*Developing Creativity in Higher Education* Norman Jackson, Martin Oliver, Malcolm Shaw, James Wisdom, 2006-11-22 Graduates face a world of complexity which demands flexibility, adaptability, self-reliance and innovation, but while the development of creativity is embedded in the English National Curriculum and in workplace training, the higher education sector has yet to fully recognise its importance. This book highlights how pressures such as quality assurance, peer review systems, demands for greater efficiency and increased research output are effectively discouraging innovation and creativity in higher education. It makes a bold case for the integration of creativity in higher education, drawing together contributors and research from around the world and explores valuable lessons learnt from those working in schools and professional organisations. Offering a wealth of advice on how to foster creativity on an individual and an institutional level, this book encourages lecturers to engage with the ideas and practice involved in helping students to be creative in all areas of their study.

**TOWARD PEACE** Lyle R. Strathman, 2013-05 Toward Peace proposes that truth is essential in all matters of social intercourse for humanity to progress on any meaningful path toward peace. The manuscript progresses from the notion that there is objective truth to the notion that the enactment of truth in human activity is essential for the establishment of peace, but it admits that human beings tend to wander between knowledge and ignorance and between a beneficent will and a concupiscent will. The manuscript explores, among other matters, the contemporary subjects of fundamentalism and laissez-faireism, individualism and collectivism, economics, evolution, abortion, education, and government from philosophical, scientific, religious, and artistic points of view. This is accomplished by interweaving philosophical ideas expressed by Plato and Aristotle with parables and aphorisms expressed by ancient Indian and Chinese wise men, with Judaic and Christian scripture, and with contemporary economic data and in vogue political notions. The book is organized into three distinct parts. Part I, Truth, articles 1 through 5, establishes the notion that there is objective truth, that humanity can, at least, partially know these truths, and that a foundation of truth is essential for the establishment of any meaningful path toward peace. It develops the notion that just as the laws of physics must correctly reflect the physical parameters that an object presents, so too civil laws must correctly reflect the human parameters that a human being presents. In other words, law must reflect that truth which a being presents of itself, itself. The finality of this part suggests that truthful enactments by humanity are acts of love that pave the way toward peace. Article 1 is a short dissertation on human discord. It denotes that since the age of reason, there has been an emerging notion that majority rule democracy coupled with humanity's technical prowess would lead toward peace, but which history has shown not to be the case. Article 2 establishes the accepted idea that there is a reality--there is real being--but also that human beings are limited in their ability to acquire complete

knowledge of such reality. Article 3 establishes the idea that there is truth in every being, in every object: there is objective truth. The article presents the notion that objective truth presents itself as the nature of a thing in complete correspondence with its substance; objective truth is the nature of a thing--its act--in agreement with its substance--that which it is. It also presents the notion that human beings come to know an object by that nature which the object presents of itself; subjective truth devolves from objective truth. Article 4 advances the idea that laws are humanly contrived statements derived from the intrinsic truths in the beings to which they refer or relate; true laws may not violate the intrinsic truths in the beings to which they refer or relate. Article 5 proposes the idea that a love of truth and its compliment, the enactment and application of true laws, are precursors to the path leading toward peace. Part II, Contentions, articles 6 through 11, offers commentaries on some of the more contentious matters that cause social conflict in the contemporary world. The specific topics were chosen to show that truth is often marginalized or mutilated and even ignored or rejected during the course of humanity's search for answers in matters of social concern. Article 6 is a dissertation on fundamentalism and laissez-faireism and shows how each leads toward social discord. Fundamentalism rejects those truths that fall outside its pre-ordained dictum while laissez-faireism simply rejects truths not of its choice. Article 7 is a study of the human social composition, including a logical diagram, which analyses human fortune, intellect, free will, and physical condition. It develops the notion that because of human frailty and finitude, majority opinion and majority-rule a

Indiana's Timeless Tales - 1800 - 1804 Paul R. Wonnig, 2021-03-31 The beginning years of the Indiana Territory were eventful years. Moravian and Quaker missionaries made extensive attempts to teach Native Americans in the science of agriculture. In this volume of Indiana's Timeless Tales readers will discover the history of these attempts as well as the history of the fur industry in early Indiana. During this historical time William Clark and Meriwether Lewis began their historic expedition as the Corps of Discovery departed from George Rogers Clark's cabin in Clarksville, Indiana. *Tescopoly* Andrew Simms, 2012-03-01 You can shop anywhere you like -- as long as it's Tesco The inexorable rise of supermarkets is big news but have we really taken on board what this means for our daily lives, and those of our children? In this searing analysis Andrew Simms, director of the acclaimed think-and-do-tank the New Economics Foundation and the person responsible for introducing 'Clone Towns' into our vernacular, tackles a subject none of us can afford to ignore. The book shows how the supermarkets -- and Tesco in particular -- have brought: Banality -- homogenized high streets full of clone stores Ghost towns -- superstores have drained the life from our town centres and communities A Supermarket State -- this new commercial nanny state that knows more about you than you think Profits from poverty -- shelves full of global plunder, produced for a pittance Global food domination -- as the superstores expand overseas But there's change afoot, with evidence of the tide turning and consumer campaigns gaining ground. Simms ends with suggestions for change and corporate reformation to safeguard our communities and environment -- all over the world. This book has been written and published independently from the Tescopoly Alliance and is not endorsed by them.

Hoosiers James H. Madison, 2014-08-05 The story of this Midwestern state and its people, past and present: "An entertaining and fast read." —Indianapolis Star Who are the people called Hoosiers? What are their stories? Two centuries ago, on the Indiana frontier, they were settlers who created a way of life they passed to later generations. They came to value individual freedom and distrusted government, even as they demanded that government remove Indians, sell them land, and bring democracy. Down to the present, Hoosiers have remained wary of government power and have taken care to guard their tax dollars and their personal independence. Yet the people of Indiana have always accommodated change, exchanging log cabins and spinning wheels for railroads, cities, and factories in the nineteenth century, automobiles, suburbs, and foreign investment in the twentieth. The present has brought new issues and challenges, as Indiana's citizens respond to a rapidly changing world. James H. Madison's

**Winning the West with Words** James Joseph Buss, 2013-07-29 Indian Removal was a process both physical and symbolic, accomplished not only at gunpoint but also through language. In the Midwest, white settlers came to speak and write of Indians in the past tense, even though they were still present. *Winning the West with Words* explores the ways nineteenth-century Anglo-Americans used language, rhetoric, and narrative to claim cultural ownership of the region that comprises present-day Ohio, Indiana, and Illinois. Historian James Joseph Buss borrows from literary studies, geography, and anthropology to examine images of stalwart pioneers and vanished Indians used by American settlers in portraying an empty landscape in which they established farms, towns, and “civilized” governments. He demonstrates how this now-familiar narrative came to replace a more complicated history of cooperation, adaptation, and violence between peoples of different cultures. Buss scrutinizes a wide range of sources—travel journals, captivity narratives, treaty council ceremonies, settler petitions, artistic representations, newspaper editorials, late-nineteenth-century county histories, and public celebrations such as regional fairs and centennial pageants and parades—to show how white Americans used language, metaphor, and imagery to accomplish the symbolic removal of Native peoples from the region south of the Great Lakes. Ultimately, he concludes that the popular image of the white yeoman pioneer was employed to support powerful narratives about westward expansion, American democracy, and unlimited national progress. Buss probes beneath this narrative of conquest to show the ways Indians, far from being passive, participated in shaping historical memory—and often used Anglo-Americans’ own words to subvert removal attempts. By grounding his study in place rather than focusing on a single group of people, Buss goes beyond the conventional uses of history, giving readers a new understanding not just of the history of the Midwest but of the power of creation narratives.
