**Firefall** Peter Watts,2017-07-13 Firefall is the omnibus edition of the novels Blindsight and Echopraxia. February 13, 2082, First Contact. Sixty-two thousand objects of unknown origin plunge into Earth's atmosphere - a perfect grid of falling stars screaming across the radio spectrum as they burn. Not even ashes reach the ground. Three hundred and sixty degrees of global surveillance: something just took a snapshot. And then... nothing. But from deep space, whispers. Something out there talks - but not to us. Two ships, Theseus and the Crown of Thorns, are launched to discover the origin of Earth's visitation, one bound for the outer dark of the Kuiper Belt, the other for the heart of the Solar System. Their crews can barely be called human, what they will face certainly can't. 'A tour de force, redefining the First Contact story for good' Charles Stross. 'If you only read one science fiction novel this year, make it this one!... It puts the whole of the rest of the genre in the shade... It deserves to walk away with the Clarke, the Hugo, the Nebula, the BSFA, and pretty much any other genre award for which it's eligible. It's off the scale... F\*\*king awesome!' Richard Morgan. 'State-of-the-art science fiction: smart, dark and it grabs you by the throat from page one' Neal Ascher.

**Enhancing Food Safety** National Research Council,Institute of Medicine,Board on Agriculture and Natural Resources,Food and Nutrition Board,Committee on the Review of the Food and Drug Administration's Role in Ensuring Safe Food,2010-11-04 Recent outbreaks of illnesses traced to contaminated sprouts and lettuce illustrate the holes that exist in the system for monitoring problems and preventing foodborne diseases. Although it is not solely responsible for ensuring the safety of the nation's food supply, the U.S. Food and Drug Administration (FDA) oversees monitoring and intervention for 80 percent of the food supply. The U.S. Food and Drug Administration's abilities to discover potential threats to food safety and prevent outbreaks of foodborne illness are hampered by impediments to efficient use of its limited resources and a piecemeal approach to gathering and using information on risks. Enhancing Food Safety: The Role of the Food and Drug Administration, a new book from the Institute of Medicine and the National Research Council, responds to a congressional request for recommendations on how to close gaps in FDA's food safety systems. Enhancing Food Safety begins with a brief review of the Food Protection Plan (FPP), FDA's food safety philosophy developed in 2007. The lack of sufficient detail and specific strategies in the FPP renders it ineffectual. The book stresses the need for FPP to evolve and be supported by the type of strategic planning described in these pages. It also explores the development and implementation of a stronger, more effective food safety system built on a risk-based approach to food safety management. Conclusions and recommendations include adopting a risk-based decision-making approach to food safety; creating a data surveillance and research infrastructure; integrating federal, state, and local government food safety programs; enhancing efficiency of inspections; and more. Although food safety is the responsibility of everyone, from producers to consumers, the FDA and other regulatory agencies have an essential role. In many instances, the FDA must carry out this responsibility against a backdrop of multiple stakeholder interests, inadequate resources, and competing priorities. Of interest to the food production industry, consumer advocacy groups, health care professionals, and others, Enhancing Food Safety provides the FDA and Congress with a course of action that will enable the agency to become more efficient and effective in carrying out its food safety mission in a rapidly changing world.

**Echopraxia** Peter Watts,2014-08-26 Prepare for a different kind of singularity in Peter Watts' Echopraxia, the follow-up to the Hugo-nominated novel Blindsight It's the eve of the twenty-second century: a world where the dearly departed send postcards back from Heaven and evangelicals make scientific breakthroughs by speaking in tongues; where genetically engineered vampires solve problems intractable to baseline humans and soldiers come with zombie switches that shut off self-awareness during combat. And it's all under surveillance by an alien presence that refuses to show itself. Daniel Bruks is a living fossil: a field biologist in a world where biology has turned computational, a cat's-paw used by terrorists to kill thousands. Taking refuge in the Oregon desert, he's turned his back on a humanity that shatters into strange new subspecies with every heartbeat. But he awakens one night to find himself at the center of a storm that will turn all of history inside-out. Now he's trapped on a ship bound for the center of the solar system. To his left is a grief-stricken soldier, obsessed by whispered messages from a dead son. To his right is a pilot who hasn't yet found the man she's sworn to kill on sight. A vampire and its entourage of zombie bodyguards lurk in the shadows behind. And dead ahead, a handful of rapture-stricken monks takes them all to a meeting with something they will only call The Angels of the Asteroids. Their pilgrimage brings Dan Bruks, the fossil man, face-to-face with the biggest evolutionary breakpoint since the origin of thought itself. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**Think Bayes** Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

**Dwell** ,2001-08 At Dwell, we're staging a minor revolution. We think that it's possible to live in a house or apartment by a bold modern architect, to own furniture and products that are exceptionally well designed, and still be a regular human being. We think that good design is an integral part of real life. And that real life has been conspicuous by its absence in most design and architecture magazines.

*A Time of Gifts* Patrick Leigh Fermor,2011-09-14 This beloved account about an intrepid young Englishman on the first leg of his walk from London to Constantinople is simply one of the best works of travel literature ever written. At the age of eighteen, Patrick Leigh Fermor set off from the heart of London on an epic journey—to walk to Constantinople. A Time of Gifts is the rich account of his adventures as far as Hungary, after which Between the Woods and the Water continues the story to the Iron Gates that divide the Carpathian and Balkan mountains. Acclaimed for its sweep and intelligence, Leigh Fermor's book explores a remarkable moment in time. Hitler has just come to power but war is still ahead, as he walks through a Europe soon to

be forever changed—through the Lowlands to Mitteleuropa, to Teutonic and Slav heartlands, through the baroque remains of the Holy Roman Empire; up the Rhine, and down to the Danube. At once a memoir of coming-of-age, an account of a journey, and a dazzling exposition of the English language, *A Time of Gifts* is also a portrait of a continent already showing ominous signs of the holocaust to come.

**Seeking Equality** John Harles,2017-10-25 Seeking Equality compares economic inequality in the United States and Canada. The North American neighbors have much in common—socially, politically, and economically—yet Canadians enjoy significantly higher levels of equality and material well-being. Harles explores the values and policy decisions that have influenced these different economic outcomes. Drawing on the Canadian experience, he explains why a yawning gap between the very rich and the rest should be cause for civic anxiety in the United States...and what can be done about it.

**Facilitation in Complexity** Renata Petrevska Nechkoska,Gjorgji Manceski,Geert Poels,2023-01-09 This book trailblazes co-evolution approaches which have been prototyped and tried out by the authors, with global academic and practitioner backgrounds. It was devised to help humanity, people, perceived as complex adaptive systems, to self-organize, co-create, and manage complexity, by showcasing with own example, as individuals and open networks. The book bundles main components needed for facilitation in complexity, while each chapter covers conceptual solutions for specific complexity strategies, tactics, operations - projects. These solutions serve as blueprints and roadmaps, providing approaches for practitioners and researchers alike. The main features incorporated in all the approaches are transcending silos and organizational hierarchies toward a borderless collaboration between diverse stakeholders with dynamic roles and accountabilities regarding purposes, missions and solutions. The book includes suggestions for strategic, tactical and operational managerial and governance approaches for disruptive, short-term, innovative, open, large-scale engagements where rapid onboarding, situational awareness, innovation and innovation in context, and action are expected while fast facilitation, dynamic reconfiguration, and self-organization are required. It also describes how long-term sustained co-creative action needs to be facilitated, to adapt to external and internal complexity dynamics while initiating positive change. This book showcases how co-creation and co-dreaming emerge with co-evolution. Chapters 1, 2, and 11 are available open access under a Creative Commons Attribution 4.0 International License via [link.springer.com](https://link.springer.com).

**Between the Woods and the Water** Patrick Leigh Fermor,2010-10-10 The acclaimed travel writer's youthful journey - as an 18-year-old - across 1930s Europe by foot began in *A Time of Gifts*, which covered the author's exacting journey from the Lowlands as far as Hungary. Picking up from the very spot on a bridge across the Danube where his readers last saw him, we travel on with him across the great Hungarian Plain on horseback, and over the Romanian border to Transylvania. The trip was an exploration of a continent which was already showing signs of the holocaust which was to come. Although frequently praised for his lyrical writing, Fermor's account also provides a coherent understanding of the dramatic events then unfolding in Middle Europe. But the delight remains in travelling with him in his picaresque journey past remote castles, mountain villages, monasteries and towering ranges.

**Statistical Abstract of the United States 2009 (Hardcover)** ,2008-12-18 The 128th edition of the Statistical Abstract continues a proud tradition of presenting a comprehensive and useful portrait of the social, political, and economic organization of the United States. The 2009 edition provides: More than 1,300 tables and graphs that cover a variety of topics such as religious composition of the U.S. population, assisted reproductive technology, military retirement, homeowner and rental vacancy rates, aquaculture products and sales, typical daily Internet activities, and expenditures for wildlife-related recreation. Expanded guide to other sources of statistical information both in print and on the Web. Listing of metropolitan and micropolitan areas and their population numbers. Book jacket.

**Measuring the Subjective Well-Being of Nations** Alan B. Krueger,2009-11-15 Surely everyone wants to know the source of happiness, and indeed, economists and social scientists are increasingly interested in the study and effects of subjective well-being. Putting forward a rigorous method and new data for measuring, comparing, and analyzing the relationship between well-being and the way people spend their time—across countries, demographic groups, and history—this book will help set the agenda of research and policy for decades to come. It does so by introducing a system of National Time Accounting (NTA), which relies on individuals’ own evaluations of their emotional experiences during various uses of time, a distinct departure from subjective measures such as life satisfaction and objective measures such as the Gross Domestic Product. A distinguished group of contributors here summarize the NTA method, provide illustrative findings about well-being based on NTA, and subject the approach to a rigorous conceptual and methodological critique that advances the field. As subjective well-being is topical in economics, psychology, and other social sciences, this book should have cross-disciplinary appeal.
