Threatened Amphibians of the World S. N. Stuart, Conservation International, 2008 Amphibians are facing an extinction crisis, but getting to the facts has been difficult. *Threatened Amphibians of the World* is a visual journey through the first-ever comprehensive assessment of the conservation status of the world's 6,000 known species of frogs, toads, salamanders, and caecilians. All 1,900 species known to be threatened with extinction are covered, including a description of threats to each species and an evaluation of conservation measures in place or needed. Each entry includes a photograph or illustration of the species where available, a distribution map, and detailed information on range, population and habitat and ecology. Introductory chapters present a detailed analysis of the results, complemented by a series of short essays written by many of the world's leading herpetologists. Appendices include annotated lists of lower risk species and a country-by-country listing of threatened amphibians.--pub. desc.

Whose History? Grant Rodwell,2013 Somebody once quipped that any work of Australian historical fiction is a 'burning fuse', travelling over decades through Australian culture and society. In some manner, every newly published Australian historical novel is connected to what it has preceded. Each work belongs to a proud history. Through multiple examples, Grant Rodwell encourages readers to see how a work of historical fiction has evolved. Thus, under various themes, WHOSE HISTORY? examines the traditions in Australian historical fiction, and ponders how Australian historical novels can engage teachers and student teachers. WHOSE HISTORY? aims to illustrate how historical novels and their related genres may be used as an engaging teacher/learning strategy for student teachers in pre-service teacher education courses. It does not argue all teaching of History curriculum in pre-service units should be based on the use of historical novels as a stimulus, nor does it argue for a particular percentage of the use of historical novels in such courses. It simply seeks to argue the case for this particular approach, leaving the extent of the use of historical novels used in History curriculum units to the professional expertise of the lecturers responsible for the units.

Operator Handbook Joshua Picolet,2020-03-18 The Operator Handbook takes three disciplines (Red Team, OSINT, Blue Team) and combines them into one complete reference guide. The book contains 123 individual cheat sheet references for many of the most frequently used tools and techniques by practitioners. Over 400 pages of content to assist the most seasoned cybersecurity veteran or someone just getting started in the career field. The goal of combining all disciplines into one book was to remove the artificial barriers that only certain knowledge exists within a Team. The reality is today's complex digital landscape demands some level of knowledge in all areas. The Operator culture should mean a well-rounded team member no matter the Team you represent. All cybersecurity practitioners are Operators. The Blue Team should observe and understand Red Team tactics, Red Team should continually push collaboration with the Blue Team, and OSINT should continually work to peel back evidence of evil doers scattered across disparate data sources. In the spirit of having no separation, each reference is listed in alphabetical order. Not only does this remove those team separated notions, but it also aids in faster lookup. We've all had the same experience where we knew there was an NMAP Cheat Sheet but did it fall under Networking, Windows, or Tools? In the Operator Handbook it begins with N so flip to the N's section. Also almost every topic is covered in How to exploit X and How to defend X perspectives. Tools and topics covered: Cloud (AWS, Azure, GCP), Windows, macOS, Linux, Android, iOS, DevOps (Docker, Kubernetes), OSINT, Ports, Forensics, Malware Resources, Defender tools, Attacker tools, OSINT tools, and various other supporting tools (Vim, iptables, nftables, etc...). This handbook was truly meant to be a single source for the most common tool and techniques an Operator can encounter while on the job. Search Copy Paste L33t.
