Improving Medication Use and Outcomes with Clinical Decision Support: Jerome A. Osheroff, MD, FACP, FACMI, Editor-in-Chief,2009

Directory of Web Sites Graham Bennett,1999 Overloaded with the mass of information on the Internet? Frustrated by how difficult it is to find what you really want? Now you don't need to spend hours browsing around the Internet or grappling with the huge number of hits from an Internet search engine: the Directory of Web Sites will take you straight to the best educational sites on the Internet. From archaeology to zoology, from dance to technology, the Directory provides information more than 5,500 carefully selected Web sites that represent the best of what the Internet has to offer. The sites are grouped by subject; each one features a full description; and the text is complemented throughout by screenshots and fact boxes. As well, sites have been selected purely on educational merit: all sites with overtly commercial content and influence from Internet providers have been excluded.

Global Values and International Trade Law Csongor István Nagy,2021-12-26 Exploring the relationship and interaction between economic interests and normative non-trade values, this book argues that the emergence and development of non-trade values is based on a complex dialectic interaction between selfish economic interests and normative values, and examines how their structural interdependence has given rise to a remarkable evolution in international trade. Conceiving this relationship as an intricate dialectic one that is neither purely value-driven, nor purely economic-interest-driven, it addresses the emergence, function, and role of non-trade values in international trade with a synthesizing approach and explores the results of their interaction in international economic intercourse. Approaching the non-trade issues of trade in a holistic manner, the book demonstrates that trade can operate smoothly only if it is framed by an architecture of normative value standards and international trade liberalization has reached the level where further development calls for cooperation also in fields that, at first glance, may appear to be non-trade in nature.

The Brotherhood that Binds the Brave Michael Martin,2015-01-15 Members of today's 111th Infantry, a regiment in the Pennsylvania National Guard, feel a strong sense of pride and comradeship with the members of the Philadelphia Brigade, the first citizen militia unit to exist in Pennsylvania, derived from the Associators found in 1747 in Philadelphia by Benjamin Franklin. The Philadelphia Brigade joined Washington's Army for the Trenton-Princeton Campaign during the American Revolution. By the Civil War, the Associators had become the 72nd Pennsylvania Volunteer Infantry, which served along with three other regiments from Philadelphia in a brigade commanded by General Alexander Webb. Webb's brigade was actively engaged in battle with Confederate units assaulting Cemetery Ridge on July 2 and 3, 1863, during the Battle of Gettysburg. Brought together at this momentous battle these men developed a sense of pride and brotherhood that extended far beyond their own regiment to include comrades and former foes alike. In 1921 the Associators became the present-day 111th Infantry.

Price Theory and Applications Steven E. Landsburg,1999 By the author of *The Armchair Economist*, this text aims to make intermediate microeconomics fun and intellectually challenging. The writing style provides a friendly presentation with many applications, combined with a careful development of microeconomics theory. All of the standard topics of intermediate price theory are included, as well as many topics, such as alternative normative criteria, efficient asset markets, contestable markets, antitrust law, human capital, demand for public goods, and more. A unifying theme of social welfare is used throughout. The inclusion of higher-level mathematics is minimal.

NICOMACHEAN ETHICS Aristotle,2017-04-20 ¶EVERY art and every inquiry, and similarly every action and pursuit, is thought to aim at some good; and for this reason the good has rightly been declared to be that at

which all things aim. But a certain difference is found among ends; some are activities, others are products apart from the activities that produce them. Where there are ends apart from the actions, it is the nature of the products to be better than the activities. Now, as there are many actions, arts, and sciences, their ends also are many; the end of the medical art is health, that of shipbuilding a vessel, that of strategy victory, that of economics wealth. But where such arts fall under a single capacity- as bridle-making and the other arts concerned with the equipment of horses fall under the art of riding, and this and every military action under strategy, in the same way other arts fall under yet others- in all of these the ends of the master arts are to be preferred to all the subordinate ends; for it is for the sake of the former that the latter are pursued. It makes no difference whether the activities themselves are the ends of the actions, or something else apart from the activities, as in the case of the sciences just mentioned.□

Anti-Cancer N-Heterocyclic Carbene Complexes of Gold(III), Gold(I) and Platinum(II) Taotao Zou,2016-02-19 This thesis focuses on the development of gold- and non-classical platinum-based anti-cancer agents that display distinctively different anti-cancer mechanisms compared to the commonly used cisplatin. These metal complexes contain N-heterocyclic carbene (NHC) ligands which are able to form strong M-C(NHC) bonds, conferring high stability and favorable lipophilicity, reactivity and binding specificity of metal complexes on biomolecules. The author demonstrates significant advances made in anti-cancer gold(III), gold(I) and platinum(II) complexes. Detailed chemical synthesis, in vitro and/or in vivo anti-cancer activities are clearly presented including: (i) a class of Au(III) complexes containing a highly fluorescent N^N^N ligand and NHC ligand that simultaneously act as fluorescent thiol “switch-on” probes and anti-cancer agents; (ii) a dinuclear gold(I) complex with a mixed diphosphine and bis(NHC) ligand displaying favorable stability and showing significant inhibition of tumor growth in two independent mice models with no observable side effects; and (iii) a panel of stable luminescent cyclometalated platinum(II) complexes exhibiting high specificity to localize to the endoplasmic reticulum (ER) domain, inducing ER stress and cell apoptosis. These works highlight the clinical potential that gold and platinum complexes offer for cancer treatment.

Histoire du Moyen-Orient – 2e éd. Anne-Laure Dupont,Catherine Mayeur-Jaouen,Chantal Verdeil,2023-03-08 Le Moyen-Orient, régulièrement à la une de l'actualité, est trop souvent enfermée dans des clichés réducteurs. Face aux idées reçues, voire aux débats suscités par les étudiants eux-mêmes, ce manuel étudie le Moyen-Orient dans toutes ses thématiques : culture (et culture religieuse), société, transformations économiques et sociales, débats intellectuels, islam politique, place de la femme, autoritarisme des Etats, migrations, médias et mondialisation... Prendre du recul par rapport au temps présent et inscrire le Moyen-Orient dans les deux siècles de l'histoire contemporaine s'avère essentiel pour comprendre les débats qui l'agitent et les transformations sociales qu'il connaît.
