Rural Racism Neil Chakraborti,Jon Garland,2013-05-13 Rural issues are currently attracting unprecedented levels of interest, with the debates surrounding the future of 'traditional' rural customs and practice becoming a significant political concern. However, the problem of racism in rural areas has been largely overlooked by academics, practitioners and researchers who have sought almost exclusively to develop an understanding of racism in urban contexts. This book aims to address this oversight by examining notions of ethnic identity, 'otherness' and racist victimisation that have tended to be marginalised from traditional rural discourse.

Can We Be Happier? Richard Layard,George Ward,2020-01-23 From the bestselling author of Happiness and co-editor of the annual World Happiness Report Most people now realise that economic growth, however desirable, will not solve all our problems. Instead, we need a philosophy and a science which encompasses a much fuller range of human need and experience. This book argues that the goal for a society must be the greatest possible all round happiness, and shows how each of us can become more effective creators of happiness, both as citizens and in our own organisations. Written with Richard Layard's characteristic clarity, it provides hard evidence that increasing

happiness is the right aim, and that it can be achieved. Its language is simple, its evidence impressive, its effect inspiring.

Directors' Liability and Indemnification Edward

Smerdon, 2011 Directors' liabilities have been a key concern in boardrooms since the various high-profile corporate failures in Europe and the United States over the past two decades, when regulation increased and shareholders' and companies' rights to bring civil claims were extended. The current financial crisis will inevitably bring with it greater risks and challenges for directors. There is an increasingly aggressive environment for civil claims, fuelled by insolvencies, shareholders' pressure and public outcry. The attention of the regulators is also ever more sharply focussed on directors' conduct. directors are understandably looking closely at the protection available to them, through both indemnification and directors' and officers' insurance. The exposures faced by directors and the extent to which indemnification and insurance may provide protection vary significantly around the world. This comprehensive second edition features contributions by leading experts on the important aspects of directors' liability, the protection available to directors and the risks of doing business in multiple jurisdictions. New to the second edition are chapters on China, the Czech Republic, Kazakhstan, Saudi Arabia, Slovakia, South Korea and the United Arab Emirates. In addition to civil claims and indemnification, each chapter now includes commentary on regulatory and criminal liability. Particular focus is placed on the impact of the credit crisis. There is also a new section dealing with regulatory issues surrounding global directors' and officers' programmes and their ability to provide cover in all intended jurisdictions. Unique in its approach, this forthcoming second edition is a powerful tool in assisting directors, officers, in-house counsel and the private practice lawyers advising them to make well-informed judgements about the risks they are taking.

The Use of Limited Access Privilege Programs in Mixed-Use Fisheries National Academies of Sciences Engineering and Medicine, Division on Earth and Life Studies, Ocean Studies Board, Committee on the Use of Limited Access Privilege Programs

in Mixed-Use Fisheries,2022-05-05 A central goal of U.S. fisheries management is to control the exploitation of fish populations so that fisheries remain biologically productive, economically valuable, and socially equitable. Although the Magnuson-Stevens Fishery Conservation and Management Act led to many improvements, a number of fish populations remained overfished and some fisheries were considered economically inefficient. In response, Congress amended the Act in 2006 to allow additional management approaches, including Limited Access Privilege Programs (LAPPs) in which individuals receive a permit to harvest a defined portion of the total allowable catch for a particular fish stock. This report examines the impacts of LAPPs on mixed-use fisheries, defined as fisheries where recreational, charter, and commercial fishing sectors target the same species or stocks. The report offers recommendations for NOAA's National Marine Fisheries Service (NMFS) and the Regional Fishery Management Councils (the Councils) who oversee and manage federally regulated fisheries. For each of the five mixed-use fisheries included in the report, the committee examined available fisheries data and analyses and collected testimony from fishery participants, relevant Councils, and NMFS regional experts through a series of public meetings.
