NICOMACHEAN ETHICS Aristotle,2017-04-20 ¶EVERY art and every inquiry, and similarly every action and pursuit, is thought to aim at some good; and for this reason the good has rightly been declared to be that at which all things aim. But a certain difference is found among ends; some are activities, others are products apart from the activities that produce them. Where there are ends apart from the actions, it is the nature of the products to be better than the activities. Now, as there are many actions, arts, and sciences, their ends also are many; the end of the medical art is health, that of shipbuilding a vessel, that of strategy victory, that of economics wealth. But where such arts fall under a single capacity- as bridle-making and the other arts concerned with the equipment of horses fall under the art of riding, and this and every military action under strategy, in the same way other arts fall under yet others- in all of these the ends of the master arts are to be preferred to all the subordinate ends; for it is for the sake of the former that the latter are pursued. It makes no difference whether the activities themselves are the ends of the actions, or something else apart from the activities, as in the case of the sciences just mentioned.¶

Price Theory and Applications Steven E. Landsburg,1999 By the author of The Armchair Economist, this text aims to make intermediate microeconomics fun and intellectually challenging. The writing style provides a friendly presentation with many applications, combined with a careful development of microeconomics theory. All of the standard topics of intermediate price theory are included, as well as many topics, such as alternative normative criteria, efficient asset markets, contestable markets, antitrust law, human capital, demand for public goods, and more. A unifying theme of social welfare is used throughout. The inclusion of higher-level mathematics is minimal.

Why Are Jews Liberals? Norman Podhoretz,2009-09-08 From the bestselling author of World War IV, a brilliant investigation of a central question in American politics and culture. During his career as a neoconservative thinker, Norman Podhoretz has been asked no question more often than “Why are so many Jews liberals?” In this provocative book he sets out to solve this puzzle. He first offers a fascinating account of anti-Semitism in the West to show the historical roots of Jewish mistrust of the right. But, Podhoretz argues, since the Six Day War of 1967 Jewish allegiance to the left no longer makes sense, and yet most Jews continue supporting the Democratic Party and the liberal agenda. Reviewing the history of Jewish political attitudes and examining the available evidence, Podhoretz argues against the conventional explanations for Jewish liberalism—finally proposing his own.

Managerial Economics James R. McGuigan,R. Charles Moyer,Frederick H. deB. Harris,1999 The emphasis on real world, manager-oriented applications shows students how managers apply theories and techniques to analyze and solve real world business problems. Over 200 applications, corporate examples, and Managerial Challenges - more than any other book - support this real world approach.

The Brotherhood that Binds the Brave Michael Martin,2015-01-15 Members of today's 111th Infantry, a regiment in the Pennsylvania National Guard, feel a strong sense of pride and comradeship with the members of the Philadelphia Brigade, the first citizen militia unit to exist in Pennsylvania, derived from the Associators found in 1747 in Philadelphia by Benjamin Franklin. The Philadelphia Brigade joined Washington's Army for the Trenton-Princeton Campaign during the American Revolution. By the Civil War, the Associators had become the 72nd Pennsylvania Volunteer Infantry, which served along with three other regiments from Philadelphia in a

brigade commanded by General Alexander Webb. Webb's brigade was actively engaged in battle with Confederate units assaulting Cemetery Ridge on July 2 and 3, 1863, during the Battle of Gettysburg. Brought together at this momentous battle these men developed a sense of pride and brotherhood that extended far beyond their own regiment to include comrades and former foes alike. In 1921 the Associators became the present-day 111th Infantry.

Anti-Cancer N-Heterocyclic Carbene Complexes of Gold(III), Gold(I) and Platinum(II) Taotao Zou,2016-02-19 This thesis focuses on the development of gold- and non-classical platinum-based anti-cancer agents that display distinctively different anti-cancer mechanisms compared to the commonly used cisplatin. These metal complexes contain N-heterocyclic carbene (NHC) ligands which are able to form strong M-C(NHC) bonds, conferring high stability and favorable lipophilicity, reactivity and binding specificity of metal complexes on biomolecules. The author demonstrates significant advances made in anti-cancer gold(III), gold(I) and platinum(II) complexes. Detailed chemical synthesis, in vitro and/or in vivo anti-cancer activities are clearly presented including: (i) a class of Au(III) complexes containing a highly fluorescent N^N^N ligand and NHC ligand that simultaneously act as fluorescent thiol “switch-on” probes and anti-cancer agents; (ii) a dinuclear gold(I) complex with a mixed diphosphine and bis(NHC) ligand displaying favorable stability and showing significant inhibition of tumor growth in two independent mice models with no observable side effects; and (iii) a panel of stable luminescent cyclometalated platinum(II) complexes exhibiting high specificity to localize to the endoplasmic reticulum (ER) domain, inducing ER stress and cell apoptosis. These works highlight the clinical potential that gold and platinum complexes offer for cancer treatment.
