Uma viagem pelo rio Madeira Jorge Henrique da Silva Melgueiro,2022-07-08 As Forças Armadas desempenham papel importante quanto à defesa da Pátria, à garantia dos poderes constitucionais, da lei e da ordem. Porém, além dessas atividades, outras relevantes atribuições são por essas instituições executadas, muito embora pouco ou quase nada se saiba sobre as tarefas subsidiárias que lhes competem. Este livro quer propor um debate a respeito das atividades subsidiárias afetas à Marinha do Brasil, especialmente àquelas que são executadas no rio Madeira – importante hidrovia para o país. Mas é salutar ressaltar a ideia de se realizar a análise acerca dessas atividades em perspectiva com a gestão de recursos hídricos no estado do Amazonas. Aspectos importantes envolvendo a estrutura da governança e da gestão da água no estado, assim como as dificuldades em torno das infraestruturas críticas (hidroelétricas, terminais hidroviários e os pontões - postos de combustíveis nas calhas dos rios, etc.) são temas abordados nesta obra. Além disso, ocupa-se do uso da atividade de inteligência com vistas a fazer frente aos ilícitos ambientais e outros conexos. Em suma, a obra pretendeu analisar amplamente as atividades subsidiárias da Marinha do Brasil e identificar as contribuições que a Instituição dá à gestão hídrica no estado. Diante disso, espera-se que o leitor encontre satisfação ao ler esta obra e tenha melhor compreensão a respeito dos aspectos abordados nessas linhas.

Lei de Mineração Espacial Rodrigo Vesule Fernandes,2024-04-18 A exploração espacial é realidade há mais de cinco décadas, mas a possibilidade real de mineração espacial está apenas em suas primeiras fases. O principal obstáculo para o desenvolvimento dessa atividade, além da questão tecnológica, é a definição de se os operadores privados podem obter títulos de propriedade sobre os recursos espaciais por eles extraídos. Sem previsibilidade jurídica, investidores não sentem segurança em aportar pesadas cifras em uma atividade pioneira. Luxemburgo, um dos menores países da Europa, já editou lei sobre o tema e é hoje um dos maiores captadores de investimentos nesse setor que

será vital nas próximas décadas. Este livro analisa tecnicamente a viabilidade jurídica de o Brasil seguir o mesmo caminho, editando sua própria lei para o segmento de mineração espacial, dentro dos preceitos da Constituição e do Tratado do Espaço. A obra estuda o direito fundamental à propriedade privada, trazido pelo Artigo 5o da Constituição Federal, e interpreta, com base em ampla pesquisa e atenção à evolução histórica, os Artigos I e II do Tratado do Espaço. Faz ainda estudo comparado de leis estrangeiras sobre a exploração de recursos espaciais, notadamente as dos Estados Unidos, Luxemburgo, Japão e Emirados Árabes Unidos. Conclui, por fim, de maneira objetiva, sobre a viabilidade constitucional e internacional de o Brasil ter sua própria norma, não deixando de assinalar obrigações, limitações e preocupações com o alcance do novo mercado que surge.

Covid-19: The Great Reset Thierry Malleret, Klaus Schwab, 2020-07-09 The Corona crisis and the Need for a Great Reset is a guide for anyone who wants to understand how COVID-19 disrupted our social and economic systems, and what changes will be needed to create a more inclusive, resilient and sustainable world going forward. Thierry Malleret, founder of the Monthly Barometer, and Klaus Schwab, founder and executive Chairman of the World Economic Forum, explore what the root causes of these crisis were, and why they lead to a need for a Great Reset. Theirs is a worrying, yet hopeful analysis. COVID-19 has created a great disruptive reset of our global social, economic, and political systems. But the power of human beings lies in being foresighted and having the ingenuity, at least

to a certain extent, to take their destiny into their hands and to plan for a better future. This is the purpose of this book: to shake up and to show the deficiencies which were manifest in our global system, even before COVID broke out.

Organising Care in a Time of Covid-19 Justin Waring,Jean-Louis Denis,Anne Reff Pedersen,Tim Tenbensel,2021-11-08 The COVID-19 pandemic has led to radical transformations in the organisation and delivery of health and care services across the world. In many countries, policy makers have rushed to re-organise care services to meet the surge demand of COVID-19, from re-purposing existing services to creating new 'field' hospitals. Such strategies signal important and sweeping changes in the organisation of both 'COVID' and 'non-COVID' care, whilst asking more fundamental questions about the long-term organisation of care 'after COVID'. In some contexts, the pandemic has exposed the fragilities and vulnerabilities of care systems, whilst in others, it has shown how services are organised to be more resilient and adaptive to unanticipated pressures. The COVID-19 pandemic presents a rare opportunity to examine empirically and to develop new theoretical frameworks on how and why health systems adapt to such unusual and intense pressures. International contributors consider how responses to COVID-19 are transforming the organisation and governance of health and care services and explore questions around strategic leadership at local, regional, national and transnational level. The book offers unique insight and analysis on the dynamics of policy-making, the organisation and governance of care organisations, the role of technologies in governing, the changing role of professionals and the possibilities for more resilient care systems.

The methodology is based on the Universal Declaration of Human Rights, and the study results are presented through a set of numerical scores and analytical narrative reports.

Building High Integrity Applications with SPARK John W. McCormick,Peter C. Chapin,2015-08-31 Software is pervasive in our lives. We are accustomed to dealing with the failures of much of that software - restarting an application is a very familiar solution. Such solutions are unacceptable when the software controls our cars, airplanes and medical devices or manages our private information. These applications must run without error. SPARK provides a means, based on mathematical proof, to guarantee that a program has no errors. SPARK is a formally defined programming language and a set of verification tools specifically designed to support the development of software used in high integrity applications. Using SPARK, developers can formally verify properties of their code such as information flow, freedom from runtime errors, functional correctness, security properties and safety properties. Written by two SPARK experts, this is the first introduction to the just-released 2014 version. It will help students and developers alike master the basic concepts for building systems with SPARK.

The Center of Everything Laura Moriarty,2009-06-15 A warm, beguiling book full of hard-won wisdom.--Janet

Maslin, The New York Times The Center of Everything is as realistic and familiar as a summer day in Kansas--brave and gritty, strong voiced and spare.--0, The Oprah Magazine Set in Kerrville, Kansas, The Center of Everything is told by Evelyn Bucknow, an endearing character with a wholly refreshing way of looking at the world. Living with her single mother in a small apartment, Evelyn Bucknow is a young girl wincing her way through adolescence. With a voice that is as charming as it is recognizable, Evelyn immerses the reader in the dramas of an entire community. The people of Kerrville, stuck at once in the middle of nowhere but also at the center of everything, are the source from which Moriarty draws on universal dilemmas of love and belief to render a story that grows in emotional intensity until it lifts the reader to heights achieved only by the finest of fiction.

Migration and Remittances Factbook 2016 Dilip Ratha,Christian Eigen-Zucchi,Sonia Plaza,2016-04-08 Remittances remain a key source of funds for developing countries, far exceeding official development assistance and even foreign direct investment. Remittances have proved to be more stable than private debt and portfolio equity flows, and less volatile than official aid flows, and their annual flow can match or surpass foreign exchange reserves in many small countries. Even in large emerging markets, such as India, remittances are equivalent to at least a quarter of total foreign exchange reserves. India, China, Philippines and Mexico are the top recipients of migrant remittances. The Migration and Remittances Factbook 2016 attempts to present numbers and facts behind the stories of international migration and remittances, drawing on authoritative, publicly available data. It provides a snapshot of statistics on immigration, emigration, skilled emigration, and remittance flows for 210 countries and 15 regional and income groups. The Migration and Remittances Factbook 2016 updates the 2011 edition of the Factbook with additional data on bilateral migration and remittances and second generation diasporas, collected from various sources, including national censuses, labor force surveys, population registers, and other national sources.
