**The Sisterhood of the Enchanted Forest** Naomi Moriyama, William Doyle, 2021-10-05 What would happen if you built one of the world's most advanced societies inside a forest—and strove to make women full partners in power? After living for twenty-five years in New York, Naomi Moriyama moved with her husband and co-author William Doyle and their seven-year-old child to the vast forest of Finland's Karelia, a mysterious region on the Russian border that helped inspire J.R.R. Tolkien's Middle Earth fantasies. She entered a life-altering zone of tranquility, peace, and beauty, the spiritual heart of the nation ranked as the happiest nation on Earth, with among the world's most empowered women. Finland is also the country with cleanest air and water and the best schools, a country where motherhood and fatherhood are championed by law, childhood is revered, schoolchildren are required to play outdoors multiple times a day, and trains contain mini-libraries and mini-playgrounds for children to enjoy. It was here in the Karelian forest that Naomi found a culinary symphony of succulent wild edibles, herbs, berries, mushrooms and fish, all freshly plucked from the moss-carpeted forest and sparkling clear streams. She also found something that changed her life—a tribe of invincible women who became her soul-sisters. As an idyllic summer and fall gave way to a sub-Arctic winter of mind-bending darkness and cold, Naomi faced her fears and her future. Over the course of six unforgettable months with her family and her new “sisters”, she found her life transformed, and discovered the power that lay within her all along. Then she tried to leave. But she kept coming back. Come, take a journey deep into Europe's most distant, magical wilderness, and join the sisterhood of the enchanted forest.

Modern Supercritical Fluid Chromatography Larry M. Miller, J. David Pinkston, Larry T. Taylor, 2019-12-12 Explains why modern supercritical fluid chromatography (SFC) is the leading green analytical and purification separations technology. Modern supercritical fluid chromatography (SFC) is the leading method used to analyze and purify chiral and achiral chemical compounds, many of which are pharmaceuticals, pharmaceutical candidates, and natural products including cannabis-related compounds. This book covers current SFC instrumentation as it relates to greater robustness, better reproducibility, and increased analytical sensitivity. Modern Supercritical Fluid Chromatography: Carbon Dioxide Containing Mobile Phases covers the history, instrumentation, method development and applications of SFC. The authors provided readers with an overview of analytical and preparative SFC equipment, stationary phases, and mobile phase choices. Topics covered include: Milestones of Supercritical Fluid Chromatography; Physical Properties of Supercritical Fluids; Instrumentation for SFC; Detection in SFC; Achiral SFC Method Development; Chiral SFC Method Development; and Preparative Scale SFC. The book also includes highlights of modern applications of SFC in the final chapters—namely pharmaceuticals, consumer products, foods, polymers, petroleum-related mixtures, and cannabis—and discusses the future of SFC. Provides a clear explanation of the physical and chemical properties of supercritical fluids, which gives the reader a better understanding of the basis for improved performance in SFC compared to HPLC and GC Describes the advantages of SFC as a green alternative to HPLC and GC for the analysis of both polar, water-soluble, and non-polar analytes Details both achiral and chiral SFC method development, including modifiers, additives, the impact of temperature and pressure, and stationary phase choices Details why SFC is the premier modern preparative chromatographic technique used to purify components of mixtures for subsequent uses, both from performance and economic perspectives Covers numerous detectors, with an emphasis on SFC-MS, SFC-UV, and SFC-ELSD (evaporative light scattering detection) Describes the application of SFC to numerous high-value application areas Modern Supercritical Fluid Chromatography: Carbon Dioxide Containing Mobile Phases will be of great interest to professionals, students, and professors involved in analytical, bioanalytical, separations science, medicinal, petroleum, and environmental chemistries. It will also appeal to pharmaceutical scientists, natural-product scientists, food and consumer-products scientists, chemical engineers, and managers in these areas.

**Advancing the Method and Practice of Transnational Law** Julien Chaisse, Oana Stefan, 2023-09-21 This book adopts a transnational methodology to reflect on the legalisation of international economic relations. A Liber Amicorum for Professor Francis Snyder, it outlines the ways in which legal scholarship has taken his legacy further in relation to the concept of transnational law, the 'law in context' method, and the evolution of sustainability law. The lens is both theoretical and practical, delving into international investment law, financial/monetary law, free trade agreements, indigenous rights, and food law, and covering case studies from EU law, WTO law, American law, Chinese law, and Indonesian law. The chapters explore how Snyder's ideas have advanced legal research and determined change in regulation, impacting trade relationships worldwide. Part I of the book gives an overview of the actors, the norms, and the processes of transnational economic law, discussing sites of governance, legal pluralism, and soft law. Part II takes stock of the 'law in context' research method, looking not only at the way in which it can be refined and used by academics, but also at the practical implications of such a method to improve regulatory settings and promote social and policy goals (including the emerging generation of FTAs, such as TPP, TTIP, and RCEP). Part III focuses on sustainability law, assessing Francis Snyder's contribution to systemic changes and reforms in China and the Asia Pacific region. The book is a must have for any academic or practitioner interested in an up-to-date account of the recent developments in transnational trade law research.

**A Farewell to Wars** Hans Blix, 2023-09-30 With decades of experience as an international lawyer, diplomat and head of UN Iraq inspections, Hans Blix analyzes conflicts between states. He finds that since 1945, military deterrents, fear of nuclear war, and diplomacy are among the factors that have prevented wars between great powers and restrained interstate uses of force.

European Foreign Policy During the Cold War Daniel Möckli, 2008-10-30 This is the first comprehensive study of European foreign policy in this period. It is based on extensive and original interviews with Henry Kissinger among others and lots of new, previously unavailable primary sources. It addresses the very current issue of American-European relations. Europe's first attempts at a united foreign policy after 1969 were remarkably successful but by 1974 this brief moment of concord had vanished. Why were the EC countries able to speak with one voice in the early 1970s, what caused European Political Cooperation to plunge into crisis, and what consequences - still felt today - did this have for Europe's role in the world and its relations with the US? This ground-breaking book is the first to analyse this period using previously unavailable archival material and first-hand interviews. European Foreign Policy

during the Cold War illuminates the challenge of establishing Europe as an effective political power with brilliant clarity. Filling an important gap in the history of Europe, it covers an issue that is highly topical and controversial today.

**Transforming NATO in the Cold War** Andreas Wenger,Christian Nuenlist,Anna Locher,2006-11-22 The first comprehensive history of NATO in the 1960s, based on the systematic use of multinational archival evidence. This new book is the result of a gathering of leading Cold War historians from both sides of the Atlantic, including Jeremi Suri, Erin Mahan, and Leopoldo Nuti. It shows in great detail how the transformation of NATO since 1991 has opened up new perspectives on the alliance's evolution during the Cold War. Viewed in retrospect, the 1960s were instrumental to the strengthening of NATO's political clout, which proved to be decisive in winning the Cold War – even more so than NATO's defense and deterrence capabilities. In addition, it shows that NATO increasingly served as a hub for state, institutional, transnational, and individual actors in that decade. Contributions to the book highlight the importance of NATO's ability to generate soft power, the scope and limits of alliance consultation, the important role of common transatlantic values, and the growing influence of small allies. NATO's survival in the crucial 1960s provides valuable lessons for the current bargaining on the purpose and cohesion of the alliance. This book will be of much interest to students of international history, Cold War studies and strategic studies.

**Iran and the Nuclear Question** Mohammad Homayounvash,2016-09-13 Spanning over a period of more than five decades since its inception, Iran's nuclear programme is the most protracted civilian nuclear program in the world and one of the most politicized projects in Iran's history. 'Iran and the Nuclear Question' offers a historiographical portrait of Iran's early nuclear program under Mohammad Reza Shah Pahlavi. Using declassified archival material, the book thematically chronicles the program's genesis, evolutionary trajectory, and devolution from the 1950s through to the 1970s. It also catalogues the Revolutionary Iran's early socialization into the atom and the Islamic Republic's gradual change of heart about nuclear energy that culminated in the incremental resuscitation of the Shah's nuclear enterprise in the 1980s. As the first archive-based account of one of the most long-lasting and capital-intensive nuclear enterprises during the Cold War, 'Iran and the Nuclear Question' is a valuable resource for students and scholars of Iranian, Middle East and Security Studies. Written in a clear and accessible format, it will also appeal to those with a more general interest in Iran and its nuclear journey.

**China into Africa** Robert I. Rotberg,2009-10-01 Africa has long attracted China. We can date their first certain involvement from the fourteenth century, but East African city-states may have been trading with southern China even earlier. In the mid-twentieth century, Maoist China funded and educated sub-Saharan African anticolonial liberation movements and leaders, and the PRC then assisted new sub-Saharan nations. Africa and China are now immersed in their third and most transformative era of heavy engagement, one that promises to do more for economic growth and poverty alleviation than anything attempted by Western colonialism or international aid programs. Robert Rotberg and his Chinese, African, and other colleagues discuss this important trend and specify its likely implications. Among the specific topics tackled here are China's interest in African oil; military and security relations; the influx and goals of Chinese aid to sub-Saharan Africa; human rights issues; and China's overall strategy in the region. China's insatiable demand for energy and raw materials responds to sub-Saharan Africa's relatively abundant supplies of unprocessed metals, diamonds, and gold, while offering a growing market for Africa's agriculture and light manufactures. As this book illustrates, this evolving symbiosis could be the making of Africa, the poorest and most troubled continent, while it further powers China's expansive economic machine. **A Dream Deferred** Howard Karger,2017-07-28 From its inception in the late nineteenth century, social work has struggled to carry out the complex, sometimes contradictory, functions associated with reducing suffering, enhancing social order, and social reform. Since then, social programs like the implementation of welfare and the expansion of the service economy-which should have augured well for American social work-instead led to a continued loss of credibility with the public and within the academy.A Dream Deferred chronicles this decline of social work, attributing it to the poor quality of professional education during the past half-century. The incongruity between social work's promise and its performance warrants a critical review of professional education. For the past half-century, the fortunes of social work have been controlled by the Council of Social Work Education, which oversees accreditation of the nation's schools of social work. Stoesz, Karger, and Carrilio argue that the lack of scholarship of the Board of Directors compromises this accreditation policy. Similarly, the quality of professional literature suffers from the weak scholarship of editors and referees. The caliber of deans and directors of social work educational programs is low and graduate students are ill-prepared to commence studies in social work. Further complicating this debate, the substitution of ideology for academic rigor makes social work vulnerable to its critics.The authors state that, since CSWE is unlikely to reform social work education, schools of social work should be free to obtain accreditation independently, and they propose criteria for independent accreditation. A Dream Deferred builds on the past, presents a bracing critique of the present, and proposes recommendations for a better future that cannot be ignored or dismissed.

**China in Africa** Arthur Waldron,2008 Beginning in earnest at the turn of the twenty-first century, China embarked on a robust multilevel engagement strategy with a number of African states on three simultaneous fronts--economic, political, and military. The push was predicated by Beijing's need to secure energy and natural resources to fuel its booming economy and bolster its position as the world's manufacturing hub. The depth of China's engagement cannot be understated, and its increasing stakes in the security dimension of Africa's myriad conflicts is affecting the geopolitical landscape of a continent that has been in the past an exclusive domain of the West. China in Africa examines the multifaceted effects of China's engagement with the continent, both its many risks and opportunities. It provides critical and relevant information for understanding the strategic drivers, trends, and the potential impact of China in Africa. The book covers Chinese soft and hard power, energy and arms relations, and China's relations with individual African countries: Angola, Djibouti, Egypt, Eritrea, Ethiopia, Nigeria, Somalia, Sudan, Zambia, and Zimbabwe. Ultimately, this volume serves to assist in improving U.S. policymakers' understanding of China's role in Africa and ensure that appropriate measures are taken to secure American interests in the region. Von der passiven Bodennutzungsplanung zur aktiven Bodenpolitik Andreas Hengstermann,2019-09-14 Andreas Hengstermann untersucht am Beispiel von Lebensmittel-Discountern die Wirksamkeit aktiver Bodenpolitik im Vergleich zu einer traditionellen, passiven Bodennutzungsplanung und zeigt auf, welche Vorgehensweise stärker zu einer Steuerung der räumlichen Entwicklung beiträgt. Diese bislang theoretisch begründete Annahme bildet die Grundlage des aktuellen Wandels des Schweizer Planungssystems und wird in ein empirisch untersuchbares Forschungsdesign übertragen. Die Wahl von Discounter-Filialen ermöglicht vergleichbare und aussagekräftige Rückschlüsse zur Wirksamkeit bodenpolitischer Strategien öffentlicher Planungsträger.
