*The International Atomic Energy Agency* Russell B. Olwell, 2009 In 1957, the International Atomic Energy Agency was established for the safe, secure, and peaceful use of nuclear technology. The IAEA is best known for its inspections of suspected nuclear weapons facilities across the world, but the agency has a host of responsibilities. Whether it is encouraging the use of nuclear energy, setting safety standards for radiation exposure, or using radiation to stamp out dangerous pests, the IAEA has an impact across the planet. Once an autonomous organization, the IAEA is now a part of the United Nations and is often referred to by the media as the U.N.'s nuclear watchdog. In 2005, the agency shared the Nobel Peace Prize with its director, Mohamed ElBaradei, for its ongoing efforts to combat nuclear weapons proliferation. The International Atomic Energy Agency examines the roles of this global agency, from the inspectors who searched for traces of nuclear material in Iraq and North Korea to the fight against agricultural pests in Africa.

**Medieval Philosophy** Sharon M. Kaye, 2012-12-01 An engaging and authoritative introduction to this hugely influential era in the history of philosophy. Why do good things happen to bad people? Can we prove whether God exists? What is the difference between right and wrong? Medieval Philosophers were centrally concerned with such questions: questions which are as relevant today as a thousand years ago when the likes of Anselm and Aquinas sought to resolve them. In this fast-paced, enlightening guide, Sharon M. Kaye takes us on a whistle-stop tour of medieval philosophy, revealing the debt it owes to Aristotle and Plato, and showing how medieval thought is still inspiring philosophers and thinkers today. With new translations of numerous key extracts, Kaye directly introduces the reader to the philosophers' writings and the criticisms levied against them. Including helpful textboxes throughout the book detailing key thinkers, this is an entertaining and comprehensive primer for students and general readers alike.

The Diagnosis of Psychosis Rudolf N. Cardinal, Edward T. Bullmore, 2011-03-31 Psychosis has many causes. Psychiatrists typically receive the most thorough training in its diagnosis, but the diagnosis of psychosis secondary to nonpsychiatric conditions is not often emphasized. An understanding of the underlying cause of psychosis is important for effective management. The Diagnosis of Psychosis bridges the gap between psychiatry and medicine, providing a comprehensive review of primary and secondary causes of psychosis. It covers both common and rare causes in a clinically focused guide. Useful both for teaching and reference, the text covers physical and mental state examination, describes key investigations, and summarizes the non-psychiatric features of medical conditions causing psychosis. Particularly relevant for psychiatrists and trainees in psychiatry, this volume will also assist neurologists and general physicians who encounter psychosis in their practice.

Integrated Textbook of Geriatric Mental Health Donna Cohen, Carl Eisdorfer, 2011-07-20 As the population ages, increasing numbers of older people require the attention and services of mental health professionals. Despite their prevalence, however, mental health problems in this population often go undiagnosed and therefore untreated. This textbook offers medical students and professionals the information they need to care for older people with mental disorders. Drs. Donna Cohen and Carl Eisdorfer, two internationally recognized experts in geriatric mental health, provide a comprehensive framework within which students and practitioners alike can address the salient issues of the field. These include the biopsychosocial aging processes, specific pathologies prevalent in later life, social issues common to the elderly, the delivery of care in various settings, and the economic policies affecting services for older people. The authors' goal is not only to enhance clinical practice but also to urge physicians to develop and coordinate a more holistic care strategy that acknowledges the complex challenges of older patients. To this end, Cohen and Eisdorfer discuss essential principles of optimal care, the latest research findings, evidence- and consensus-based practice standards, resources to help professionals keep abreast of the changing mental health landscape, and ethical dilemmas of clinical practice and research. The signal strength of this book lies in its integrated approach, an approach that emphasizes the philosophy and principles of caring for older people along with clinical practices and issues. From this broader perspective, the authors describe the many factors that influence the lives, health, and well-being of older patients and their caregivers, making this an ideal text for psychiatrists, psychologists, nurses, and social workers.

**Population Aging** Donald T. Rowland, 2012-04-26 Population Aging: The Transformation of Societies presents an overview and international comparison of the causes, consequences and policy implications of one of the major processes of change in contemporary societies. It provides a foundation for understanding and reflecting on key demographic and social trends, together with related theoretical and policy frameworks that are important in explaining changes and designing informed responses. With particular reference to countries that have the oldest or largest aged populations, the book presents a synthesis of research on population aging, new analyses of trends and a discussion of the major social policy strategies. Key topics include the new demography of aging, population health, family change, the Third Age, international policy concepts and strategies, and comparisons of countries – such as in terms of the relative risks they face from population aging and their resilience as changes occur. Overall, the book presents a broad interdisciplinary perspective on the determinants and consequences of population aging. The book is written for an international audience of policy makers, educators and practitioners in health and welfare, together with students in the social sciences and health sciences. It provides an accessible and academically informed exposition of the field for people engaging with issues arising from population aging in their own country.

**Nuclear Command and Control Norms** Salma Shaheen, 2018-09-28 This book offers a new analytical framework for studying nuclear command and control (C2), based on a comparative study of four nuclear weapons states (NWS). The subject of nuclear operations management has long been shrouded in secrecy, and whilst the importance of nuclear C2 cannot be disputed, there are few academic studies into how and why states develop these systems. This volume includes a comparative study of the development of nuclear C2 by four different NWS (Britain, China, India, and Pakistan) and demonstrates that, despite several differences, there is a central set of factors that remain constant. The analytical framework used in this study identifies key factors that can potentially shape the evolution and stability of nuclear C2. These factors include geostrategic (threat) environment, international norms, leadership, and control of nuclear operations (civil-military control). The book also analyses the interaction among different stakeholders within the nuclear C2 enterprise. It recognises that politicians, the military and scientists all have key but different roles to play, and the way these stakeholders have learned to co-exist with each other is explored. This volume offers a set of dynamics that could form a global norm for nuclear C2, serving as a standard for new entrants into the nuclear club. This book will be of much interest to students of nuclear proliferation, global governance, and International Relations in general.
