The Flat Earth as Key to Decrypt the Book of Enoch Zen Garcia, 2015-09-26 Shortly after accepting the flat earth as a model for the world, I decided to revisit the Book of the Courses of the Heavenly Luminaries to see if my new understanding would somehow mirror what Enoch was sharing as the motion of the sun and moon. As I began to read chapters 71-82, I found to my utter amazement that I was able to grasp those passages. I knew then that the vision that the angel Uriel had shown to Enoch could only be deciphered if one were to imagine Enoch's description of the revolution of the sun and the moon. As seen from above the flat circular plane of the earth as described by Isaiah; and that Enoch must have been taken up to perhaps where Polaris is, centered directly above the North Pole, and while looking down at the backdrop of the earth, was instructed on the motions of both the sun and moon. Without such conception, it is in my opinion impossible to

apply these descriptions to the model of the earth as a spherical planet.

Technologies and Applications for Smart Charging of Electric and Plug-in Hybrid Vehicles Ottorino Veneri, 2016-12-30 This book outlines issues related to massive integration of electric and plug-in hybrid electric vehicles into power grids. Electricity is becoming the preferred energy vector for the next new generation of road vehicles. It is widely acknowledged that road vehicles based on full electric or hybrid drives can mitigate problems related to fossil fuel dependence. This book explains the emerging and understanding of storage systems for electric and plug-in hybrid vehicles. The recharging stations for these types of vehicles might represent a great advantage for the electric grid by facilitating integration of renewable and distributed energy production. This book presents a broad review from analyzing current literature to on-going research projects about the new power technologies related to the various charging architectures for electric and plug-in hybrid vehicles. Specifically focusing on DC fast charging operations, as well as, grid-connected power converters and the full range of energy storage systems. These key components are analyzed for distributed generation and charging system integration into micro-grids. The authors demonstrate that these storage systems represent effective interfaces for the control and management of renewable and sustainable distributed energy resources. New standards and applications are emerging from micro-grid pilot projects around the world and case studies demonstrate the convenience and feasibility of distributed energy management. The material in this unique volume discusses potential avenues for further research toward achieving more reliable, more secure and cleaner energy.

Oracle Tuning Alexey B. Danchenkov, 2006-02-01 Oracle 10g has become the most complex database ever created and Oracle tuning has become increasingly complex. This book provides a complete step-by-step approach for holistic Oracle tuning and it is the accumulated knowledge from tuning thousands of Oracle databases. Incorporating the principles of artificial intelligence, Oracle 10g has developed a sophisticated mechanism for capturing and tracking database

performance over time periods. This new complexity has introduced dozens of new v\$ and DBA views, plus dozens of Automatic Workload Repository (AWR) tables. The AWR and its interaction with the Automatic Database Diagnostic Monitor (ADDM) is a revolution in database tuning. By understanding the internal workings of the AWR tables, the senior DBA can develop time-series tuning models to predict upcoming outages and dynamically change the instance to accommodate the impending resource changes. This is not a book for beginners. Targeted at the senior Oracle DBA, this book dives deep into the internals of the v\$ views, the AWR table structures and the new DBA history views. Packed with ready-to-run scripts, you can quickly monitor and identify the most challenging performance issues.

The Global Carbon Cycle Christopher B. Field,Michael R. Raupach,2012-09-26 While a number of gases are implicated in global warming, carbon dioxide is the most important contributor, and in one sense the entire phenomena can be seen as a human-induced perturbation of the carbon cycle. The *Global Carbon Cycle* offers a scientific assessment of the state of current knowledge of the carbon cycle by the world's leading scientists sponsored by SCOPE and the Global Carbon Project, and other international partners. It gives an introductory over-view of the carbon cycle, with multidisciplinary contributions covering biological, physical, and social science aspects. Included are 29 chapters covering topics including: an assessment of carbon-climate-human interactions; a portfolio of carbon management options; spatial and temporal distribution of sources and sinks of carbon dioxide; socio-economic driving forces of emissions scenarios. Throughout, contributors emphasize that all parts of the carbon cycle are interrelated, and only by developing a framework that considers the full set of feedbacks will we be able to achieve a thorough understanding and develop effective management strategies. The *Global Carbon Cycle* edited by Christopher B. Field and Michael R. Raupach is part of the Rapid Assessment Publication series produced by the Scientific Committee on Problems of the Environment (SCOPE), in an effort to quickly disseminate the collective knowledge of the world's leading experts on topics of pressing environmental concern.

One Acre and Security Bradford Angier,2017-09-15 A passport to freedom that shows how to find fun, food, shelter, and income on land that may be within easy-driving distance of the city and suburbs. Why work a lifetime, asks Angier, to accumulate enough money to retire from the rat race during the last, least active years of life, when a little ground can provide healthful, relaxed living—now—and income too? *One Acre and Security* explains how “three-squares-a-day” and money to spend can come from the earth with instructions on: sheep or pig farming, raising bees for honey, keeping dairy herbs of cows or goats, making money with herb culture, raising and selling rabbits and earthworms, running a poultry farm, raising fish, frogs, and turtles for profit and fun. Angier, the man who has done it all himself, shares too what he has learned about some of the ways to eat from nature's free banquet table, how to stretch country-living with hikes on famous trails or on any untrammelled path, where to find the best hunting and fishing, and how to catch bigger, healthier fish. “This book is written for those who want to move—not to the distant wilderness—but just far enough away from the smog and the screaming traffic to be where meat will be theirs for the raising, fish for the catching, fruit and vegetables for the picking, fuel for the cutting, home for the satisfaction of building...breathing cleaner air, beholden to none, doing what they want to do most and giving it their best,” says Bradford Angier in *One Acre and Security*...
