**High Altitude Leadership** Chris Warner, Don Schmincke, 2008-11-03 Leadership is often a risky, lonely role possessing nearly unbearable lows and fleeting highs. Despite this emotionally and intellectually draining roller coaster, a handful of leaders deliver stunning results, with great consistency. They push past current leadership trends in order to achieve the most extremely challenging goals. They don't fall prey to the platitudes or cliches we see so often in leadership theory. Instead, they succeed by recognizing and surviving the dangers that challenge them as they take themselves and their teams to higher levels. These rare individuals are those that Chris Warner and Don Schmincke call High Altitude Leaders. In High Altitude Leadership they show how to become that kind of leader. The authors present a new approach to leadership development, based on ground-breaking scientific research, field-tested under the most brutal conditions on the most difficult summits, and successfully applied in the training of executives, management teams, and entrepreneurs throughout the world.

**A History of Zinnias** Eric Grissell, 2020-03-30 A History of Zinnias brings forward the fascinating adventure of zinnias and the spirit of civilization. With colorful illustrations, this book is a cultural and horticultural history documenting the development of garden zinnias—one of the top ten garden annuals grown in the United States today. The deep and exciting history of garden zinnias pieces together a tale involving

Aztecs, Spanish conquistadors, people of faith, people of medicine, explorers, scientists, writers, botanists, painters, and gardeners. The trail leads from the halls of Moctezuma to a cliff-diving prime minister; from Handel, Mozart, and Rossini to Gilbert and Sullivan; from a little-known confession by Benjamin Franklin to a controversy raised by Charles Darwin; from Emily Dickinson, who writes of death and zinnias, to a twenty-year-old woman who writes of reanimated corpses; and from a scissor-wielding septuagenarian who painted with bits of paper to the “Black Grandma Moses” who painted zinnias and inspired the opera Zinnias. Zinnias are far more than just a flower: They represent the constant exploration of humankind’s quest for beauty and innovation.

Geotechnical Interpretations in Field Practice  
Anjan Patel, 2024-02-17 In addition to field test results and theoretical knowledge, interpretation and engineering judgement on the available factual data is essential for proper planning and execution of ground investigation. Maximum subsurface information can be extracted with lesser budget if proper interpretation is made. In other words, no amount of site investigation is adequate without proper interpretation and application of engineering judgement. With this in consideration in mind, this book provides special focus to the importance of interpretation and engineering judgement in geotechnical projects. Places an emphasis on the role of site interpretation and the application of engineering judgement Discusses project personnel and how they

have to understand ground conditions to respond accordingly Includes real-life examples that will be of great help for all those involved in the planning and execution of geotechnical projects

Biomarkers and Immunotherapy for Genitourinary Tumors Hui Dai, Jun Pang, Yu Fan, Jianzhong Ai, Youqiang Ke, Lu Yang, 2024-04-02 Genitourinary tumors consist of a large variety of malignancies located in the urinary and the reproductive systems, mainly including prostate cancer, bladder cancer, and renal tumors. Apart from surgeries, various systemic treatments have been used for the whole-course management of genitourinary tumors, including radiation therapy, chemotherapy, and hormonal therapy. However, the characteristics of progression, metastasis, and drug resistance deriving from tumors require and breed novel treatments. Furthermore, exploring biomarkers of genitourinary tumors at the early stage is also beneficial to strengthen the management of patients with tumors. Additionally, the diagnostic and prognostic value of the potential biomarkers for immunotherapy and combined therapy of genitourinary tumors are underexplored. On the basis of precision treatments, the advent of immune-based therapies, including immune checkpoint inhibitors (ICIs, antibodies targeting PD-L1 /PD-1 and CTLA-4 pathways), tumor vaccines, and other therapies, has extended the scope of treatment modalities. FDA has until now approved the clinical application of immune checkpoint inhibitors in a wide range of diseases including some types of genitourinary tumors, whereas not all patients with genitourinary tumors are suitable for immune-based therapies, therefore, the understanding of its underlying mechanism is key to develop effective treatments based on

current ICI-based immunotherapy.

*DERECHOS HUMANOS DE LAS PERSONAS MIGRANTES:*

Armin von Bogdandy, Mariela Morales

Antoniazzi, Juana María Ibáñez Rivas, 2023-02-20 En nuestro continente, la Declaración Americana de los Derechos y Deberes del Hombre, la Convención Americana sobre Derechos Humanos y demás instrumentos del corpus iuris interamericano representan el marco de protección de los derechos humanos de las personas migrantes y sus familiares. A partir de dichos instrumentos, y en ejercicio de sus respectivas competencias, la Comisión Interamericana de Derechos Humanos y la Corte Interamericana de Derechos Humanos han desarrollado estándares fundamentales para la consolidación de dicha protección. A través de los capítulos de esta obra colectiva se pretende contribuir a mejorar el entendimiento de la dimensión de los estándares interamericanos en materia migratoria y explorar su potencial impacto transformador. El proceso de interamericanización de los ordenamientos jurídicos nacionales evidencia una tendencia hacia la protección de los derechos humanos de las personas migrantes en América Latina y, en esa medida, orienta el cumplimiento de las obligaciones estatales de respeto y garantía. Ello se suma al impulso de los demás actores de la comunidad de práctica en la región para cumplir el mandato transformador de la Comisión y de la Corte Interamericanas. En síntesis, la interamericanización, como uno de los procesos que apalancan la construcción del *ius commune* en el ámbito de la movilidad humana,

conllewa una relevante visibilización de los avances logrados y hace posible dar voz a las personas migrantes y a sus familias y, entre ellas, a quienes han sido víctimas de violaciones a sus derechos humanos.

Communicating Science Toss Gascoigne, Bernard Schiele, Joan Leach, Michelle Riedlinger, Luisa Massarani, Bruce V. Lewenstein, Peter Broks, 2020-09-14 Modern science communication has emerged in the twentieth century as a field of study, a body of practice and a profession—and it is a practice with deep historical roots. We have seen the birth of interactive science centres, the first university actions in teaching and conducting research, and a sharp growth in employment of science communicators. This collection charts the emergence of modern science communication across the world. This is the first volume to map investment around the globe in science centres, university courses and research, publications and conferences as well as tell the national stories of science communication. How did it all begin? How has development varied from one country to another? What motivated governments, institutions and people to see science communication as an answer to questions of the social place of science? *Communicating Science* describes the pathways followed by 39 different countries. All continents and many cultures are represented. For some countries, this is the first time that their science communication story has been told.

*War, Revolution and Remembrance in World Cinema*  
Nancy J. Membrez, 2021-04-30 Two World Wars

engulfed Europe, Asia and the United States, leaving indelible scars on the landscape and survivors. The trauma of civil wars in Spain (declared) and Latin America (tacit) spanned decades yet, contradictorily, bind parties together even today. Civil wars still haunt Africa where, in more recent years, ethnic cleansing has led to wholesale genocide. Drawing on the emerging field of Memory Studies, this book examines narrative and documentary films, made far from Hollywood, that address memory--both traumatic and nostalgic--surrounding these conflicts, despite attempts by special interests to erase or manipulate history.
