliferated, first in response to increasing recognition of the need for concerted multinational action to give better protection to cultural property during armed conflict as well as ensuring the repatriation of cultural property looted during such conflict. Thus the international community agreed in 1954 upon a Convention for the Protection of Cultural Property in the Event of Armed Conflict. That Convention, typically referred to as the Hague Convention of 1954, is now to be found reproduced in the Appendix to this book (Appendix I) together with 25 other important and diverse documents that we believe represent a core of the essential international sources of reference in this subject area. In presenting these documents in one place we hope that readers will now experience less frustration while having the benefit of supplementing their understanding and interpretation of the various instruments by referring to individual chapters in the book dealing with a particular issue or topic. For example, Chapter 9 by Mathew Bogdanos provides some specific and at times rather depressing descriptions of the application in the field of the Hague Convention 1954, and its Protocols (Appendices II and III), to the armed conflict in Iraq. Reference may also be had to the resolution of the UN Security Council in May 2003 (Appendix VI) urging Member States to take appropriate steps to facilitate the safe return of looted Iraqi cultural property taken from the Iraq National Museum, the National Library and other locations in Iraq. Despite such pleas the international antiquities market seems to have continued to trade such looted property in a largely unfettered manner, as demonstrated by Neil Brodie in Chapter 7. Fittingly, as referred to in the Preface to this book, the last document contained in the Appendix (Appendix 26) is the “Charter of Courmayeur”, formulated at a ground breaking international workshop on the protection

of cultural property conducted by the International Scientific and Professional Advisory Council (ISPAC) to the United Nations Crime Prevention and Criminal Justice Program in Courmayeur, Italy, in June 1992. The Charter makes mention of many of the instruments contained in the Appendix while also foreshadowing many of the developments which have taken place in the ensuing two decades designed to combat illicit trafficking in cultural property through international collaboration and action in the arena of crime prevention and criminal justice.

This Mighty Scourge James M. McPherson,2009-10-12 The author of the Pulitzer Prize-winning Battle Cry of Freedom and the New York Times bestsellers Crossroads of Freedom and Tried by War, among many other award-winning books, James M. McPherson is America's preeminent Civil War historian. In this collection of provocative and illuminating essays, McPherson offers fresh insight into many of the enduring questions about one of the defining moments in our nation's history. McPherson sheds light on topics large and small, from the average soldier's avid love of newspapers to the postwar creation of the mystique of a Lost Cause in the South. Readers will find insightful pieces on such intriguing figures as Harriet Tubman, John Brown, Jesse James, and William Tecumseh Sherman, and on such vital issues as Confederate military strategy, the failure of peace negotiations to end the war, and the realities and myths of the Confederacy. This Mighty Scourge includes several never-before-published essays--pieces on General Robert E. Lee's goals in the Gettysburg campaign, on Lincoln and Grant in the Vicksburg campaign, and on Lincoln as Commander-in-Chief. All of the essays have been updated and revised to give the volume greater thematic coherence and continuity, so that it can be read in sequence as an interpretive history of the war and its meaning for America and the world. Combining the finest scholarship with luminous prose, and packed with new information and fresh ideas, this book brings together the most recent thinking by the nation's leading authority on the Civil War.

The Spelit Power Matrix June H. Schmieder-Ramirez,June Schmieder-Ramirez Ph. D.,Leo A. Mallette,2007-05-30 The SPELIT POWER MATRIX is a leadership tool for untangling the organizational environment from a social, political, economic, legal, intercultural and technical view. The SPELIT analysis method was developed for adult learners to have a framework for determining and formulating the answer to the question: What is? There is a need to analyze the environment in all organizations, whether you are entering a new organization or to benchmark the existing organization. The purpose of this text is to show how perceptive leaders can analyze environments in preparation for possible future action. We demonstrate how the methodology aligns with previous theories regarding environmental scanning and produces a workable framework for the perceptive leader. The SPELIT POWER MATRIX is intended for practitioners doing a market analysis or diagnosis prior to implementing transitions, benchmarking in anticipation of an intervention, and can be used by undergraduate students and seasoned practitioners.
