A Thirst for Wine and War Adam D. Zientek, 2024-02-13 Beginning in the fall of 1914, every French soldier on the Western Front received a daily ration of wine from the army. At first it was a modest quarter litre, but by 1917 it had increased to the equivalent of a full bottle each day. The wine ration was intended to sustain morale in the trenches, making the men more willing to endure suffering and boredom. The army also supplied soldiers with doses of distilled alcohol just before attacks to increase their ferocity and fearlessness. This strategic distribution of alcohol was a defining feature of French soldiers' experiences of the war and amounted to an experimental policy of intoxicating soldiers for military ends. *A Thirst for Wine and War* explores the French army's emotional and behavioural conditioning of soldiers through the distribution of a mind-altering drug that was later hailed as one of the army's "fathers of victory." The daily wine ration arose from an unexpected set of factors including the demoralization of trench warfare, the wine industry's fear of losing its main consumers, and medical consensus about the benefits of wine drinking. The army's related practice of distributing distilled alcohol to embolden soldiers was a double-edged sword, as the men might become unruly. The army implemented regulations and surveillance networks to curb men's drinking behind the lines, in an attempt to ensure they only drank when it was useful to the war effort. When morale collapsed in spring 1917, the army lost control of this precarious system as drunken soldiers mutinied in the thousands. Discipline was restored only when the army regained command of soldiers' alcohol consumption. Drawing on a range of archives, personal narratives, and trench journals, *A Thirst for Wine and War* shows how the French army's intoxication of its soldiers constituted a unique exercise of biopower deployed on a mass scale.

Humor, Entertainment, and Popular Culture during World War I Clémentine Tholas-Disset, Karen A. Ritzenhoff, 2015-05-06 Humor and entertainment were vital to the war effort during World War I. While entertainment provided relief to soldiers in the trenches, it also built up support for the war effort on the home front. This book looks at transnational war culture by examining seemingly light-hearted discourses on the Great War.

Historic Yellowstone National Park Bruce T. Gourley, 2021-12-01 Historic Yellowstone National Park captures the most interesting moments in the park's history, the slices of life in Montana and Wyoming that provide an idea of what life was like for those who chose to explore this gloriously beautiful corner of the United States. There's the presence of Native Americans in the early years of the area's history, the early explorers and expeditions, its debut as the very first national park, the explosive growth of tourism, and the people who made history in this astonishing and mysterious Rocky Mountain landscape. Historic Yellowstone National Park provides just enough of this rich history to make the experience of visiting the park better than expected.

Collateral Values Todd R. Lookingbill, Peter D. Smallwood, 2019-07-30 This book explores the unanticipated benefits that may arise after wars and conflicts, showing how the preservation of battlefields and the establishment of borderlands can create natural capital in the former landscapes of war. The editors call this Collateral Value, in contrast to the collateral damage that war inflicts upon infrastructure, natural capital, and human capital. The book includes case studies recounting successes and failures, opportunities and risks, and ambitious proposals. The book is organized in two sections. The first visits U.S., English, and French battlefield sites dating from medieval England to World War I. The second explores borderlands located on several continents, established to end or prevent conflict. Both of these can create value beyond their original purpose, by preserving natural areas and restoring biodiversity. Among the topics covered are: · Registering English Battlefields · Old forts and new amenities in the Southern Plains of the U.S. · Verdun, France, and the conservation of WWI cultural and natural heritage · Conservation lessons learned in the Cordillera del Condor Corridor of the Andes mountains · Korea's DMZ and its nature preserve · Wakhan National Park, a mountainous buffer area between Afghanistan and Pakistan The book examines state-of-the-art applications of landscape ecology, including methods for change detection, connectivity analysis, and the

quantification of ecosystem services. Also included is a chapter on a creative proposal for "Guantánamo 2.0," which would transform the Gitmo detention facility into a peace park and ecological research center. A concluding chapter appraises the past, present, and future of Collateral Values. *Collateral Values: The Natural Capital Created by Landscapes of War* benefits a broad audience of advanced undergraduate and graduate students, researchers, and practicing professionals.

Not-Forgetting Rosalyn Deutsche, 2022-12-21 Explores contemporary art that challenges deadly desires for mastery and dominion. Amid times of emboldened cruelty and perpetual war, Rosalyn Deutsche links contemporary art to three practices that counter the prevailing destructiveness: psychoanalytic feminism, radical democracy, and war resistance. Deutsche considers how art joins these radical practices to challenge desires for mastery and dominion, which are encapsulated in the Eurocentric conception of the human that goes under the name "Man" and is driven by deadly inclinations that Deutsche calls masculinist. The masculinist subject—as an individual or a group—universalizes itself, claims to speak on behalf of humanity, and meets differences with conquest. Analyzing artworks by Christopher D'Arcangelo, Robert Filliou, Hans Haacke, Mary Kelly, Silvia Kolbowski, Barbara Kruger, Louise Lawler, Martha Rosler, James Welling, and Krzysztof Wodiczko, Deutsche illuminates the diverse ways in which they expose, question, and trouble the visual fantasies that express masculinist desire. Undermining the mastering subject, these artworks invite viewers to question the positions they assume in relation to others. Together, the essays in *Not-Forgetting*, written between 1999 and 2020, argue that this art offers a unique contribution to building a less cruel and violent society.

The Docks Bill Sharpsteen, 2011-01-05 *The Docks* is an eye-opening journey into a giant madhouse of activity that few outsiders ever see: the Port of Los Angeles. In a book woven throughout with riveting novelist detail and illustrated with photographs that capture the frenetic energy of the place, Bill Sharpsteen tells the story of the people who have made this port, the largest in the country, one of the nation's most vital economic enterprises. Among others, we meet a pilot who parks ships, one of the first women longshoremen, union officials and employers at odds over almost everything, an environmental activist fighting air pollution in the "diesel death zone," and those with the nearly impossible job of enforcing security. Together these stories paint a compelling picture of a critical entryway for goods coming into the country—the Port of Los Angeles is part of a complex that brings in 40% of all our waterborne cargo and 70% of all Asian imports—yet one that is also extremely vulnerable. *The Docks* is a rare look at a world within our world in which we find a microcosm of the labor, environmental, and security issues we collectively face.

Cast Out of Eden Robert Aquinas McNally, 2024 *Cast Out of Eden* explores John Muir's role in the legacy of racialized colonialism affecting U.S. wild lands and points toward a way forward--

Imperialism and Progressivism, 2007 Involving students in real historical problems that convey powerful lessons about U.S. history, these thought-provoking activities combine core content with valuable practice in decision making, critical thinking, and understanding multiple perspectives. O'Reilly - an experienced, award winning teacher - has students tackle fascinating historical questions that put students in the shoes of a range of people from the past, from the rich and famous to ordinary citizens. Each lesson can be done either as an in-depth activity or as a quick motivator. Detailed teacher pages give step-by-step instructions, list key vocabulary terms, offer troubleshooting tips, present ideas for post-activity discussions, and furnish lists of related sources. Reproducible student handouts clearly lay out the decision-making scenarios, provide outcomes, and present related primary source readings and/or images with analysis questions--Page 4 of cover

Landscapes and Voices of the Great War Angela K. Smith, Krista Cowman, 2017-02-03 This volume aims to provide a wider view of First World War experience through focusing on landscapes less commonly considered in historiography, and on voices that have remained on the margins of popular understanding of the war. The landscape of the western front was captured during the conflict in many different ways: in photographs, paintings and print. The most commonly replicated voicing of contemporary attitudes towards the war is that of initial enthusiasm giving way to disillusionment and

a sense of overwhelming futility. Investigations of the many components of war experience drawn from social and cultural history have looked to landscapes and voices beyond the frontline as a means of foregrounding different perspectives on the war. Not all of the voices presented here opposed the war, and not all of the landscapes were comprised of trenches or flanked by barbed wire. Collectively, they combine to offer further fresh insights into the multiplicity of war experience, an alternate space to the familiar tropes of mud and mayhem.

Censorship and Propaganda in World War I Eberhard Demm, 2019-05-30 This book demonstrates how people were kept ignorant by censorship and indoctrinated by propaganda. Censorship suppressed all information that criticized the army and government, that might trouble the population or weaken its morale. Propaganda at home emphasized the superiority of the fatherland, explained setbacks by blaming scapegoats, vilified and ridiculed the enemy, warned of the disastrous consequences of defeat and extolled duty and sacrifice. The propaganda message also infiltrated entertainment and the visual arts. Abroad it aimed to demoralize enemy troops and stir up unrest among national minorities and other marginalized groups. The many illustrations and organograms provide a clear visual demonstration of Demm's argument.

Relicts of a Beautiful Sea Christopher Normont, 2014 Relicts of a Beautiful Sea: Survival, Extinction, and Conservation in a Desert World

Mass Tourism in a Small World David Harrison, Richard Sharpley, 2017-05-26 This new book reviews all aspects of the phenomenon of mass tourism. It covers theoretical perspectives (including political economy, ethics, sustainability and environmentalism), the historical context, and the current challenges to domestic, intra-regional and international mass tourism. As tourism and tourist numbers continue to grow around the world, it becomes increasingly important that this subject is studied in depth and best practice applied in real-life situations. Finishing with a speculative chapter identifying potential future trends and challenges, this book forms an essential resource for all researchers and students within tourism studies.

Notable Americans of Czechoslovak Ancestry in Arts and Letters and in Education

Miloslav Rechcigl Jr., 2021-11-02 As pointed out in my last two publications, no comprehensive study has been undertaken about the American Learned Men and Women with Czechoslovak roots. The aim of this work is to correct this glaring deficiency, with the focus on immigration from the period of mass migration and beyond, irrespective whether they were born in their European ancestral homes or whether they have descended from them. Whereas in the two mentioned monographs, the emphasis has been on scholars and social and natural scientists; and men and women in medicine, applied sciences and engineering, respectively, the present compendium deals with notable Americans of Czechoslovak ancestry in arts and letters, and in education. With respect to women, although most professional fields were closed to them through much of the nineteenth century, the area of arts and letters was opened to them, as noted earlier and as this compendium authenticates.

America's Secret History Steve Harris, 2020-05-19 The Truth Behind the Stories They Don't Want You to Know America's Secret History presents an undistorted picture of the history of the United States. Never in one volume have so many unknown facts that disprove America's history books been brought together in a cohesive historical context, all based on verifiable information. Utilizing the House of Representative's little-known 1953 Reece Committee revelations, the Carnegie, Rockefeller, Guggenheim, and Ford foundations have systematically controlled education and the high-level appointees to the US State Department for the last century with the full knowledge and approval of the United States government. Conclusive proof that there has been one attempted coup d'état, and three successful peaceful coups in America's history, and that all were obvious Deep State initiatives to mold the government into its intended purposes. Twenty-six people owned the same wealth as the poorest 50 percent of the world (almost four billion people in 2020). America's Secret History shows how the Deep State, the Fed, and world governments caused this to happen. Not another conspiracy theory book, America's Secret History reveals The Truth Behind the Stories They Don't Want You to Know, weaving all of them together to explain just how we find ourselves in Donald Trump's America.

Today's Environmental Issues Teri J. Walker, 2017-12-01 An accessible and impartial survey of the positions of the Republican and Democratic parties on the most pressing environmental issues of our time, from climate change and wilderness preservation to air and water pollution. *Today's Environmental Issues: Democrats and Republicans* presents a unique perspective on party politics—one that impartially identifies similarities and differences regarding an array of topics ranging from fracking, sustainability, and pesticides to logging and noise pollution. Essays provide both historical information and up-to-date coverage of partisan opinions on today's environmental concerns. Written for upper level high school students, undergraduates, and general audiences interested in environmental issues and partisan viewpoints, this book enables readers to better understand the origins, details, differences, and commonalities of partisan opinions surrounding today's environmental concerns. Each environmental issue is unique with its own set of concerns and impacts, particularly when viewed from a party perspective. By examining a breadth of issues from the party viewpoint, readers can understand how the parties could work together or in opposition, depending on the environmental issue—and that the parties may not always be polar opposites on every issue, a characterization that is often portrayed in the media. Each essay includes a sidebar that presents a quick look at the party line, individuals who have shaped opinion or policy, or key court decisions.

The Future of Conservation in America Gary E. Machlis, Jonathan B. Jarvis, 2018-02-26 Drawing on “eighty years of public service in conservation” the authors “chart a course for a new generation of conservation action and leadership” (President Jimmy Carter). This is a turbulent time for the conservation of America’s natural and cultural heritage. From the current assaults on environmental protection to the threats of climate change, biodiversity loss, and disparity of environmental justice, the challenges facing the conservation movement are both immediate and long term. In this time of uncertainty, we need a clear and compelling guide for the future of conservation in America, a declaration to inspire the next generation of conservation leaders. This is that guide—what the authors describe as “a chart for rough water.” Written by the first scientist appointed as science advisor to the director of the National Park Service and the eighteenth director of the National Park Service, this is a candid, passionate, and ultimately hopeful book. The authors describe a unified vision of conservation that binds nature protection, historical preservation, sustainability, public health, civil rights and social justice, and science into common cause—and offer real-world strategies for progress. To be read, pondered, debated, and often revisited, *The Future of Conservation in America* is destined to be a touchstone for the conservation movement in the decades ahead. “With authority and passion, the authors present an outline of the necessary defensive action to be undertaken now.” —E. O. Wilson, Pulitzer Prize-winning and New York Times–bestselling author of *The Social Conquest of Earth* “Gary Machlis and Jon Jarvis . . . advocate for conservationists of all stripes to come together to collaborate for common causes, the independent national park system among them.” —National Parks Traveler

Creating Wilderness Patrick Kupper, 2014-07-30 The history of the Swiss National Park, from its creation in the years before the Great War to the present, is told for the first time in this book. Unlike Yellowstone Park, which embodied close cooperation between state-supported conservation and public recreation, the Swiss park put in place an extraordinarily strong conservation program derived from a close alliance between the state and scientific research. This deliberate reinterpretation of the American idea of the national park was innovative and radical, but its consequences were not limited to Switzerland. The Swiss park became the prime example of a scientific national park, thereby influencing the course of national parks worldwide.
