Islamic Extremism Monte Palmer, Princess Palmer, 2008 This accessible and deeply informed book examines the threat that Islamic extremists pose to America and provides a balanced discussion of the link between Iraq and the war on terror. Explaining the basics of Islam and guiding the reader through the intricacies of each significant fundamentalist group, the Palmers answer key questions: Who are the Muslim extremists and how do they fit within the broader context of the Islamic religion? What is their war plan and how do they operate? Who are their allies and what are their weaknesses? What is the experience of Israel, the Islamic world, and the United States in fighting extremists? How can they be defeated? Now in a thoroughly revised and updated edition, the book includes new chapters on Hamas, the Iraqi clones of Hizbullah--including Sadr--and the Islamic government in Turkey.

Investitionsstandort Ungarn Manuela Weiß, 2003-03-26 Inhaltsangabe: Zusammenfassung: The Best Place to Do Business in Europe Unter diesem Motto wurde ein Wettbewerb, gestiftet von der Firma Arthur Andersen, gestartet, bei dem Ungarn mit seiner Hauptstadt Budapest den dritten Platz nach London und Amsterdam und vor München gewann. Grund genug dieses Land etwas näher zu betrachten. Allgemein lässt sich erkennen, dass die zunehmende Verflechtung der Märkte zu einer wachsenden Internationalisierung der Unternehmen führt, von der nicht nur die multinational ausgerichteten Großunternehmen sondern auch kleine und mittlere Unternehmen betroffen sind. Mit dem Fall des Eisernen Vorhangs sind Produktionsverlagerungen in die osteuropäischen Länder auch zu einem zentralen Aspekt der wirtschaftspolitischen Debatte um die Wettbewerbsfähigkeit des Industriestandorts Deutschland im internationalen Vergleich geworden. Auf Grund dessen wird ein wichtiges Zentrum innerhalb der mitteleuropäischen Wirtschaft Ungarn im Nachfolgenden vorgestellt. Die Anziehungskraft der Magyaren beruht einerseits auf deren günstigen geographischen Lage und andererseits auf die Investitionstätigkeit fördernde Politik des ungarischen Staates. Auf die Gegenüberstellung verschiedener Motive (z.B. verlängerte Werkbank oder Absatzmarktexpansion) der Auslandsaktivitäten wird allerdings verzichtet, vielmehr soll nur ein möglicher Grund - die Investition aus steuerlicher Sicht - betrachtet werden. Wichtig erscheint mir jedoch nicht nur auf verschiedene Investitionsanreize aufmerksam zu machen, sondern auch einen allgemeinen kurzen Überblick der wirtschaftlichen Entwicklung und Lage, der Außenhandelsstruktur sowie des Gesellschafts- und Steuerrechts darzustellen um so der Gefahr einer Fehlinvestition wegen unzureichender Informationsbasis entgegenzuwirken. Beginnen wird die Arbeit mit der Vermittlung des notwendigen Hintergrundwissens, welches für das weitere Verstehen insbesondere für das Verständnis der politischen und wirtschaftlichen Staatsaktivitäten Ungarns wichtig ist. Anschließend wird der Investitionsstandort Ungarns innerhalb Osteuropas mit diversen Investitionsanreizen und den wirtschaftlichen/rechtlichen Rahmenbedingungen vorgestellt. Bevor zum Schluss zwei Formen der Direktinvestitionen (Betriebsstätte/Tochtergesellschaft) untersucht werden, wird das ungarische Steuersystem behandelt, um so die mögliche Steuerbelastung zu erkennen. Im letzten Kapitel, Kapitel 7, wird ein Steuerbelastungsvergleich der ausgewählten Rechtsform [...]

Behavioral Science & Policy: Volume 7, Issue 2 Craig R. Fox, Sim B. Sitkin, 2022-03-29 The success of nearly all public- and private-sector policies hinges on the behavior of individuals, groups, and organizations. Today, such behaviors are better understood than ever, thanks to a growing body of practical behavioral science research. However, policymakers often are unaware of behavioral science findings that may help them craft and execute more effective and efficient policies. The pages of this journal will become a meeting ground: a place where scientists and non-scientists can encounter clearly described behavioral research that can be put into action. By design, the scope of Behavioral Science & Policy is broad, with topics spanning health care, financial decisionmaking, energy and the environment, education and culture, justice and ethics, and work place practices. Contributions will be made by researchers with expertise in psychology, sociology, law, behavioral economics, organization science, decision science, and marketing. The journal is a key offering of the Behavioral Science & Policy Association in partnership with the Brookings Institution. The mission of BSPA is to foster dialog between social scientists, policymakers, and other practitioners in order to promote the application of rigorous empirical behavioral science in ways that serve the public interest. BSPA does not advance a particular agenda or political perspective.

China's Global Identity Hoo Tiang Boon, 2018-11-01 China is today regarded as a major player in world politics, with growing expectations for it to do more to address global challenges. Yet relatively little is known about how it sees itself as a great power and understands its obligations to the world. In China's Global Identity, Hoo Tiang Boon embarks on the first sustained study of China's great power identity. Focus is drawn to China's positioning of itself as a responsible power and the underestimated role played by the United States in shaping this face. In 1995 President Bill Clinton notably called for China to become a responsible great power, one that integrates itself into existing international institutions and becomes a leader in solving global problems. Chinese leaders were at that time already debating their future course and obligations to the world. Hoo examines this ongoing internal debate through Chinese sources and reveals the underestimated role that the United States has in this dialogue. Unraveling the big power politics, history, events, and ideas behind the emergence and evolution of China's great power identity, the book provides fresh insights into the real-world issues of how China might use its power as it grows. The question of China's role as a responsible power has real-world implications for its diplomacy and trajectory, as well as the responses of states adjusting to these shifts. The book offers a new lens for

scholars, policy professionals, diplomats, and students in the fields of international relations and Asian affairs to make sense of China's rise and its impact on America and global order.

Think Bayes Allen B. Downey, 2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Food Safety Management Y. Motarjemi, G.G. Moy, P.J. Jooste, L.E. Anelich, 2013-11-01 In many countries of the world, the dairy industry is one of the most important food sectors and it has, by and large, been very successful in providing safe products. Nevertheless, the dairy sector, like other food sectors, also has its challenges, as from farm to the point of consumption, dairy products can become contaminated with a broad range of microbial and chemical hazards. The sources of contamination are multiple and the pathways are complex. Contamination of milk can occur directly by dairy animals shedding pathogens into the milk, or indirectly by contamination of the milk during the milking process, collection and transportation. Infected animals or asymptomatic carriers can shed the organisms in the feces and contaminate the milk through the environment. Other sources of environmental contamination are water, pests, soil, feces, pets and contaminated feed. Infected farmers, not respecting hand hygiene, are also a potential source of contamination of milk. During milking, collection and transportation, milk can be subjected to further contamination by the equipment and/or be subjected to time-temperature abuse, creating optimum conditions for microbial growth. Hence, ensuring safety of milk and dairy products starts on the farm with animal health, quality of feed, a hygienic environment and, in general, good animal husbandry. Nevertheless, pasteurization of milk is necessary to kill any surviving organisms and reduce the risk of illness to an acceptable level. Provided that hygienic measures are taken to prevent any post-process contamination, milk and dairy products can be produced and consumed safely. The present chapter reviews risks and control measures all along the production chain.

Towards Strategic Pragmatism in Foreign Policy Charles Chao Rong Phua, 2021-10-31 What is pragmatism? Is it a means to an end, or an end in itself? Is it antithetical to ideology or morality? Arguing that pragmatism is a skill much more than an attribute, Phua examines how viewing it in this way can help achieve better foreign policy outcomes. He examines and contrasts the ways in which the United States, China and Singapore have incorporated pragmatism into their approaches to foreign policy. In doing so he debunks dualistic myths around pragmatism and ideology and promotes the view of pragmatism as a skill that can be developed. An essential primer for students, analysts and policymakers, with a fresh and practical approach to pragmatism.

The Microbiological Safety of Low Water Activity Foods and Spices Joshua B. Gurtler, Michael P. Doyle, Jeffrey L. Kornacki, 2014-12-08 Low water activity (aw) and dried foods such as dried dairy and meat products, grain-based and dried ready-to-eat cereal products, powdered infant formula, peanut and nut pastes, as well as flours and meals have increasingly been associated with product recalls and foodborne outbreaks due to contamination by pathogens such as *Salmonella* spp. and enterohemorrhagic *E. coli*. In particular, recent foodborne outbreaks and product recalls related to *Salmonella*-contaminated spices have raised the level of public health concern for spices as agents of foodborne illnesses. Presently, most spices are grown outside the U.S., mainly in 8 countries: India, Indonesia, China, Brazil, Peru, Madagascar, Mexico and Vietnam. Many of these countries are under-developed and spices are harvested and stored with little heed to sanitation. The FDA has

regulatory oversight of spices in the United States; however, the agency's control is largely limited to enforcing regulatory compliance through sampling and testing only after imported foodstuffs have crossed the U.S. border. Unfortunately, statistical sampling plans are inefficient tools for ensuring total food safety. As a result, the development and use of decontamination treatments is key. This book provides an understanding of the microbial challenges to the safety of low aw foods, and a historic backdrop to the paradigm shift now highlighting low aw foods as vehicles for foodborne pathogens. Up-to-date facts and figures of foodborne illness outbreaks and product recalls are included. Special attention is given to the uncanny ability of Salmonella to persist under dry conditions in food processing plants and foods. A section is dedicated specifically to processing plant investigations, providing practical approaches to determining sources of persistent bacterial strains in the industrial food processing environment. Readers are guided through dry cleaning, wet cleaning and alternatives to processing plant hygiene and sanitation. Separate chapters are devoted to low aw food commodities of interest including spices, dried dairy-based products, low aw meat products, dried ready-to-eat cereal products, powdered infant formula, nuts and nut pastes, flours and meals, chocolate and confectionary, dried teas and herbs, and pet foods. The book provides regulatory testing guidelines and recommendations as well as guidance through methodological and sampling challenges to testing spices and low aw foods for the presence of foodborne pathogens. Chapters also address decontamination processes for low aw foods, including heat, steam, irradiation, microwave, and alternative energy-based treatments.
