The Politics of Foster Care Administration in the United States Rebecca H. Padot, 2014-10-10 Government-by-proxy and intergovernmental relations profoundly affect the public administration of foster care. Using examples from foster care systems in the states of Delaware, Michigan, New York, and Rhode Island, Rebecca Padot eloquently combines a rigorous methodology and theory work to expose the conditions under which foster care outcomes can be improved. The cases selected suggest that the federal government has increased its focus on measuring the performance of state programs while simultaneously decreasing its funding of state foster care programs and offering the states very little management or mentorship. Padot turns the page and recommends administrators place a greater priority on building community partners, integrating the advice of mentors, providing leadership from public managers, and cultivating relationships with the federal government. An original and timely resource for scholars and practitioners, this book represents a significant contribution to our understanding of how leadership and management variables may be associated with more positive foster care practices and performance in the United States.

Diversity and Motivation Margery B. Ginsberg, Raymond J. Wlodkowski, 2015-02-27 When the first edition of Diversity and Motivation was published in 1995, it became a premier resource for faculty and administrators seeking effective and practical strategies that foster motivation among culturally diverse student groups. This revised and updated second edition of Diversity and Motivation offers a comprehensive understanding of teaching methods that promote respect, relevance, engagement, and academic success. Margery B. Ginsberg and Raymond J. Wlodkowski base their insights and concrete suggestions on their experiences and research as college faculty. The book defines norms, illustrates practices, and provides tools to develop four foundational conditions for intrinsically motivated learning: establishing inclusion, developing a positive attitude, enhancing meaning, and engendering competence. The authors provide perspectives on the social justice implications of each condition. Diversity and Motivation includes resources to help educators create a supportive community of learners, facilitate equitable discussions in linguistically diverse classrooms, design engaging lessons, and assess students fairly. The ideas in this book apply across disciplines and include teaching practices that can be easily adapted to a range of postsecondary settings. In addition, the authors include a cohesive approach to syllabus construction, lesson design, and faculty development. This new edition also contains a framework for motivating students outside traditional classroom settings.

Teaching Intensive and Accelerated Courses Raymond J. Wlodkowski, Margery B. Ginsberg, 2010-08-09 In this comprehensive resource, Raymond J. Wlodkowski and Margery B. Ginsberg describe how to meet the challenge of teaching intensive and accelerated courses to nontraditional learners and working adults. By making motivation and cultural relevance essential to instruction, they clearly show what instructors can do to enhance learning in classes that can last from three to six hours. Teaching Intensive and Accelerated Courses makes full use of the authors' twenty years of experience researching and teaching accelerated courses, along with selected strategies from Wlodkowski's classic Enhancing Adult Motivation to

Learn, to offer tried-and-true practices instructors can use to provide continuously engaging learning.

Nurturing Strangers Andrew Fitz-Gibbon,Jane Hall Fitz-Gibbon,2018-12-07 Nurturing Strangers focuses on loving nonviolent re-parenting of children in foster care. This book is a jargon-free mix of narrative and real-life case studies, together with the theory and practice of nonviolence. Nurturing Strangers and the authors' previous book, Welcoming Strangers, are the first books to apply philosophies of nonviolence directly to the care of children in the foster care system. One of their strengths is that the books are not merely theoretical, but rooted in the practice of nonviolence with children for over thirty years. Nurturing Strangers is for foster carers, caseworkers, case managers, social work students, and parents, as well as the general reader interested in children who have been victims of violence in and out of the foster care system.

Think Bayes Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

In Our Hands Charles Murray, 2016-06-02 Imagine that the United States were to scrap all its income transfer programs—including Social Security, Medicare, and all forms of welfare—and give every American age twenty-one and older \$10,000 a year for life. This is the Plan, a radical new approach to social policy that defies any partisan label. First laid out by Charles Murray a decade ago, the updated edition reflects economic developments since that time. Murray, whose previous books include *Losing Ground* and *The Bell Curve*, demonstrates that the Plan is financially feasible and uses detailed analysis to argue that many goals of the welfare state—elimination of poverty, comfortable retirement for everyone, universal access to healthcare—would be better served under the Plan than under the current system. Murray's goal, shared by Left and Right, is a society in which everyone, including the unluckiest among us, has the opportunity and means to construct a satisfying life. *In Our Hands* offers a rich and startling new way to think about how that goal might be achieved.

Liberation Biology Ronald Bailey, 2013-08 The 21st century will undoubtedly witness unprecedented advances in understanding the mechanisms of the human body and in developing biotechnology. With the mapping of the human genome, the pace of discovery is now on the fast track. By the middle of the century we can expect that the rapid progress in biology and biotechnology will utterly transform human life. What was once the stuff of science fiction may now be within reach in the not-too-distant future: 20-to-40-year leaps in average life spans, enhanced human bodies, drugs and therapies to boost memory and speed up mental processing, and a genetic science that allows parents to ensure that their children will have stronger immune systems, more athletic bodies, and cleverer brains. Even the prospect of human immortality beckons. Such scenarios excite many people and frighten or appall many others. Already biotechnology opponents are organizing political movements aimed at restricting scientific research, banning the development and commercialization of various products and technologies, and limiting citizens' access to the fruits of the biotech revolution. In this forward-looking book Ronald Bailey, science writer for *Reason* magazine, argues that the coming biotechnology revolution, far from endangering human dignity, will liberate human beings to achieve their full potentials by enabling more of us to live flourishing lives free of disease, disability, and the threat of early death. Bailey covers the full range of the coming biotechnology breakthroughs, from stem-cell research to third-world farming, from brain-enhancing neuropharmaceuticals to designer babies. Against critics of these trends, who forecast the nightmare society of Huxley's *Brave New World*, Bailey persuasively shows in lucid and well-argued prose that the health, safety, and ethical concerns raised by worried citizens and policymakers are misplaced. *Liberation Biology* makes a positive, optimistic, and convincing case that the biotechnology revolution will improve our lives and the future of our children, while preserving and enhancing the natural environment.
