Economic Analysis of Law in China Thomas Eger, Michael G. Faure, Naigen Zhang, 2007-01-01 This book is an exemplary multi-disciplinary and multi-institutional study of contemporary Chinese law. A collective effort by a group of European and Chinese scholars, it skillfully tests the relationships between law and economics in the Chinese context. The China Journal This is an extremely valuable collection of essays on modern Chinese law viewed through the lens of the law and economics movement. China is developing very rapidly and law is now understood to provide the essential framework for economic development provided the law itself is economically rational. The essays in this volume are excellent examples of how economics can be used to clarify and guide the law applicable to the essential dimensions of the economy. I recommend it wholeheartedly and without reservations. Richard A. Posner, United States Court of Appeals for the Seventh Circuit and University of Chicago Law School, US This book brings together important applications of law and economics to China and covers a wide range of issues, including such basic concerns as property rights, intellectual property, and taxation, as well as competition law and corporate and securities law. Because of its breadth of coverage, its focus on the particulars of Chinese law, and the expertise of its scholars both Western and Chinese it should serve as a valuable reference work for years to come. Steven Shavell, Harvard Law School, US This book is an important step toward a Chinese scholarship in law and economics, written by leading law and economics researchers from China and Europe. Hans-Bernd Schaefer, Universität Hamburg, Germany In China everything is different, you cannot apply ordinary economics and the legal framework is idiosyncratic. In the course of time, such statements turned out to be prejudices, and the Eger/ Faure/ Zhang volume makes perfectly clear that, for instance, a law and economics approach can shed new light into the intricacies and complexities of Chinese institutional arrangements. Indeed, China creates new puzzles for economic and legal analysis. On the other hand, however, the Chinese need not invent the wheel anew and they do not try it. The book shows instances where a sophisticated law and economics approach can help to develop the legal framework which is appropriate for the transition from a planned into a market economy. The Chinese economic system is not (yet) a normal capitalist market economy, neither is the legal system adapted to a normal private property economy. Nevertheless the chapters of the book apply fruitfully law and economics theories and thus prove their general applicability. One of the outstanding achievements of the volume can be seen in the fact that it recruited more than half of its contributors with a Chinese background. They learn eagerly western approaches and they learn fast. And, of course, they have no problems with understanding Chinese culture and society. So the book combines most profitably the look from the outside and the look from within with a common theoretical framework. Hans-Jürgen Wagener, Europa Universität Viadrina, Germany This book comprises contributions on recent developments in China from a law and economics perspective. For the first time Chinese and European scholars jointly discuss some important attributes of China's legal and economic system, and some recent problems, from this particular viewpoint. The authors apply an economic analysis of law not only to general characteristics of China's social order, such as the specific type of federal competition, the efficiency of taxation and regulation, and the importance of informal institutions (Guanxi), but also to distinct areas of Chinese law such as competition policy, professional regulation, corporate governance and capital markets, oil pollution, intellectual property rights and internet games. The contributors discuss to what extent the law and economic models that have so far been employed within the context of deve

A Brief Overview of China's ETS Pilots Daiqing Zhao, Wenjun Wang, Zhigang Luo, 2018-08-27 This book systematically introduces readers to the framework of China's ETS pilots, exploring their design and operating process, the current state of the carbon market, and various barriers encountered. To do so, it deconstructs the Guangdong ETS, which is the largest and most representative of China's seven ETS pilots. The book subsequently describes and evaluates all seven pilots in terms of their efficiency, macro and micro effects, the method involved in the DEA model, the CGE model, and cost-benefit analysis. In turn, in the assessment section it demonstrates how some ETS pilots have failed to control carbon emissions due to inordinately high emissions quotas issued by the local government etc. Further, it argues that ETS should focus on those industries with large emissions and high mitigating potential for the time being, and then gradually expand the scale of its coverage. As China's national ETS is slated for launch on the basis of the lessons learned from the ETS pilots, the book offers a timely and valuable resource for all those who want to understand and forecast the development of China's ETS. It includes a wealth of descriptions and explanations of Chinese government policies involving carbon emissions control, making it a unique resource.

Mastracci, Seung-Bum Yang, 2019-09-03 The Palgrave Handbook of Global Perspectives on Emotional Labor in Public Service challenges traditional public administration theory and its disavowal of the emotive component to public service delivery. Providing a comprehensive and comparative overview of the current research in this previously understudied area, this handbook situates emotional labor within public service and establishes emotional labor within individual, organizational, cultural, and situational scenarios. With chapters spanning twelve different countries across six continents, this handbook provides groundbreaking survey research that probes the daily work experience of public servants, paying special attention to the relational aspect of public service delivery. It ultimately seeks to revise the current public service paradigm, and will be an invaluable resource to researchers, public managers, and international public service organizations as the first of its kind for the public administration market.

Neoliberalism, Globalization, and Inequalities Vicente Navarro, 2020-05-06 Since U.S. President Reagan and U.K. Prime Minister Thatcher, a major ideology (under the name of economic science) has been expanded worldwide that claims that the best policies to stimulate human development are those that reduce the role of the state in economic and social lives: privatizing public services and public enterprises, deregulating the mobility of capital and labor, eliminating protectionism, and reducing public social protection. This ideology, called 'neoliberalism,' has guided the globalization of economic activity and become the conventional wisdom in international agencies and institutions (such as the IMF, World Bank, World Trade Organization, and the technical agencies of the United Nations, including the WHO). Reproduced in the 'Washington consensus' in the United States and the 'Brussels consensus' in the European Union, this ideology has guided policies widely accepted as the only ones possible and advisable. This book assembles a series of articles that challenge that ideology. Written by well-known scholars, these articles question each of the tenets of neoliberal doctrine, showing how the policies guided by this ideology have adversely affected human development in the countries where they have been implemented.

Plants and Landscapes for Summer-dry Climates of the San Francisco Bay Region Nora Harlow, 2004 Gardening. Environmental Studies. Photographs by Saxon Holt. Illustrations by Richard Pembroke. This lavishly illustrated book celebrates the challenges and opportunities of gardening in Mediterranean climates, with special reference to northern California's San Francisco Bay Region. The core of the book is a catalog of more than 650 plants suited to regions with mild, usually wet winters and dry, often hot summers. These plants thrive with moderate to no summer irrigation when established, require little or no maintenance, and are reasonably available from nurseries, botanic gardens, native plant sales, or specialty seed suppliers. Many of the 542 color photographs show plants in garden settings to suggest attractive and compatible plant combinations. Summary charts provide information on each plant, such as bloom time, needs for water and sun, and preferences for coastal or inland microclimates. Lists suggest plants for special situations, such as hot sites, dryish shade, small gardens, and clay soils. Chapters on landscape design and maintenance inspire readers to make gardens that use little water and no harmful chemicals, with a focus on building healthy soil. Practical steps to successful design are supplemented with ideas for designing with microclimate, attracting wildlife, and fire safety. Sidebars by local experts discuss weather, natural landscapes, design solutions, and gardening with recycled water. A valuable resource for climate-compatible gardening in the San Francisco Bay Area that will also be of interest to gardeners in other parts of the world with a similar seasonal pattern of winter rain and dry summers. This book will occupy a prominent place in my library for many years to come. Katherine Greenberg, president Mediterranean Garden Society This book is beautifully designed with abundant photographs of plants, many in garden settings, and it is packed with the kind of information gardeners need for their own special situations. Simply stunning Bravo Phyllis M. Faber, editor University of California Press

How Ottawa Spends 2004-2005 G. Bruce Doern, 2004 Drawing on the work of academics and other experts from across Canada, Carleton University's School of Public Policy and Administration's annual book takes a focused and robust look at an era where a political coronation seemed inevitable but high expectations had to be managed downwards almost immediately. A less-than-buoyant fiscal surplus, escalating concerns about liberal ethics and corruption, and a growing volatility in public opinion are examined as are Canadians' increasingly uncertain views about the new Liberal leadership versus the old Liberal Party's ten-year hold on power. A new Conservative Party and a suddenly feisty New Democratic Party are also a central part of the new 2004-2005 Canadian political and policy milieu.
