A Brief Introduction to Corrections Robert D. Hanser,2019-11-30 A Brief Introduction to Corrections is a condensed version of the best-selling Introduction to Corrections by Robert D. Hanser. This new text provides students with an overview of corrections that is both practitioner-driven and grounded in modern research. Experienced correctional practitioner and scholar Robert D. Hanser shows readers how the corrections system actually works, from classification to security and treatment to demonstrating how and why correctional practices are implemented.

Introduction to Corrections Robert D. Hanser,2023-02-21 Introduction to Corrections provides students with a comprehensive foundation of corrections that is practitioner-driven and grounded in modern research and theoretical origins. Experienced correctional practitioner, scholar, and author Robert D. Hanser shows students how the corrections system works, from classification, security, and treatment, to demonstrating how and why correctional practices are implemented. The Fourth Edition includes a special emphasis on the role of technology in each chapter; new topics on medical care in jail, female drug offenders, and controversies around the death penalty; and the impact of the COVID-19 pandemic on correctional practices. Data and examples drawn from federal government documents, along with exercises that reinforce concepts in the text, further aid student learning. Biometrics in a Data Driven World Sinjini Mitra,Mikhail Gofman,2016-12-01 Biometrics in a Data Driven World: Trends, Technologies, and Challenges aims to inform readers about the modern applications of biometrics in the context of a data-driven society, to familiarize them with the rich history of biometrics, and to provide them with a glimpse into the future of biometrics. The first section of the book discusses the fundamentals of biometrics and provides an overview of common biometric modalities, namely face, fingerprints, iris, and voice. It also discusses the history of the field, and provides an overview of emerging trends and opportunities. The second section of the book introduces readers to a wide range of biometric applications. The next part of the book is dedicated to the discussion of case studies of biometric modalities currently used on mobile applications. As smartphones and tablet computers are rapidly becoming the dominant consumer computer platforms, biometrics-based authentication is emerging as an integral part of protecting mobile devices against unauthorized access, while enabling new and highly popular applications, such as secure online payment authorization. The book concludes with a discussion of future trends and opportunities in the field of biometrics, which will pave the way for advancing research in the area of biometrics, and for the deployment of biometric technologies in real-world applications. The book is designed for individuals interested in exploring the contemporary applications of biometrics, from students to researchers and practitioners working in this field. Both undergraduate and graduate students enrolled in college-level security courses will also find this book to be an especially useful companion.

Academic E-Books Suzanne M. Ward,Robert S. Freeman,Judith M. Nixon,2015-11-15 Academic E-Books: Publishers, Librarians, and Users provides readers with a view of the changing and emerging roles of electronic books in higher education. The three main sections contain contributions by experts in the publisher/vendor arena, as well as by librarians who report on both the challenges of offering and managing e-books and on the issues surrounding patron use of e-books. The case study section offers perspectives from seven different sizes and types of libraries whose librarians describe innovative and thought-provoking projects involving e-books. Read about perspectives on e-books from organizations as diverse as a commercial publisher and an association press. Learn about the viewpoint of a jobber. Find out about the e-book challenges facing librarians, such as the quest to control costs in the patron-driven acquisitions (PDA) model, how to solve the dilemma of resource sharing with e-books, and how to manage PDA in the consortial environment. See what patron use of e-books reveals about reading habits and disciplinary differences. Finally, in the case study section, discover how to promote scholarly e-books, how to manage an e-reader checkout program, and how one library replaced most of its print collection with e-books. These and other examples illustrate how innovative librarians use e-books to enhance users' experiences with scholarly works.

Modern Death Haider Warraich,2017-02-07 There is no more universal truth in life than death. No matter who you are, it is certain that one day you will die, but the mechanics and understanding of that experience will differ greatly in today's modern age. Dr. Haider Warraich is a young and brilliant new voice in the conversation about death and dying started by Dr. Sherwin Nuland and Atul Gawande. Dr. Warraich takes a broader look at how we die today, from the cellular level up to the very definition of death itself. The most basic aspects of dying—the whys, wheres, whens, and hows—are almost nothing like what they were mere decades ago. Beyond its ecology, epidemiology, and economics, the very ethos of death has changed. Modern Death, Dr. Warraich's debut book, will explore the rituals and language of dying that have developed in the last century, and how modern technology has not only changed the hows, whens, and wheres of death, but the what of death. Delving into the vast body of research on the evolving nature of death, Modern Death will provide readers with an enriched understanding of how death differs from the past, what our ancestors got right, and how trends and events have transformed this most final of human experiences.

Beijing's Power and China's Borders Bruce Elleman,Stephen Kotkin,Clive Schofield,2015-05-18 China shares borders with 20 other countries. Each of these neighbors has its own national interests, and in some cases, these include territorial and maritime jurisdictional claims in places that China also claims. Most of these 20 countries have had a history of border conflicts with China; some of them never amicably settled. This book brings together some of the foremost historians, geographers, political scientists, and legal scholars on modern Asia to examine each of China's twenty land or sea borders.

Mariner's Handbook for Australian Waters (AHP20) Various Australian Government and Maritime Agencies,2019-09-20 The Mariner's Handbook for Australian Waters (AHP20) is an official nautical publication providing mariners with important regulatory, procedural and environmental information affecting the planning and conduct of a voyage to or from Australian ports, or within Australian waters. Think Bayes Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Oslo Principles on Global Climate Change Expert Group On Global Climate Obligations,2015 Climate change is a grave and urgent threat to human and other life, Earth's ecosystem, global security, and economic well-being. The global community increasingly understands that business as usual is no longer an option. Debate about states' legal obligations to reduce their greenhouse gas emissions is still in its infancy. This seriously hinders progress through the political process or the courts. A group of legal experts has sought to fill this gap by drafting the Oslo Principles on Global Climate Change Obligations. The Principles identify states' reduction

obligations and articulate a series of related obligations aimed at prevention. This book is an extensive commentary that further explains the Principles and their legal underpinning. The members of the expert group are: Antonio Benjamin, Michael Gerrard, Toon Huydecoper, Michael Kirby, M.C. Mehta, Thomas Pogge, Qin Tianbao, Dinah Shelton, James Silk, Jessica Simor, Jaap Spier (rapporteur), Elisabeth Steiner, and Philip Sutherland. Environmental Law Toolkit--NSW ,2005 The Environmental Law Toolkit is a community guide to environmental law in New South Wales. It is intended to provide a practical resource for members of the community with an interest in using the law to protect the environment. In particular, this guide covers the following elements of environmental law: environmental planning and assessment; natural resource management; pollution management; biodiversity conservation; and natural and cultural heritage. The guide also includes a chapter on environmental advocacy, covering topics such as: submissions, letters and petitions; using the media; access to information; defamation law and safe speech; incorporating an environmental group; corporations and environmental advocacy; environmental protest and criminal law; and seeking legal advice and representation.
