State Terrorism and Neoliberalism Ruth Blakeley,2009-04-03 This book explores the complicity of democratic states from the global North in state terrorism in the global South. It evaluates the relationship between the use of state terrorism by Northern liberal democracies and efforts by those states to further incorporate the South into the global political economy and to entrench neoliberalism. Most scholarship on terrorism tends to ignore state terrorism by Northern democracies, focusing instead on terrorist threats to Northern interests from illiberal actors. The book accounts for the absence of Northern state terrorism from terrorism studies, and provides a detailed conceptualisation of state terrorism in relation to other forms of state violence. The book explores state terrorism as used by European and early American imperialists to secure territory, to coerce slave and forced wage labour, and to defeat national liberation movements during the process of decolonisation. It examines the use of state terrorism by the US throughout the Cold War to defeat political movements that would threaten US elite interests. Finally, it assesses the practices of Northern liberal democratic states in the 'War on Terror' and shows that many Northern liberal democracies have been active in state terrorism, including through extraordinary rendition. This book will be of much interest to students of critical terrorism studies, security studies, South American politics, US foreign policy and IR in general. Ruth Blakeley is a lecturer in International Relations at the University of Kent. She holds a PhD in International Relations from the University of Bristol.

Common Core Paula Saine,2016-03-15 Common Core: Using Global Children's Literature and Digital Technologies focuses on nine regions of the world and is fundamentally connected to three tenets: literacy, culture, and the use of digital technology for enhancing deeper understanding in elementary classroom curriculum. Through the use of this book, teachers can explore and begin to diversify their selection of global and multicultural literature from various regions of the world and underrepresented ethnic communities of the United States.

Cultural Studies Lawrence Goodrich,2011-11-15 Cultural Studies: An Introduction to Global Awareness is designed to introduce students to the study of world affairs, regional studies, and cultural awareness. It delves into history, geography, religions, languages, cultures, political systems, economics, social issues, environmental concerns, and human rights. It looks at major events and significant figures that have shaped each region. In this age when the Internet, trade, airplanes, satellites, and cell phones connect people everywhere, it's more important than ever to understand the world's cultures. Even if you never leave the United States, you may find yourself working with or managing people from different parts of the world. If you end up working overseas, you'll find that the more insight you have into other countries' history and customs, the more successfully you'll navigate your way around new and exciting lands. Features in this book include detailed topographical (mountains, rivers, etc.) and political maps. Colored boxes add brief additional information about related topics, while fastFacts offer extra tidbits of information. The photos provide glimpses of present-day life in these lands. Students will see how people dress and what their cities, cars, streets, buildings, and homes look like. While historical photos can be extremely interesting, this textbook supplies you with pictures of what these countries look like today. By the time students finish this course, they will have a greater understanding of the world around them. This knowledge will help them interpret trends and events abroad and will help in any future endeavors with other cultures.

Governance, Conflict Analysis and Conflict Resolution Cedric Hilburn Grant,R. Mark Kirton,2007 Decades after our contemporary international system witnessed the end of the Second World War, the events that followed in its aftermath has fashioned an international system characterized by global conflict in the guise of the Cold War. Although wars were part of the struggle between the two rival super powers - the US and USSR - their main theatre was the Third World and hostilities during the Cold War era were global. It is against this backdrop that Governance, Conflict Analysis and Conflict Resolution addresses conflict in the Caribbean and elsewhere, exploring the linkages between conflict and development. The book is divided into eight sections and offers diverse views on conflict, conflict resolution and governance: Part 1 - Governance and Conflict Management in a Global Context; Part II - Management and resolution of Conflict in the Regional Context; Part III - Perspectives on Social Stratification, Political Rivalry and Ethnic Insecurities; Part IV - High Intensity Conflicts; Part V - The Management and Resolution of Territorial Conflicts; Part VI - Poverty, Economics and Conflict Management; Part VII - Advancing Conflict Resolution through Education; and Part VIII - Civil Society, Governance and Social Consensus.

Dying to Eat Michael David Trevan,2018-12-04 This book examines our oft emotional relationship with food; the way science has been used and misused by those who govern, provide advice to the public, or try to sell food; and why we tend to believe the statements about healthy eating that we wish were true, rather than those which are true. The book discusses and challenges how the science and knowledge of food, health and nutrition are derived; why knowledge can appear valid even when it is not; how the misleading use of descriptors of risk has been responsible for the strangest ideas about eating in the history of humankind, perverted our approach to the role of food in our lives, and engendered hysterical attitudes; and why public health policy is subject to the whims of activists and lobbyists, and how it becomes dogma that is highly resistant to change despite new evidence. The role of the media and how, and why, science is "modified" and sometimes "falsified", and why how, not just what, we eat may be crucial are also examined. The book also explores those foods that come ready loaded with poisonous compounds and carcinogens. The conclusions presented here are firmly based upon an extensive bibliography, and a detailed and trustworthy re-examination of key pieces of research that have been influential in setting the present food agenda. The text is set within an historical context dating back to the 16th century, and illustrates how it is that we have always known what we must eat and do to be healthy. The book is written in an approachable and engaging style for all readers regardless of pre-existing scientific knowledge. It is intended for all who have an interest in their food and health, and for students of the food, nutrition, medical, and social sciences.

Homebound Security Justine Fleischner,2009 This study will focus on one potential way to improve security and public safety in conflict environments: developing new partnerships with individual migrants, migrant associations, and organized diaspora networks. These individuals and communities have a demonstrated and keen interest in the security and development of their home societies. They already support livelihoods back home by sending remittances (financial transfers), investing in businesses, engaging in social welfare projects, and providing technical expertise. Yet, to date, neither researchers nor policymakers have paid any sustained attention to the potential contribution that these individuals and associations could make to support public safety. The report is organized in three parts. The first provides a background for the study, defines terms, and outlines the methodology used. The second reviews the ways migrants and diasporas currently maintain ties and support livelihoods back home, and it addresses the four difficulties noted above. The

third, the 'ideas bank', suggests innovative ways for migrants and diasporas, along with international partners, to improve public safety by introducing no-tech through to high-tech solutions. Finally, recommendations for next steps and implementation are included.

Women and Politics around the World [2 volumes] Joyce Gelb,Marian Lief Palley,2009-03-30 A unique two-volume examination of the progress women have made in achieving political equality, *Women and Politics around the World* addresses both transnational and gender-related issues as well as specific conditions in more than 20 countries. *Women and Politics around the World: A Comparative History and Survey* is an exploration of the role of women in political systems worldwide, as well as an examination of how government actions in various countries have an impact on the lives of the female population. *Women and Politics around the World* divides its coverage into two volumes. The first looks at such crucial issues facing women today as health policy, civil rights, and education, comparing conditions around the world. The second volume profiles 22 different countries, representing a broad range of governments, economies, and cultures. Each profile looks at the history and current state of women's political and economic participation in a particular country, and includes an in-depth look at a representative policy. The result is a resource unlike any other—one that gives students, researchers, and other interested readers a fresh new way of investigating a truly global issue.

Gender, War, and Militarism Laura Sjoberg,Sandra E. Via,2010-08-03 This compelling, interdisciplinary compilation of essays documents the extensive, intersubjective relationships between gender, war, and militarism in 21st-century global politics. Feminist scholars have long contended that war and militarism are fundamentally gendered. *Gender, War, and Militarism: Feminist Perspectives* provides empirical evidence, theoretical innovation, and interdisciplinary conversation on the topic, while explicitly—and uniquely—considering the links between gender, war, and militarism. Essentially an interdisciplinary conversation between scholars studying gender in political science, anthropology, and sociology, the essays here all turn their attention to the same questions. How are war and militarism gendered? Seventeen innovative explanations of different intersections of the gendering of global politics and global conflict examine the theoretical relationship between gender, militarization, and security; the deployment of gender and sexuality in times of conflict; sexual violence in war and conflict; post-conflict reconstruction; and gender and militarism in media and literary accounts of war. Together, these essays make a coherent argument that reveals that, although it takes different forms, gendering is a constant feature of 21st-century militarism.

Bullets Not Ballots Jacqueline L. Hazelton,2021-05-15 In *Bullets Not Ballots*, Jacqueline L. Hazelton challenges the claim that winning hearts and minds is critical to successful counterinsurgency campaigns. Good governance, this conventional wisdom holds, gains the besieged government popular support, denies support to the insurgency, and makes military victory possible. Hazelton argues that major counterinsurgent successes since World War II have resulted not through democratic reforms but rather through the use of military force against civilians and the co-optation of rival elites. Hazelton offers new analyses of five historical cases frequently held up as examples of the effectiveness of good governance in ending rebellions—the Malayan Emergency, the Greek Civil War, the Huk Rebellion in the Philippines, the Dhofar rebellion in Oman, and the Salvadoran Civil War—to show that, although unpalatable, it was really brutal repression and bribery that brought each conflict to an end. By showing how compellence works in intrastate conflicts, *Bullets Not Ballots* makes clear that whether or not the international community decides these human, moral, and material costs are acceptable, responsible policymaking requires recognizing the actual components of counterinsurgent success—and the limited influence that external powers have over the tactics of counterinsurgent elites.

Teaching Translation and Interpreting Łukasz Bogucki,Mikołaj Deckert,2012-12-21 Translation is a phenomenon that affects us all on a daily basis, the more so now that dissemination of information is greatly enhanced by modern technology. However, there are no strict regulations on who can become a translator and what qualifications are required. The contributors to this volume strive to find out whether translators are taught, self-taught or trained, what the teaching or training programmes are like and how they can be improved. This is a companion volume to *Teaching Translation and Interpreting: Challenges and Practices* (edited by Łukasz Bogucki, Cambridge Scholars Publishing, 2010). It contains papers delivered at two international conferences devoted to teaching translation and interpreting, organised in Łódź, Poland, as well as invited contributions. The authors are translation and interpreting scholars and teachers from leading Polish and Ukrainian universities.
