Jim and Jap Crow Matthew M. Briones, 2013-12-26 Following Japan's attack on Pearl Harbor in 1941, the U.S. government rounded up more than one hundred thousand Japanese Americans and sent them to internment camps. One of those internees was Charles Kikuchi. In thousands of diary pages, he documented his experiences in the camps, his resettlement in Chicago and drafting into the Army on the eve of Hiroshima and Nagasaki, and his postwar life as a social worker in New York City. Kikuchi's diaries bear witness to a watershed era in American race relations, and expose both the promise and the hypocrisy of American democracy. Jim and Jap Crow follows Kikuchi's personal odyssey among fellow Japanese American intellectuals, immigrant activists, Chicago School social scientists, everyday people on Chicago's South Side, and psychologically scarred veterans in the hospitals of New York. The book chronicles a remarkable moment in America's history in which interracial alliances challenged the limits of the elusive democratic ideal, and in which the nation was forced to choose between civil liberty and the fearful politics of racial hysteria. It was an era of world war and the atomic bomb, desegregation in the military but Jim and Jap Crow elsewhere in America, and a hopeful progressivism that gave way to Cold War paranoia. Jim and Jap Crow looks at Kikuchi's life and diaries as a lens through which to observe the possibilities, failures, and key conversations in a dynamic multiracial America.

**Covid Compensation** Lawrence Wolfe-Xavier, 2023-05-25 The world was quietly going about its normal business when late in 2019 the entire global world of 195 countries, even China, was turned completely on its head by a fake virus and a fake pandemic. However, the world was not to know at the time, and for the most part still does not know; until the publication of this book, that the entire chapter and verse of the virus paradigm called SarsCov2, and its ensuing ailment Covid19 and its pandemic were all total lies and fake. Lies and fake propagated by hidden persons and their nominated puppets in mostly unelected, globalist organisations beyond the reach of sovereign states: WHO, WEF, UN, World Bank etc who in reality control the world. Consequently, in early 2020 and the following months through to 2021 there was a world-wide 'nightmare' that no one seemed to fully understand or indeed understand at all. This nightmare was known variously as Coronavirus Sars-Cov2 and Covid19. Coronaviruses can cause mild disease similar to a common cold. Sars-Cov2 - severe acute respiratory syndrome coronavirus 2 was claimed to be a novel (new) coronavirus and the illness Covid19, was supposedly caused by Sars-Cov2. **Mass Induced Dystopian Nightmare** The dystopian nightmare had only just begun and was to last almost two full years - 2020-2022. Horrible images appeared from China (not the most democratic country in the world) then from Italy and other countries until world-wide. Preposterous projections of not to happen global deaths based on very flawed computer models were bandied about to an unknowing mass of a very frightened and unfortunately deliberately ill-informed global population. Global mass media fanned the flames morning, day, and night for many months on end. Inappropriate quarantine measures were globally, in lockstep, imposed that restricted human movement to an inhuman level that people were not permitted to see their loved ones when their loved ones were dying in hospitals and care homes! The world was a surreal, dystopian horror story - police vans patrolling the street at night, complete lockdown and no one allowed outside except for one hours walk per day, no gatherings greater than six, empty streets, closed and boarded shops, empty parks, and empty beaches. Draconian civil rights restrictions were imposed. The Global economic and social life the world over were about to fall into total collapse. On what data were these extreme measures taken? Was the world really under such a massive threat that we had to close down global capitalism for 2 years? Had the benefits of these very severe measures been adequately assessed against the damage that they would also no doubt cause to the global economy and to individual

person's lives throughout the world? No, they had not. They were simply imposed globally without recourse to any open debate or serious risk analysis. Medico-Totalitarianism strode the world like a Great Dictator with all debate and opposition silenced by the baying mob of puppet Mainstream Media. Until the publication of this book - COVID COMPENSATION - SHOCKING TRUTH REVEALED by the finest independent scientific, medical, and legal minds in the world.

*From Chance to Choice* Allen Buchanan,Dan W. Brock,Norman Daniels,Daniel Wikler,2001-11-12 This book, written by four internationally renowned bioethicists and first published in 2000, was the first systematic treatment of the fundamental ethical issues underlying the application of genetic technologies to human beings. Probing the implications of the remarkable advances in genetics, the authors ask how should these affect our understanding of distributive justice, equality of opportunity, the rights and obligations as parents, the meaning of disability, and the role of the concept of human nature in ethical theory and practice. The book offers a historical context to contemporary debate over the use of these technologies by examining the eugenics movement of the late nineteenth and early twentieth centuries. The questions raised in this book will be of interest to any reflective reader concerned about science and society and the rapid development of biotechnology, as well as to professionals in such areas as philosophy, bioethics, medical ethics, health management, law, and political science.

Immunology of the GI Tract Luis Rodrigo, 2022-12-21 The intestine is the largest digestive organ in the human body and one of the largest organs in contact with the outside world. In addition to digesting food to facilitate the absorption of nutrients, it has a variety of other functions, including the transmission of information and regulation of the metabolism. Due to its unique structure, the intestine is constantly exposed to various antigens and microbes. To protect the body from pathogens, while also maintaining a stable environment, the human intestinal tract has evolved unique regional immune characteristics maintained by the mature intestinal mucosal immune system. This intricate system involves intestinal epithelial cells, and intestinal lymphoid tissue composed of Peyer's patches, isolated lymphoid follicles, mesenteric lymph nodes, and so on. The congenital and adaptive immune mechanisms created by the unique structure, function, and microenvironment of the intestine differ from those of the central and peripheral immune organs forming the regional immunity of the intestine. Intestinal flora also plays an important role in maintaining intestinal homeostasis, altering the structure and function of the immune system, reshaping the immune microenvironment, and promoting interference with the development of specific diseases. In fact, the immune function of the intestinal region directly affects the development of many intestine-specific diseases. However, the integrity of this function depends on the expression of congenital genes and the regulation of the neuroendocrine system. The microenvironment created by intestinal flora and its products also affects the immunity of the intestinal region. In early life, appropriate intestinal colonization by specific microflora stimulates the maturation of the intestinal mucosa-associated lymphoid tissue. If the appropriate intestinal flora fails to form during this life stage, the function of the intestinal immune system becomes impaired, leading to increased incidence and/or morbidity of certain intestinal diseases, including ulcerative colitis, Crohn's disease, and others.
