Modi & India Rahul Shivshankar, Siddhartha Talya, 2023-11-10 Focuses on how dharma provides the foundation for a new republic—Bibek Debroy Intensely researched argument about an alternative idea of India—Salman Khurshid The year 2014 was a consequential one for the Bharatiya Janata Party and for India. Will 2024 also be so? Is this election about stopping the rise of Narendra Modi and his alleged distortion of the ‘idea of India’ as conceived by its founders, or the beginning of a dharma-inspired ‘second republic?’ In 2014, the BJP, under the leadership of Modi, won a clear majority in the Lok Sabha elections. The National Democratic Alliance’s triumph ended a nearly two-and-a-half-decade run of mostly messy coalition governments. In 2019, the BJP further improved its tally, cementing its parliamentary majority and its ability to ring in transformational laws and policies. Most of the initiatives taken by the Modi-led NDA have been aimed at positioning Bharat as a ‘Vishwa Guru’—an exemplar of moral righteousness, a pluralistic democracy led by dharma and drawing sustenance from the wellspring of an eternal Hindu universalism. But this shift towards India’s Hindu ethos has prompted the Opposition and many allied commentators to fear the rise of a second republic—a ‘Hindu Rashtra’—moored to an implacable ultra-nationalist and majoritarian dogma. The INDIA bloc has declared the 2024 election as the last opportunity to stop the rise of Modi and his idea of India. Evocative, anecdotal, argumentative and deeply researched, Modi and India: 2024 and the Battle

for Bharat chronicles the emergence of, and the battle for, a new republic in the making.

Backlash against Welfare Mothers Ellen

Reese, 2005-07-29 Backlash against Welfare Mothers is a forceful examination of how and why a state-level revolt against welfare, begun in the late 1940s, was transformed into a national-level assault that destroyed a critical part of the nation's safety net, with tragic consequences for American society. With a wealth of original research, Ellen Reese puts recent debates about the contemporary welfare backlash into historical perspective. She provides a closer look at these early antiwelfare campaigns, showing why they were more successful in some states than others and how opponents of welfare sometimes targeted Puerto Ricans and Chicanos as well as blacks for cutbacks. Her research reveals both the continuities and changes in American welfare opposition from the late 1940s to the present. Reese brings new evidence to light that reveals how large farmers and racist politicians, concerned about the supply of cheap labor, appealed to white voters' racial resentments and stereotypes about unwed mothers, blacks, and immigrants in the 1950s. She then examines congressional failure to replace the current welfare system with a more popular alternative in the 1960s and 1970s, which paved the way for national assaults on welfare. Taking a fresh look at recent debates on welfare reform, she explores how and why politicians competing for the white vote and right-wing think tanks promoting business interests appeased the Christian right and

manufactured consent for cutbacks through a powerful, racially coded discourse. Finally, through firsthand testimonies, Reese vividly portrays the tragic consequences of current welfare policies and calls for a bold new agenda for working families.

Introduction to Public Law and Human Rights – REVISION GUIDE Özgür Heval Çınar,2021-10-15 Public Law and Human Rights is a core module in the legal education of the United Kingdom (UK). Throughout the world it is known as common law. While common law consists of case-law and statutes, it has reached its present state by incorporating elements of international law, prerogative power and other legal and non-legal sources such as conventions and customs. This book closely examines the public law (constitution and administrative law) and human rights system of the UK (England and Wales in particular). The reason for the emergence of this book is that other publications do not explain such a complex issue in plain language, which makes it very difficult for those taking an interest, in particular A-level as well as LLB/LLM law students. This book does not repeat material that is available in many textbooks that are in print. Rather, it endeavours to present every topic in plain language and concludes every chapter with a fictitious, explanatory sample case. This book will also assist students to prepare for examinations. It comes with a test that summarizes all the subjects contained in the book, which is appropriate to the first stage SQE (Solicitors Qualifying

Examination) examination. This concise text brings clearly into focus the key elements of public law and human rights. The Q&A approach, examples and exercises provide an excellent way for students to both gain knowledge and apply that knowledge to this complex area of law. – Dr Ryan Hill, Deputy Head of School, Anglia Ruskin University, Law School, UK This resource presents the core framework of Public Law and human rights within the United Kingdom, and also the key current debates surrounding this subject, in clear and accessible language. The technique of using fictional cases to work through practical issues is an excellent way for students to gain insight into the real world application of theoretical principles. Not only does this book help prepare learners for assessments, it also provides support in developing critical legal thinking which will be of great value in their professional lives. – Javier Garcia Oliva, Professor of Law, The University of Manchester, UK

Southeast Asia in Search of an ASEAN Community Rodolfo Severino, 2006 Not just another book on ASEAN, this volume reappraises the organization from the inside, through controversial or perplexing issues such as the ASEAN Way, the accession of the new members, including Myanmar, the principle of non-interference, regional security, regional economic integration, the haze and SARS, and ASEAN's future. Written by a key player, the former ASEAN Secretary-General, this book will illuminate the inner workings of the key Southeast Asian regional institution. It is a must-read for journalists, policy-makers, political scientists and others who need an insiders' view on how ASEAN has evolved, how it operates and whether it will remain relevant in the evolving Asia Pacific and global order.

Biological and Environmental Hazards, Risks, and Disasters Ramesh Sivanpillai, 2015-11-17 *Biological and Environmental Hazards, Risks, and Disasters* provides an integrated look at major impacts to the Earth's biosphere. Many of these are caused by diseases, algal blooms, insects, animals, species extinction, deforestation, land degradation, and comet and asteroid strikes that have important implications for humans. This volume, from Elsevier's Hazards and Disasters Series, provides an in-depth view of threats, ranging from microscopic organisms to celestial objects. Perspectives from both natural and social sciences provide an in-depth understanding of potential impacts. Contributions from expert ecologists, environmental, biological, and agricultural

scientists, and public health specialists selected by a world-renowned editorial board Presents the latest research on damages, causality, economic impacts, fatality rates, and preparedness and mitigation Contains tables, maps, diagrams, illustrations, and photographs of hazardous processes

Health Information Systems Alfred

Winter, Reinhold Haux, Elske Ammenwerth, Birgit Brigl, Nils Hellrung, Franziska Jahn, 2011-01-18
Previously published as Strategic Information Management in Hospitals; An Introduction to Hospital Information Systems, Health Information Systems Architectures and Strategies is a definitive volume written by four authoritative voices in medical informatics. Illustrating the importance of hospital information management in delivering high quality health care at the lowest possible cost, this book provides the essential resources needed by the medical informatics specialist to understand and successfully manage the complex nature of hospital information systems. Author of the first edition's Foreword, Reed M. Gardner, PhD, Professor and Chair, Department of Medical Informatics, University of Utah and LDS Hospital, Salt Lake City, Utah, applauded the text's focus on the underlying administrative systems that are in place in hospitals throughout the world. He wrote, These challenging systems that acquire, process and manage the patient's clinical information. Hospital information systems provide a major part of the information needed by those paying for health care. their components; health information

systems; architectures of hospital information systems; and organizational structures for information management.

Policy Design in the European Union Risto Heiskala, Jari Aro, 2018-01-24 This edited collection addresses a paradox at the heart of the European Union: if it is a constantly enlarging empire of governance, how can almost thirty member states design policies as an administrative whole, whilst narrowly approaching all political issues from one economic point of view? The contributors to this collection approach this by studying knowledge production, policy formation and policy implementation in the union. The topics covered include the history of the union, its nature as an empire in the making compared to historical successors as well as current USA and China, formation of union level statistical data and policy documents, paradoxes of fiscal governance, social innovation policy, youth and education policy, energy policy and foreign policy with particular regard to Russia. The concluding chapter outlines five alternative future scenarios for the union extending from collapse and marginalization to the emergence of a federal empire. The book is essential reading for anybody interested in the EU, including students and scholars across a range of disciplines, including sociology, political science, international relations, economics, management studies, public and social policy, science and technology studies, and environmental policy.

Profiles of the Vaccine-Injured Children's Health Defense, Robert F. Kennedy Jr., 2022-10-25
Are vaccine injuries really “one in a million,” as governments and public health experts constantly tell us? This comprehensive look at the evidence by Children's Health Defense, illustrated by nine real-life stories of serious vaccine injury, exposes health agencies' soft-pedaling of vaccine risks as a dangerous lie. For most people, the potential risks of vaccination, which include life-changing illness, family bankruptcy, and even death, are invisible and almost inconceivable—until a vaccine injury happens to them. Through the poignant and riveting stories of nine injured children and adults, *Profiles of the Vaccine-Injured* by Children's Health Defense communicates the devastating impacts of vaccine damage on health, family finances, relationships, and more. As the book's introductory chapters show, vaccine injuries—whether from a routine childhood injection—or a travel vaccine—or a COVID-19 shot—are common, not rare. Discussing US children's poor showing in global health rankings, the book assembles compelling evidence pointing to childhood vaccination as a key “elephant in the

room." The heart of the book resides in the vaccine injury stories told by mothers of injured children and injured adults. Conveying in vivid detail what it's like to live with conditions such as severe autism, chronic pain, and immune systems gone haywire, the nine individuals also attest to the disturbing fact that "when it comes to vaccine injuries, there's no help legally or financially—you're on your own." In addition, they share affecting accounts of gaslighting, a lack of answers or solutions and outright hostility from the medical community, social isolation, heavy financial burdens, and interrupted careers and lives. Exposing the truth behind the vaccine safety myth, *Profiles of the Vaccine-Injured* makes vaccine injury personal and demonstrates that we ignore vaccine risks at our peril.

Organized Crime and Illicit Trade Virginia Comolli, 2018-03-24 Unlike much of the existing literature on organised crime, this book is less focused on the problem per se as it is on understanding its implications. The latter, especially in fragile and conflict regions, amount to strategic challenges for the state. Whereas most commentators would agree that criminal activities are harmful, this volume addresses the questions of 'how?', 'for whom?' and, controversially, 'are they always harmful?' The volume is authored by experts with multi-year experience analysing criminal and other non-state activities. They do so through different lenses - conflict and security, development, and technology - engaging academics, practitioners and policy makers. They offer a comprehensive integrated

response to the challenges of transnational organised crime beyond traditional law-enforcement driven recommendations.

What is Land For? Matt Lobley, Michael Winter, 2009-12 In recent decades agricultural commodity surpluses in the developed world have contributed to a mantra of 'land surplus' in which set-aside, extensification, alternative land uses and 'wilding' have been key terms in debates over land. Quite suddenly all this has changed as a consequence of rapidly shifting commodity markets. Prices for cereals, oil seeds and other globally traded commodities have risen sharply. A contributor to this has been the shift to bioenergy cropping, fuelled by concerns over post-peak oil and climate change. Agricultural supply chain interests have embraced the 'new environmentalism' of climate change with enthusiasm, proudly proclaiming the readiness of the industry to produce both food and energy crops, and to do so with a neo-liberal confidence in markets to determine the balance between food and non-food crops in land use. But policy and politics have not necessarily caught up with these market and industry-led changes and some environmentalists are beginning to challenge the assumptions of the new 'productivism'. Is it necessarily the case, they ask, that agriculture's best contribution to tackling climate change is to grow bioenergy crops or invest in anaerobic-digesters or make land over for windfarms? Might not there be an equally important role in maximising the carbon sequestration or water-holding properties of biodiverse land? What is

Land For? tackles these key cutting-edge issues of this new debate by setting out a baseline of evidence and ideas.

Building Communities through Food David F. Purnell,2019-06-28 This book examines the power of food as a communicative tool to bring people of diverse backgrounds together. The author argues that food enables people to look past their differences and focus on their similarities, thus creating a stronger sense of community via the sharing of a meal.
