Meeting Asia's Infrastructure Needs Asian Development Bank,2017-02-01 Infrastructure is essential for development. This report presents a snapshot of the current condition of developing Asia's infrastructure---defined here as transport, power, telecommunications, and water supply and sanitation. It examines how much the region has been investing in infrastructure and what will likely be needed through 2030. Finally, it analyzes the financial and institutional challenges that will shape future infrastructure investment and development.

WEB-BASED INFORMATION TECHNOLOGIES AND DISTRIBUTED SYSTEMS Quan Z Sheng,2010-06-01 The Fourth International Conference on Signal-Image Technology & Internet-Based Systems (SITIS 2008) has been successfully held during the period 30th November to 3rd of December of the year 2008 in Bali, Indonesia. The Track Web-Based Information Technologies & Distributed Systems (WITDS) is one of the four tracks of the conference. The track is devoted to emerging and novel concepts, architectures and methodologies for creating an interconnected world in which information can be exchanged easily, tasks can be processed collaboratively, and communities of users with similar interests can be formed while addressing security threats that are present more than ever before. The track has attracted a large number of submissions; only 17 papers have been accepted with acceptance rate 27%. After the successful presentations of the papers during the conference, the track chairs have agreed with Atlantis publisher to publish the extended versions of the papers in a book. Each paper has been extended with a minimum of 30% new materials from its original conference manuscript. This book contains these extended versions as chapters after a second round of reviews and improvement. The book is an excellent resource of information to researchers and it is based on four themes; the first theme is on advances in ad-hoc and routing protocols, the second theme focuses on the latest techniques and methods on intelligent systems, the third theme is a latest trend in Security and Policies, and the last theme is applications of algorithms design methodologies on web based systems.

Equal Access for Students with Disabilities Lisa M. Meeks, PhD,Neera R. Jain, MS, CRC,Elisa Laird, JD,2020-11-28 Note to Readers: Publisher does not guarantee quality or access to any included digital components if book is purchased through a third-party seller. A vital resource for ensuring students with disabilities have access to appropriate, legal, and necessary accommodations Now in its second edition, this book on disability inclusion in the health sciences remains the most comprehensive, critically and legally informed guidance available to health science programs. Grounded in the ADA, case law, and OCR determinations, this seminal text delivers information that is translatable to daily practice. The second edition focuses on disability as a welcome form of diversity, with concomitant changes to language and approach that promote disability inclusion. New chapters and updates on topics including technical standards; a new appendix to guide faculty communication; and revised advice throughout, provide faculty, student affairs and disability professionals with the most up-to-date practices. The text delivers updated legal guidance and case references, assistance in benchmarking office policies and practices, new case studies, and a review chapter for teaching and assessing learning. New examples impart the best decision-making practices, describe what to do when things go awry, and discuss how to avoid problems by implementing strong accessibility-focused policies. Written by noted educators and practitioners at prestigious health science schools, this text is backed by years of practice and expertise. It is written in an easy-to-read, engaging manner that makes disability inclusion and disability law accessible to all. New to the Second Edition: Focus on the importance of fully-inclusive education for health care practitioners Real-world informed case studies that demonstrate best practices New and updated advice highlighting recent legal decisions New chapter on technical standards Updated guidance to inform office policies and practices Chapter specific review questions for teaching and self-assessment Expanded discussion of clinical accommodations Updated guides for high stakes exams, including new personal statement prompts Communication guide for faculty Key Features: Addresses all aspects of disability, including disability law, for students in health science settings Delivers information directly applicable to practice Accessibly written by esteemed and experienced practitioners and educators Includes easy-to-follow flowcharts Supports professional development in an affordable format

The State of Open Data Davies, Tim,Walker, Stephen B.,Rubinstein, Mor,2019-05-22 It's been ten years since open data first broke onto the global stage. Over the past decade, thousands of programmes and projects around the world have worked to open data and use it to address a myriad of social and economic challenges. Meanwhile, issues related to data rights and privacy have moved to the centre of public and political discourse. As the open data movement enters a new phase in its evolution, shifting to target real-world problems and embed open data thinking into other existing or emerging communities of practice, big questions still remain. How will open data initiatives respond to new concerns about privacy, inclusion, and artificial intelligence? And what can we learn from the last decade in order to deliver impact where it is most needed? The State of Open Data brings together over 60 authors from around the world to address these questions and to take stock of the real progress made to date across sectors and around the world, uncovering the issues that will shape the future of open data in the years to come.

Spanish Economic Growth, 1850-2015 Leandro Prados de la Escosura,2017-09-04 This book is open access under a CC BY 4.0 license. This text offers a comprehensive and nuanced view of the economic development of Spain since 1850. It provides a new set of

historical GDP estimates for Spain from the demand and supply sides, and presents a reconstruction of production and expenditure series for the century prior to the introduction of modern national accounts. The author splices available national accounts sets over the period 1958–2015 through interpolation, as an alternative to conventional retropolation. The resulting national accounts series are linked to the historical estimates providing yearly series for GDP and its components since 1850. On the basis of new population estimates, the author derives GDP per head, decomposed into labour productivity and the amount of work per person, and placed into international perspective. With theoretical reasoning and historiographical implications, Prados de la Escosura provides a useful methodological reference work for anyone interested in national accounting. Open Access has been made possible thanks to Fundación Rafael del Pino's generous support. You can find the full dataset here: <http://espacioinvestiga.org/bbdd-chne/?lang=en> 'This book stands among the classics for the Kuznetian paradigm in empirical economics. This is the definitive study of Spain's transition to a modern economy.' —Patrick Karl O'Brien, Emeritus Fellow at St. Antony's College, the University of Oxford, UK, and Professor Emeritus of Global Economic History at the London School of Economics and Political Science, UK 'The definitive account of Spanish economic growth since 1850, based firmly on a magisterial reconstruction of that country's national accounts and an unrivalled knowledge of both Spanish and global economic history of the period.' —Stephen Broadberry, Professor of Economic History at Nuffield College, the University of Oxford, UK

International Trade in Services Olivier Cattaneo, Michael Engman, Sebastián S ez, Robert M. Stern, 2010-06-24 The services sector is key to economic growth, competitiveness, and poverty alleviation. Comprising more than two-thirds of the world economy, services are now commonly traded across borders, helped by technological progress and the increased mobility of persons. In recent years, a number of developing countries have looked at trade in services as a means to both respond to domestic supply shortages and to diversify and boost exports. Any country can tap into the trade potential of services, but not every country can become a services hub across sectors. The opening of the services sector potentially comes with large benefits, but also fears and costs that should not be overlooked. This book provides useful guidelines for the assessment of a country's trade potential, and a roadmap for successful opening and export promotion in select services sectors. It looks at both the effects of increased imports and exports, and provides concrete examples of developing country approaches that have either succeeded or failed to maximize the benefits and minimize the risks of opening. It focuses on sectors that have been rarely analyzed through the trade lens, and/or have a fast growing trade potential for developing countries. These sectors are: accounting, construction, distribution, engineering, environmental, health, information technology, and legal services. This book is designed for non-trade specialists to understand how trade can help improve access to key services in developing countries, and for trade specialists to understand the specific characteristics of each individual sector. It will be a useful tool for governments to design successful trade opening or promotion strategies, and for the private sector and consumers to advocate sound domestic policy reforms accompanying an offensive trade agenda.

Greenhorns Zoe Ida Bradbury, Severine von Tscharner Fleming, Paula Manalo, 2012-05-08 The Greenhorns are a community of more than 5,000 young farmers and activists committed to producing and advocating for food grown with vision and respect for the earth. This book, edited by three of the group's leading members, comprises 50 original essays by new farmers who write about their experiences in the field from a wide range of angles, both practical and inspirational. Funny and sad, serious and light-hearted, these essays touch on everything from financing and machinery to family, community building, and social change.

The Harper Record Teresa Healy, 2008 The Harper government's policies are moving our country backwards toward a vision of society, the role of government, and the nature of the federation reminiscent of the 1920s. [...] As the government tried to liberalize markets in grains, the Wheat Board CEO was fired 14 The Harper Record and the government worked to prevent Board members from speaking out in support of the marketing board. [...] The report of the Iacobucci Commission was originally meant to be submitted the week before the 2008 election was called, but was delayed until the week after the election.⁹ Both the Liberals who were in power during the events in question and the Conservatives, who are in favour of the anti-terrorist agenda, were thus spared public scrutiny on these issues during the election campaign. [...] Conclusion In the 32 months that the Conservative minority government was in power between 2006 and 2008, the people of Canada faced significant challenges because of the substance of what the Harper government achieved and because of the anti-democratic way in which he went about it. [...] In a 1989 memo to Preston Manning, he argued that the core political cleavage in contemporary Western democracies pits taxpayers and private sector-oriented citizens (the ideological right) against the public sector-oriented political class and tax recipients of the Welfare State (the ideological left).¹⁷ The conservative coalition of the right would include the corporate sector and the private.

In The Company Of Owners Joseph Blasi, Douglas Kruse, Aaron Bernstein, 2003-01-02 The string of business scandals that recently engulfed America painted a picture of corporate chieftains lining their pockets by cutting corners, cooking the books, and duping gullible investors. In doing so, greedy CEOs have hijacked what could be one of the most important business innovations in decades: stock options for all employees. Joseph Blasi, Douglas Kruse, and Aaron Bernstein—all leading experts on employee ownership—show how American companies would perform much better if they followed the lead of many high-tech firms and granted options to their entire workforce, rather than to just a tiny corporate elite. Using SEC data in a way never done before, they document the vast wealth executives have accumulated for themselves. It shows how the abuse of options has taken place not just at scandal-ridden companies such as Enron and WorldCom, but across the entire reach of corporate America. In the Company of Owners argues that there's a better way. Broad-employee ownership through stock options offers a new model for U.S. corporations and American capitalism. The authors explain how employees and shareholders alike would benefit if most large companies adopted what they call the partnership capitalism approach—using options to encourage employees to think and act like owners. A searing critique of business as usual in America's executive suites, this book offers a comprehensive vision for how stock options can enrich companies, employees, investors, and the U.S. economy as a whole. With its remarkable new evidence and astute synthesis, In the Company of Owners will change the way America thinks about stock options. Joseph R. Blasi, a sociologist, and Douglas L. Kruse, an economist, are professors at Rutgers University's School of Management and Labor Relations. Aaron Bernstein is a senior writer at Business Week magazine.
