Natural Language Processing with Python Steven Bird,Ewan Klein,Edward Loper,2009-06-12 This book offers a highly accessible introduction to natural language processing, the field that supports a variety of language technologies, from predictive text and email filtering to automatic summarization and translation. With it, you'll learn how to write Python programs that work with large collections of unstructured text. You'll access richly annotated datasets using a comprehensive range of linguistic data structures, and you'll understand the main algorithms for analyzing the content and structure of written communication. Packed with examples and exercises, Natural Language Processing with Python will help you: Extract information from unstructured text, either to guess the topic or identify named entities Analyze linguistic structure in text, including parsing and semantic analysis Access popular linguistic databases, including WordNet and treebanks Integrate techniques drawn from fields as diverse as linguistics and artificial intelligence This book will help you gain practical skills in natural language processing using the Python programming language and the Natural Language Toolkit (NLTK) open source library. If you're interested in developing web applications, analyzing multilingual news sources, or documenting endangered languages -- or if you're simply curious to have a programmer's perspective on how human language works -- you'll find Natural Language Processing with Python both fascinating and immensely useful.

Learned Love Els Stronks,Peter Boot,Dagmar Stiebral,Emblem Project Utrecht,2007 Emblem books, which feature combinations of images and text with a moral lesson for the reader, grew out of the Renaissance and were most popular in the Netherlands. Enigmatic, erudite, and often pious, Dutch love emblems synthesized the traditions of European visual and literary arts--and in turn influenced architecture, painting, poetry, and interior design for centuries to come. Learned Love offers an introduction to this enthralling genre and celebrates the completion of Emblem Project Utrecht, an undertaking that digitized twenty-five of the most representative emblem books. This unprecedented volume explores the delicate network of visual motifs and textual mottos that characterize Dutch love emblems. Learned Love demonstrates how emblem books form a web of closely interrelated references, which the contributors liken to the Internet, and traces the cutting-edge digitization project from inception to finish. This book will interest anyone intrigued by the fruitful gray areas between image and text, scholarship and technology.

Decarcerating Correctional Facilities during COVID-19 National Academies of Sciences, Engineering, and Medicine,Division of Behavioral and Social Sciences and Education,Committee on Law and Justice,Committee on the Best Practices for Implementing Decarceration as a Strategy to Mitigate the Spread of COVID-19 in Correctional Facilities,2021-01-18 The conditions and characteristics of correctional facilities - overcrowded with rapid population turnover, often in old and poorly ventilated structures, a spatially concentrated pattern of releases and admissions in low-income communities of color, and a health care system that is siloed from community public health - accelerates transmission of the novel coronavirus (SARS-CoV-2) responsible for COVID-19. Such conditions increase the risk of coming into contact with the virus for incarcerated people, correctional staff, and their families and communities. Relative to the general public, moreover, incarcerated individuals have a higher prevalence of chronic health conditions such as asthma, hypertension, and cardiovascular disease, making them susceptible to complications should they become infected. Indeed, cumulative COVID-19 case rates among incarcerated people and correctional staff have grown steadily higher than case rates in the general population. Decarcerating Correctional Facilities during COVID-19 offers guidance on efforts to decarcerate, or reduce the incarcerated population, as a response to COIVD-19 pandemic. This report examines best practices for implementing decarceration as a response to the pandemic and the conditions that support safe and successful reentry of those decarcerated.

Investigation Of Competition In Digital Markets United States Congress,UNITED STATES CONGRESS. HOUSE OF REPRESENTATIVES. COMMITTEE ON THE JUDICIARY.,House of Representatives,2020-10-06 In June 2019, the Committee on the Judiciary initiated a bipartisan investigation into the state of competition online, spearheaded by the Subcommittee on Antitrust, Commercial and Administrative Law. As part of a top-to-bottom review of the market, the Subcommittee examined the dominance of Amazon, Apple, Facebook, and Google, and their business practices to determine how their poweraffects our economy and our democracy. Additionally, the Subcommittee performed a review of existing antitrust laws, competition policies, and current enforcement levels to assess whether they areadequate to address market power and anticompetitive conduct in digital markets. Over the course of our investigation, we collected extensive evidence from these companies aswell as from third parties-totaling nearly 1.3 million documents. We held seven hearings to review the effects of market power online-including on the free and diverse press, innovation, and privacy-and a final hearing to examine potential solutions to concerns identified during the investigation and to inform this Report's recommendations. A year after initiating the investigation, we received testimony from the Chief ExecutiveOfficers of the investigated companies: Jeff Bezos, Tim Cook, Mark Zuckerberg, and Sundar Pichai. For nearly six hours, we pressed for answers about their business practices, including about evidence concerning the extent to which they have exploited, entrenched, and expanded their power over digitalmarkets in anticompetitive and abusive ways. Their answers were often evasive and non-responsive, raising fresh questions about whether they believe they are beyond the reach of democratic oversight. Although these four corporations differ in important ways, studying their business practices hasrevealed common problems

Myth and Geology Luigi Piccardi,W. Bruce Masse,2007 This

book is the first peer-reviewed collection of papers focusing on the potential of myth storylines to yield data and lessons that are of value to the geological sciences. Building on the nascent discipline of geomythology, scientists and scholars from a variety of disciplines have contributed to this volume. The geological hazards (such as earthquakes, tsunamis, volcanic eruptions and cosmic impacts) that have given rise to myths are considered, as are the sacred and cultural values associated with rocks, fossils, geological formations and landscapes. There are also discussions about the historical and literary perspectives of geomythology. Regional coverage includes Europe and the Mediterranean, Afghanistan, Cameroon, India, Australia, Japan, Pacific islands, South America and North America. Myth and Geology challenges the widespread notion that myths are fictitious or otherwise lacking in value for the physical sciences. -- BOOK JACKET.

Terrorism and the Illuminati David Livingstone,2011 A three thousand year history of the occult, and its relationship with the phenomenon of terrorism, for the purposes of fomenting a Clash of Civilisations and a New World Order. Islam is no threat to the West. On the contrary, Islamic terrorism is a phantom created to serve Western imperialistic goals. Terrorism itself is expressly forbidden in Islam. Such terror groups as exist are artificial, and

intertwined with Western power through a network of occult secret societies, that date back to the Babylonian Kabbalah of the 6th century BC, and a plot to rule the world by magic and deception. Under Herod the Great, a series of dynasties arose, who imposed a corrupt version of Christianity upon the Roman world. During the Crusades, their association with the Ismaili Assassins formed the basis of what is known as Scottish Rite Freemasonry. When Napoleon conquered Egypt, these Freemasons reconnected with their brethren there, sparking developments like the Occult Revival of the late 19th century, the Salafi reform movement of Islam, promoted by Saudi Arabia, and Nazism. They founded the Muslim Brotherhood, a collective of impostors run by the CIA, to further the scheme for world domination. Appearances belie reality. In fact, the Muslim nations are the victims of terror from the West. With their near-complete control of the media, the powers that be have instilled an inverted image of the real world.
