

China's environmental policy in terms of European Union standards Jan Wiktor Tkaczyński, Łukasz Gacek, 2020-11-16 It is beyond dispute that both China and the European Union stand to gain from promoting low-carbon development through the dissemination of clean and renewable energy sources, as this inevitably leads to increased environmental protection. The depletion of fossil fuel resources and the accompanying changes in the global energy mix make Europe and China not only competitors in the global economic race, but also *nolens volens* partners. Their pragmatic partnership is characterized, on the one hand, by the need to take action to reduce the consumption of fossil fuels and, on the other, by the desire to minimize the negative environmental impact of their use. Hence, the existing and emerging cooperation between the two actors, while challenging for a number of reasons, is not only an attempt to set up channels to exchange vital information, but also an exercise in setting the standards under which further cooperation will be forged.

China, the United States, and 21st-Century Sea Power Andrew S. Erickson, Lyle J Goldstein, Nan Li, 2010-12-01 China's reaction to the United States' new maritime strategy will significantly impact its success, according to three Naval War College professors. Based on the premise that preventing wars is as important as winning wars, this new U.S. strategy, they explain, embodies a historic reassessment of the international system and how the United States can best pursue its interests in cooperation with other nations. The authors contend that despite recent turbulence in U.S.-China military relations, substantial shared interests could enable extensive U.S.-China maritime security cooperation, as they attempt to reach an understanding of "competitive coexistence." But for professionals to structure cooperation, they warn, Washington and Beijing must create sufficient political and institutional space.

This Is Vegan Propaganda Ed Winters, 2022-01-06 Our choices can help alleviate the most pressing issues we face today: the climate crisis, infectious and chronic diseases, human exploitation and, of course, non-human exploitation. Undeniably, these issues can be uncomfortable to learn about but the benefits of doing so cannot be overstated. It is quite literally a matter of life and death. Through exploring the major ways that our current system of animal farming affects the world around us, as well as the cultural and psychological factors that drive our behaviours, *This Is Vegan Propaganda* answers the pressing question, is there a better way? Whether you are a vegan already or curious to learn more, this book will show you the other side of the story that has been hidden for far too long. Based on years of research and conversations with slaughterhouse workers and farmers, to animal rights philosophers, environmentalists and everyday consumers, vegan educator and public speaker Ed Winters will give you the knowledge to understand the true scale and enormity of the issues at stake. *This Is Vegan Propaganda* is the empowering and groundbreaking book on veganism that everyone, vegan and sceptic alike, needs to read.

A Gateway to Payments for Ecosystem Services D. Huberman, 2009

Teaching Languages with Technology Euline Cutrim Schmid, Shona Whyte, 2014-11-03 This book draws on theories of second language acquisition (SLA) to illustrate how interactive white board technology can be exploited to support language acquisition. It examines interaction, collaboration and negotiation of meaning and focus on form in the communicative language classroom in primary, secondary and vocational schools. In recent years new technologies have been incorporated into second and foreign language education as tools for implementing teaching methodologies. IWBs have established their role in the field of computer-assisted language learning (CALL) and are an effective and inspiring tool which motivates both teachers and learners. Although the number of IWBs in classrooms has rapidly increased over the past decade in many parts of the world, teacher training materials and pedagogical support for the design, evaluation and implementation of IWB-based materials in the foreign language classroom has not kept pace. Research also shows that language teachers do not always use IWBs in pedagogically sound ways. There is a real need for the development of training models and examples of good practice which can support teachers in developing the necessary competencies for exploiting the IWB in ways consistent with current theories of language teaching pedagogy. This book provides that best practice and gives a full account of in-depth research in an accessible manner.

The Transformation of Academic Work James Goodman, Claire Parfitt, Keiko Yasukawa, 2023-09-19 This book offers a unique grounded analysis of recent crises and transformations in academic work. It charts international and Australia-based efforts to overcome academic fragmentation and precarity, and to advance agendas for the public university. It is based on extensive qualitative interviews with academics and managers across several universities in Australia. It finds new grounds for 'universal' universities, with decent jobs, to serve the public good. The book is aimed at students and scholars from sociology, education, politics and industrial relations, and a wider readership concerned about the future of universities. Analysis centres on a trade union-led initiative in Australia aimed at decasualising universities, and ensuing debates about the impact of academic fragmentation. The authors argue for strengthening the teaching/research nexus as the foundation-stone for public purpose universities.

Teas, Cocoa and Coffee Alan Crozier, Hiroshi Ashihara, Francisco Tomás-Barbéran, 2011-10-14 In recent years, the role of plant secondary metabolites as protective constituents in the human diet has been a growing area of research. Unlike the traditional vitamins, they are not essential for short-term wellbeing, but there is increasing evidence that modest long-term intakes can have favourable impacts on the incidence of cancers and many chronic diseases, including cardiovascular disease and type II diabetes, which are occurring in Western populations with increasing frequency. This book covers the latest science on the metabolism and potential health benefits of teas, cocoa, coffee and their extracts in the human diet. From an opening chapter tracing the origins of teas, cocoa and coffee as beverage, the book proceeds to explore the phytochemical content of coffee, cocoa and the various types of tea. The bioavailability of secondary metabolites from each of the beverages is then considered in depth, and related directly to their health benefits. Embracing the full range of tea, coffee and cocoa beverages and products, the book offers the most up-to-date and comprehensive treatment of these increasingly important dietary components. As the only book to bring together the latest information on the biochemistry and health benefits of teas, coffee and cocoa, this book is essential reading for food scientists and technologists involved in the production of tea, coffee and cocoa products. Nutritionists will value the book's health focus, while agricultural scientists working on the cultivation of these crops will prize its scope and depth of detail. It is also an important resource for all those who use functional ingredients in other products, whether they are based in industry or research.

The Sentinel State Minxin Pei, 2024-02-13 Countering recent hype around technology, a leading expert argues that the endurance of dictatorship in China owes less to facial recognition AI and GPS tracking than to the human resources of the Leninist surveillance state. For decades China watchers argued that economic liberalization and increasing prosperity would bring democracy to the world's most populous country. Instead, the Communist Party's grip on power has only strengthened. Why? The answer, Minxin Pei argues, lies in the effectiveness of the Chinese surveillance state. And the source of that effectiveness is not just advanced technology like facial recognition AI and mobile phone tracking. These are important, but what matters more is China's vast, labor-intensive infrastructure of domestic spying. Central government data on Chinese surveillance is confidential, so Pei turned to local reports, police gazettes, leaked documents, and interviews with exiled dissidents to provide a detailed look at the evolution, organization, and tactics of the surveillance state. Following the 1989 Tiananmen uprising, the Chinese Communist Party invested immense resources in a coercive apparatus operated by a relatively small number of secret police officers capable of mobilizing millions of citizen informants to spy on those suspected of disloyalty. The CCP's Leninist bureaucratic structure—whereby officials and party activists penetrate every sector of society and the economy, from universities and village committees to delivery companies, telecommunication firms, and Tibetan monasteries—ensures that Beijing's eyes and ears are truly everywhere. While today's system is far more robust than that of years past, it is modeled after mass surveillance implemented under Mao Zedong and Chinese emperors centuries ago. Rigorously empirical and rich in historical insight, *The Sentinel State* is a singular contribution to our knowledge about coercion in the Chinese state and, more generally, the survival strategies of authoritarian regimes.

The Widow Washington Martha Saxton, 2019-06-11 An insightful biography of Mary Ball Washington, the mother of our nation's father The Widow Washington is the first life of Mary Ball Washington, George Washington's mother, based on archival sources. Her son's biographers have, for the most part, painted her as self-centered and crude, a trial and an obstacle to her oldest child. But the records tell a very different story. Mary Ball, the daughter of a wealthy planter and a formerly indentured servant, was orphaned young and grew up working hard, practicing frugality and piety. Stepping into Virginia's upper class, she married an older man, the planter Augustine Washington, with whom she had five children before his death eleven years later. As a widow deprived of most of her late husband's properties, Mary struggled to raise her children, but managed to secure them places among Virginia's elite. In her later years, she and her wealthy son George had a contentious relationship, often disagreeing over money, with George dismissing as imaginary her fears of poverty and helplessness. Yet Mary Ball Washington had a greater impact on George than mothers of that time and place usually had on their sons. George did not have the wealth or freedom to enjoy the indulged adolescence typical of young men among the planter class. Mary's demanding mothering imbued him with many of the moral and religious principles by which he lived. The two were strikingly similar, though the commanding demeanor, persistence, athleticism, penny-pinching, and irascibility that they shared have served the memory of the country's father immeasurably better than that of his mother. Martha Saxton's *The Widow Washington* is a necessary and deeply insightful corrective, telling the story of Mary's long, arduous life on its own terms, and not treating her as her son's satellite.

Handbook of Natural Colorants Thomas Bechtold, Rita Mussak, 2009-04-06 Concentration on renewable resources, sustainability and replacement of oil based products are driving forces to reassess the potential of natural resources including natural colorants. The growing consumer interest in purchasing "green" products, which exhibit an improved environmental profile, can be seen as the break-through force needed to reintroduce natural colorants into the modern markets. Written by scientists with specialised knowledge in the field, *Handbook of Natural Colorants* provides a unique source of information, summarising the present knowledge of natural colorants in depth. Supporting researchers in this emerging field of sustainable chemistry, it provides easy access to the theory and practice of natural colorants from different viewpoints, including agricultural, economic and legislative aspects. Topics covered include: History of coloration technology Present position of natural colorants Regional plant source availability Specific application techniques Chemical properties that professional dyers and chemists have to consider Agricultural sourcing of dyes with an emphasis on renewable resources Discussions on energy and material balance issues arising from the sourcing of materials Production aspects of colorants, leading on to the key applications Environmental and economic aspects Also included are the pros and cons of natural dyestuffs, presenting some promising results and evaluating the potential use of vegetable dyes as alternatives to chemical-based ones with a focus on green chemistry

The Communicator's Guide to Media Law and Ethics Mark Pearson, 2023-11-23 This book offers an introduction to the key legal and ethical topics confronting Australian journalists and strategic communicators both at home and internationally and offers a suite of reflective techniques for navigating them. It starts by positioning morals, ethics, and the law in their historical and philosophical frameworks by tracing the evolution of free expression and professional media ethics. Media law and ethics are then contextualized in their modern international human rights framework. Readers are equipped with a skill set for reflecting on the law and ethics of professional media dilemmas - including mindful reflection, the Potter Box, journaling, concept mapping, and discussion. Such approaches are then applied to key topic areas, including free expression; reputation; confidentiality; privacy; justice; intellectual property; national security; discrimination and harassment; and conflicted interests. Each is examined in terms of its philosophical underpinnings, relationship to human rights, professional ethical context, international examples, legal principles, key Australian laws, legal cases, and strategies for applying reflective practice techniques. It concludes on a confident note - imploring communicators to engage in constructive and mindful strategic communication with the authority and confidence that results from a working knowledge of media law and ethics. This handbook is for professional communicators and students in all fields, but particularly in journalism, public relations, corporate communication, media relations, and marketing.
