German Pocket Battleships Roger Chesnaeu,2013-07-04 □ Everything the ship modeller needs to know about building a famous warship □ Numerous detailed plans and colour illustrations □ Focuses on very popular modelling subjects which are represented by a wide selection of kits □ The 'ShipCraft' series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeller through a brief history of the subject class, using scale plans to highlight differences between sisterships and changes in their appearance over their careers, then moves to an extensive photographic survey of either a high-quality model or a surviving example of the ship. Hints on building the model, and on modifying and improving the basic kit, are followed by a section on paint schemes and camouflage, featuring numerous colour profiles and highly-detailed line drawings. The strengths and weaknesses of available kits of the ships are reviewed, and the book concludes with a section on research references - books, monographs, large-scale plans and relevant websites. For the first volume in this series, the author has chosen the German 'pocket battleships' of WW2, the best-known of which was the Graf Spee of Battle of the River Plate fame. This innovative and infamous class of surface raiders has long been a popular subject for ship modellers, many manufacturers producing kits of the Graf Spee and the rather different Admiral Scheer and Lützow. This book will show ship modellers how to turn their kits into something really special, but its unparalleled level of visual information will also appeal to the more general warship enthusiast. Roger Chesneau is a lifelong ship modeller and author of numerous naval books, including Ship Models in Plastic.

First the Jews Rabbi Evan Moffic,2019-01-15 For a basic introduction to anti-Semitism past and present, the first place to turn is now Rabbi Evan Moffic's First the Jews. --Dr. Jonathan D. Sarna, Celebrated Author and Chief Historian of National Museum of American Jewish History “Rabbi Moffic has written a book every Christian should read. An essential guide to making sense of the painful history and present reality of anti-Semitism. This is a truly important book.” —Adam Hamilton, Senior Pastor, The United Methodist Church of the Resurrection “How far the institutional church has strayed from following the rebel-rabbi Jesus! Evan shines light on the need for Christian and Jewish brothers and sisters to come together against this rising tide of hate.” —Michael Slaughter, author, speaker, pastor emeritus of Ginghamburg Church Are we in danger of experiencing another Holocaust? News reports of and statistics about defaced synagogues and death threats against community centers are on the rise around the world. A rise in anti-Semitism from the right side of the political spectrum has been accompanied by a different kind of anti-Semitism from parts of the left revolving around the state of Israel. Rabbi Evan Moffic provides a compelling discussion to help Christians understand this dangerous rise by working to address tough questions including: Why have Jews been the object of the most enduring and universal hatred in history? What is different between anti-Semitism in the past versus today’s culture? How, and in what forms, may it be carried out in the future? Focusing on the events since September 11, 2001, Rabbi Evan Moffic considers the twenty-first century anti-Semitism and the historical pattern of discrimination to other groups that often follows new waves of discrimination against Jewish communities. With a hopeful and collaborative tone, he suggests actions for all people of faith to combat words and actions of hate while lifting up practical ways Christians and Jews can work together. First the Jews offers new insights and unparalleled perspectives on some of the most recent, pressing developments in the contemporary world. Includes chapter responses from Amy-Jill Levine, Mike Slaughter, Justine Coleman, and Imam Hassan Selim. Visit www.AbingdonPress.com/Moffic to download the Study Guide for First the Jews. Product Features: Encouragement and calls to action from leading Christian voices close out each chapter. Helps Christians to recognize and react to anti-Semitism. Offers a look back at the recent surge of anti-Semitic incidents. Outlines the role Christians can play in encouraging positive change in interfaith relations. Provides examples of positive change to encourage future efforts. Shares insights from a Jewish perspective written for Christians.

Towards a Sustainable Built Environment in Malaysia Mahyuddin Ramli, Hugh Byrd., Cities have a metabolism that requires energy, food, materials and water to be supplied and waste products to be removed. If cities are to remain the engines of economic growth they also require an input of knowledge as well as commodities. This fuels innovation and the skills that lead to economic success. With economic success comes the input of people and investment that require new buildings and the conservation of existing buildings. This, in turn, requires an input of both building materials and the knowledge of manufacturing and assembling them efficiently and effectively. This book reviews these aspects of development from an academic point of view and covers a wide area of professional expertise including planning, tourism, architecture, structural engineering, project management, air and water quality, conservation, landscape design, waste management and many other issues that impact on urbanism in Malaysia.

The Great Bird Flu Hoax Joseph Mercola,2009-03-15 The U.S. government is now practically screaming that a new avian super-flu will likely kill millions of Americans. The mainstream media is entirely onboard, as are drug companies and other corporations poised to benefit immensely off the paranoia. But there is NO coming bird flu pandemic. It's an elaborate scheme contrived by the government and big business for reasons that boil down to power and money. Presenting eye-opening evidence that casts serious doubt on the truthfulness of reports about the virus's ability to transmit, and its mortality rates around the world, renowned physician Dr. Joseph Mercola reveals the secrets about the great bird flu hoax. In compelling fashion he provides you the real facts you need to know to protect you from a far greater ill - corporate and governmental greed.

New Norms and Knowledge in World Politics Preslava Stoeva,2009-10-16 This book examines the process of norm development and knowledge creation in international politics, and assesses these processes in case studies on protection from torture, intellectual property rights and climate change. Drawing on the theories of constructivism and the sociology of scientific knowledge, author Preslava Stoeva demonstrates that international norms are a product of a sequence of closures and consensus reached at different social levels. She contends that it is this process which makes norms permeate the social and political fabric of international relations even before they become official principles of state behaviour. Proposing a theoretical model which indicates the stages of the development of norms, she studies the roles that various actors play in that process, together with the interplay of various types of power. Through this endeavour, this book succeeds in providing the reader with a better understanding of the social processes that lead to normative change in international relations. New Norms and Knowledge in World Politics will be of interest to students, scholars and practitioners of international relations, comparative politics, globalization, sociology and anthropology.

How Constitutions Change Dawn Oliver,Carlo Fusaro,2011-08-09 This set of essays explores how constitutions change and are changed in a number of countries, and how the 'constitution' of the EU changes and is changed. For a range of reasons, including internal and external pressures, the constitutional arrangements in many countries are changing. Constitutional change may be formal, involving amendments to the texts of Constitutions or the passage of legislation of a clearly constitutional kind, or informal and organic, as where court decisions affect the operation of the system of government, or where new administrative and other

arrangements (eg agencification) affect or articulate or alter the operation of the constitution of the country, without the need to resort to formal change. The countries in this study include, from the EU, a common law country, a Nordic one, a former communist state, several civil law systems, parliamentary systems and a hybrid one (France). Chapters on non EU countries include two on developing countries (India and South Africa), two on common law countries without entrenched written constitutions (Israel and New Zealand), a presidential system (the USA) and three federal ones (Switzerland, the USA and Canada). In the last two chapters the editors conduct a detailed comparative analysis of the jurisdiction-based chapters and explore the question whether any overarching theory or theories about constitutional change in liberal democracies emerge from the study.
