**World Police Encyclopedia: L-Z, index** Dilip K. Das, 2006 The World Police Encyclopedia is the only existing reference work to systematically survey all the police systems in all the countries of the world (the 189 UN member states plus Switzerland). Each article describes police history; police education and training; structure of the force(s) in relation to the country's form of government and criminal justice system; police responsibilities and duties; most common crimes; structure and role of the courts; correction structure; organization and function of the police force(s); use of firearms; local and central interactions; community relations; and current issues and challenges. This unique resource will be of interest to scholars of history, foreign policy, and politics as well as government agencies, NGOs, and others involved in working internationally to control international and domestic crime.

Secret History Nick Redfern, 2015-04-20 History is written by the winners—and the powerful—but how much of it is fiction? And who is really in control today? From the dawn of civilization to the 21st century, from ancient aliens to the New World Order, *Secret History: Conspiracies from Ancient Aliens to the New World Order* examines, explores, and uncovers the hidden, overlooked, and buried history of mankind. The book moves from biblical, Egyptian, Mayan, Greek, and early mysteries of antiquity to the clandestine doings of the Nazis and the Masons and assassination plots of the more recent past to the surveillance, monitoring, mind-control, and secret schemes of today. Researcher Nick Redfern investigates the stories, mythologies, lore behind incredible events and clandestine groups of yesterday and today. More than 60 entries dig deep into the manipulation of events by influential groups, including ... • Historical riddles—alien visitations, space gods, and human–alien crossbreeding. • Government cover ups—mind control, murders, scientists, and secret agents. • Powerful groups and intended consequences—9-11, new world order, bird-flu, and chemtrails. Tracing the chilling and lasting effects of conspiracies, cabals, and plots, *Secret History: Conspiracies from Ancient Aliens to the New World Order* exposes their deep reach in shaping today's world.

**Asia Rising** Hal Hill, Maria Socorro Gochoco-Bautista, 2013-01-01 'This book provides a coherent and current account of how India, Indonesia, Malaysia, Thailand, the Philippines and the People's Republic of China coped with the Asian financial crisis of the 1990s and the recent global economic recession, and how they may address future challenges in maintaining growth in difficult times. It features a valuable overview of issues from a regional perspective, five chapters on general elements and obstacles in development, and individual chapters on the experience of each of the six countries. Every chapter is replete with relevant institutional and statistical data. The volume fills a void in the literature and is highly recommended for graduate students and for economists concerned with contemporary Asia.' – Peter Drake, The University of New England and Australian Catholic University, Australia 'To understand what makes Asia tick in the face of continuing global uncertainty and instability one has to go beyond numbers into the region's psyche and idiosyncrasies. This volume provides an interestingly intrusive and refreshingly insightful analysis of a highly complex phenomenon that defies generalizations as shown by the diversity of individual country experiences.' – Mohamed Ariff, International Centre for Education in Islamic Finance (INCEIF), Malaysia The center of global economic activity is shifting rapidly towards Asia, driven by a combination of the economic dynamism of the People's Republic of China, India, and other middle-income Asian countries, and sluggish growth in the OECD economies. The rapid growth and rising global prominence have raised a range of major challenges for Asia and for the rest of the world. This

comprehensive, forward-looking book examines these issues through in-depth studies of major Asian economies and an analysis of the key development policy options. The contributors, leading international authorities in their field, explore cross-cutting thematic issues with special reference to developing Asia. They address a broad range of subjects including: investment and productivity, savings and the savings–investment relationship, financial development, the provision of infrastructure, and governance and institutions. Detailed country studies focusing on the People's Republic of China, India, Indonesia, Malaysia, the Philippines, and Thailand not only provide an analytical narrative for each case study, but also draw attention to the similarities and diversity within the region. This challenging and thought-provoking book will prove an important point of reference for scholars, researchers, and students in the fields of economics, development economics, and Asian studies.

**Palliative Treatment for Advanced Cancer Patients** Cynthia Pereira de Araújo, 2023-05-05 This book presents an important reflection on the concept and limits of the Fundamental Right to Health as opposed to a supposed “Right to Hope” in the context of the treatment of patients with advanced cancer. The central idea of the work is the question of whether and to what extent patients with advanced cancer have the right to legally demand a palliative treatment whose efficacy has not been proven from the point of view of the desired objectives. The book demonstrates how hope cannot be subject to legal protection and, also, that, even if theoretical-legal reasons were not sufficient for the absence of an abstract right to hope, ethical reasons would be. The work concludes that the best palliative care, rather than palliative treatment, guarantees the best right to health for advanced cancer patients, especially in terminal cases. In addition to this theoretical discussion, the book also presents the results of a qualitative research the author conducted with 48 advanced cancer patients in Brazil and Germany to investigate their expectations towards chemotherapy. This study has confirmed that many patients decide to undergo often toxic and exhausting treatments, unrealistically believing that their cancer is curable or that, as long as they continue with a course of chemotherapy, cancer may be beaten. *Palliative Treatment for Advanced Cancer Patients: Can Hope Be a Right?* will be of interest to health professionals and social workers working with advanced cancer patients, as well as to researchers in the fields of public health, bioethics, medical ethics and health law, especially those interested in the growing interdisciplinary field of end-of-life decision-making.

**Constitutional Erosion in Brazil** Emilio Peluso Neder Meyer, 2021-07-15 This book provides a fascinating analysis of a single jurisdiction, Brazil, and accounts for both the successes and the failures of its most recent constitutional project, inaugurated by the Constitution of 1988. It sets out the following aspects of the constitutional development and erosion: - the different phases of the promised transition from military rule to a 'social-democratic constitutionalism'; - the obstacles to democratisation derived from the absence of true institutional reforms in the judicial branch and in the civil-military relationship; - the legal and social practices which maintained a structure that obstructed the emergence of an effective social-democracy, such as the neoliberal pattern, the acceptance in the political field of unlawful organisations, such as the *milícias*, and the way the digital revolution has been harming the formation of democratic sovereignty. Situating Brazil in the global context of the revival of authoritarianism, it details the factors which are common to the third wave of democratisation reflux. Accounting for those aspects, particular to the Brazilian jurisdiction, it shows that there is a tension in the Brazilian constitution. On the one hand, such constitutionalism was renewed by democratic pressure on governments to undertake social politics since 1988. On the other hand, it retained authoritarian practices through the hands of diverse institutions and political actors. By exploring the ideas of constitutional erosion and collapse, as well as democratic, social and digital constitutionalism, the book presents a comparative analysis of Brazil and other jurisdictions, including

the United States, South Africa, and Peru.

**Close Encounters of the Fatal Kind** Nick Redfern,2014-06-23 From a journalist specializing in conspiracy theories, an examination of mysterious deaths and missing persons related to sightings of UFO phenomena. Everyone has heard of Close Encounters of the Third Kind. But what about close encounters of the fatal kind? The field of UFOs is rife with unsettling examples of suspicious deaths. Accounts of accidents that might not have been accidents after all, abound. Researchers and witnesses have vanished, never to be seen again. Conveniently timed heart attacks are reported. Out-of-the-blue suicides that, upon investigation, bear the distinct hallmarks of murder, are all too common. And grisly deaths at the hands of both extraterrestrials and government agents have occurred. Highlights of Close Encounters of the Fatal Kind include: The strange saga of the incredible melting man The UFO-related death of the first U.S. Secretary of Defense, James Forrestal The mysterious disappearances of military pilots and their connection to UFOs The connections between national security and the sudden deaths of UFO investigators Getting too close to the cosmic truth about alien abductions Roswell, and what the government really knows about UFOs can—clearly—be a deadly business The government's latest admission of the existence of Area 51 is barely the tip of a very big iceberg.

**Reducing Gun Violence in America** Daniel W. Webster,Jon S. Vernick,2013-01-28 The book includes an analysis of the constitutionality of many recommended policies and data from a national public opinion poll that reflects support among the majority of Americans—including gun owners—for stronger gun policies.

**Europe, Globalization, and the Coming of the Universal Caliphate** Bat Ye'or,2011-09-16 The scope and the theme of the book is to analyze the modern political trends and strategies that are leading to major changes in Western civilization, America included, since the OIC strategy targets America also. Learning from the European experience is crucial for Americans. Moreover this evolution is inscribed in the historical movement of Islamic theology and expansionism. It is not fortuitous but it has its own theological and political structure that must be known in the West if we wish to live in a peaceful world.

**International Human Resource Development** Elaine S. Potoker,2010-11 Workforce mobility and cultural diversity within contemporary international organizations pose unique challenges for managers and HR professionals. Overcoming the challenges of developing and training such a workforce requires the ability to bridge diverse working, learning and communication styles. In contrast with conventional organizational approaches to international HRD, International Human Resource Development: A Leadership

Perspective explores workforce development from a personal perspective, challenging practitioners to develop their own leadership, learning and communication skills. As a point of departure, the book uses a demographic analysis of the workforces of a number of key countries in order to examine cultural implications for training and development, and for best practice. Drawing on a unique anthropological perspective and complete with case studies, exercises and an extensive glossary this text will prove an important resource for students of human resource development, human resource management and international business.

**Fast Facts about PTSD** Lisa Y. Adams, PhD, MSc, RN, 2017-09-28 This is concise, quick-access guide to the full continuum of care for all major health care professionals working with individuals suffering from PTSD. The most comprehensive book available about caring for this population, it encompasses the history of PTSD, its theoretical underpinnings, and complete instructions for conducting a full screening, assessment, and diagnosis for people with PTSD. Designed to facilitate speedy access to information, the guide consists of short paragraphs, bulleted information, and “Fast Facts in a Nutshell” boxes containing critical points. **Evil** Ernie Rohrbacher, 2015-01-26 Evil not only does not exist, yet rather it cannot exist! Are our concepts of Satan and God inaccurate? Have we mistakenly allowed an improper role of Satan and God into our lives? If Evil cannot exist, what role does God play? Some of you may call this blasphemous. Some of you may consider it thought provoking. Others may agree while others may disagree. In a first of its kind, Evil - a Concept in Crisis, should increase your understanding of the world and Universe we live in, by changing our perception towards Evil and the Almighty.

Mobile Services for Toy Computing Patrick C. K. Hung, 2015-08-24 The goal of this book is to crystallize the emerging mobile computing technologies and trends by focusing on the most promising solutions in services computing. The book will provide clear proof that mobile technologies are playing an increasingly important and critical role in supporting toy computing. The goal of this book is to bring together academics and practitioners to describe the use and synergy between the above-mentioned technologies. This book is intended for researchers and students working in computer science and engineering, as well as toy industry technology providers, having particular interests in mobile services.

*Fundamental Nursing Skills* Penelope Ann Hilton, 2006-02-22 Providing forward-thinking approaches and ideas for nurses of all categories, this reference has been written primarily in response to increasing concerns regarding the perceived lack of ability in both students and newly qualified nurses to perform clinical skills. By outlining the elements of essential nursing procedure in a readily accessible format, including rationale for recommended actions and promoting evidence-based practice, this text encourages

the reader to keep a record of achievement in relation to clinical skill competence. The selection of skills included is based on extensive consultation with experienced clinicians, students, clients and teachers of nursing. Each procedure has been carefully researched to provide a contemporary foundation for practice. The text also contains a rapid reference section of common terminology, conversion tables, laboratory results and other useful information.

Controlling Small Arms Peter Batchelor, Kai Michael Kenkel, 2013-11-20 This edited volume takes stock of the state of research and policy on the issue of Small Arms and Light Weapons (SALW), ten years after the UN first agreed to deal with the problem. The end of the Cold War originated a series of phenomena that would subsequently come to dominate the political agenda. Perhaps most symptomatic of the ensuing environment is the marked escalation in the scale and dynamics of armed violence, driven by the proliferation of SALW. Events in Rwanda, Somalia and Bosnia seared into global consciousness the devastating effects of this phenomenon, and of the necessity to engage actively in its limitation and prevention. This edited volume explores and outlines the research and policy on the SALW issue at this critical juncture. In addition to providing a detailed telling of the genesis and evolution of SALW research and advocacy, the volume features a series of essays from leading scholars in the field on both advances in research and action on SALW. It reflects on what has been achieved in terms of cumulative advances in data, methodology and analysis, and looks at the ways in which these developments have helped to inform policy making at national, regional and international levels. Alongside situating and integrating past and present advances in advocacy and international action, Controlling Small Arms also outlines future directions for research and action. This book will be of much interest to students of small arms, peace and conflict studies, peacebuilding, security studies and IR.

Encyclopedia of Science and Technology Communication Susanna Hornig Priest, 2010-07-14 The explosion of scientific information is exacerbating the information gap between richer/poorer, educated/less-educated publics. The proliferation of media technology and the popularity of the Internet help some keep up with these developments but also make it more likely others fall further behind. This is taking place in a globalizing economy and society that further complicates the division between information haves and have-nots and compounds the challenge of communicating about emerging science and technology to increasingly diverse audiences. Journalism about science and technology must fill this gap, yet journalists and journalism students themselves struggle to keep abreast of contemporary scientific developments. Scientist - aided by public relations and public information professionals - must get their stories out, not only to other scientists but also to broader public audiences. Funding agencies increasingly expect their grantees to engage in outreach and education, and such activity can be seen as both a survival strategy and an ethical imperative for taxpayer-supported, university-based research. Science communication, often in new forms, must expand to meet all these needs. Providing a comprehensive introduction to students, professionals and scholars in this area is a unique challenge because practitioners in these fields must grasp both the principles of science and the principles of science communication while understanding the social contexts of each. For this reason, science journalism and science communication are often addressed only in advanced undergraduate or graduate specialty courses rather than covered exhaustively in lower-division courses. Even so, those entering the field rarely will have a comprehensive background in both science and communication studies. This circumstance underscores the importance of compiling useful reference materials. The Encyclopedia of Science and Technology Communication presents resources and strategies for science communicators, including theoretical material and background on recent controversies and key institutional actors and sources. Science communicators need to understand

more than how to interpret scientific facts and conclusions; they need to understand basic elements of the politics, sociology, and philosophy of science, as well as relevant media and communication theory, principles of risk communication, new trends, and how to evaluate the effectiveness of science communication programmes, to mention just a few of the major challenges. This work will help to develop and enhance such understanding as it addresses these challenges and more. Topics covered include: advocacy, policy, and research organizations environmental and health communication philosophy of science media theory and science communication informal science education science journalism as a profession risk communication theory public understanding of science pseudo-science in the news special problems in reporting science and technology science communication ethics.

*Peace and Violence in Brazil* Marcos Alan Ferreira, 2021-10-28 This edited volume examines how the multiple manifestations of social violence in Brazil impacts the building of a peaceful society. The chapters reflect on the role of state, organized crime and civil society. They provide a unique analysis of how the Brazilian state deals with criminal violence, but also finds challenges to comply with Sustainable Development Goal 16, to interdict police violence, and to provide an efficient gun policy. The book shows the agency of civil society in a violent society, in which NGOs and communities engage in key peace formation action, including advocacy for human rights and promoting arts. The overall aim of this book is to advance the research agenda regarding the intersections between peace, public security, and violence, under the lens of peace studies. In Brazil, the challenges to peace differ markedly from areas in regular conflict.
